

WAM Research investment portfolio up 15.1% and delivers record dividend

Highlights

- 4.0c fully franked interim dividend declared – up 6.7%
- Investment portfolio increased 15.1% in 2014, outperforming market by 10.1%
- Total shareholder return for 2014 was 9.8%

WAM Research Limited (ASX: WAX) ('WAM Research' or the 'Company') announces that its investment portfolio increased 15.1% in the 12 months to 31 December 2014 and increased 11.7% in the last six months of calendar year 2014, outperforming the market by 10.1% and 9.4%, respectively.

The Company announces a fully franked interim dividend of 4.0 cents per share, an increase of 6.7% on the previous corresponding period, representing an annualised dividend yield of 6.8% (based on the last closing price).

WAM Research Chairman, Geoff Wilson, said: "This result reflects the continuing strong performance of the investment portfolio which has again outperformed the market, and demonstrates the success of the Company's investment process."

CEO Kate Thorley said: "WAM Research continues to provide investors with a diversified portfolio of undervalued growth companies while delivering strong risk-adjusted returns. The Company is committed to delivering a stream of rising fully franked dividends and the investment portfolio's positive performance has allowed the Board to raise the interim dividend."

Record fully franked interim dividend

The Board announces a fully franked interim dividend of 4.0 cents per share, an increase of 6.7% on the previous corresponding period. The record date for this interim dividend is 20 May 2015. The interim dividend will be paid on 28 May 2015 and shares will trade ex on 18 May 2015. The ex-dividend date has been set later than usual to give full flexibility to shareholders to make a decision around their bonus option holding.

The dividend reinvestment plan (DRP) will operate for the interim dividend. The relevant issue price will be at a 2.5% discount to the price (calculated as the VWAP (volume weighted average market price) of shares sold on the ASX on the ex date for the relevant dividend and the 3 trading days following that date). The last election date for the DRP will be 21 May 2015.

The Board is committed to paying an increasing stream of fully franked dividends to shareholders, provided the Company has sufficient profit reserves and franking credits, and it is within prudent business practices.

WAM Research's dividends since inception

Bonus option issue

On 28 October 2013, the Company announced a one for two bonus option issue ('Bonus Option Issue') to all WAM Research shareholders to acquire ordinary shares in the Company. The options have an exercise price of \$1.20 per share and can be exercised at any time on or before 17 June 2015. If options are exercised before 13 May 2015, then they will be entitled to the 4.0 cents fully franked interim dividend.

As at 31 December 2014, 1,979,382 options had been exercised for a total consideration of \$2,375,258, with the remaining balance of outstanding options being 66,969,509.

WAM Research's continued growth benefits shareholders in a number of ways. As the Company's size increases, the Company's fixed administration expense ratio usually reduces, while liquidity increases. The larger capital base enhances the Company's relevance in the market, improving the prospect of broker and research coverage and interest from financial planners and Self Managed Superannuation Funds ('SMSFs').

Investment portfolio performance

WAM Research investment portfolio rose 15.1% outperforming the S&P/ASX All Ordinaries Accumulation Index ('Index') by 10.1% for the 12 months to 31 December 2014. For the six months to 31 December 2014, the Company's investment portfolio rose 11.7% as compared with the Index which rose 2.3%.

Throughout the six-month period, WAM Research maintained an average equity weighting of 69.1% and an average cash weighting of 30.9%.

Chief Investment Officer, Chris Stott, said: "The Company's investment portfolio performed strongly in 2014. We have delivered a robust risk-adjusted result, outperforming the S&P/ASX All Ordinaries Accumulation Index by 10.1% with an average equity exposure of 65.6% for the year."

Outperformance against sharemarket

The investment portfolio's top performing stocks for the period were: Mantra Group Limited (ASX: MTR), Sirtex Medical Limited (ASX: SRX), Infomedia Limited (ASX: IFM), Corporate Travel Management Limited (ASX: CTD) and Slater & Gordon Limited (ASX: SGH).

Equity market outlook

Equity markets had a subdued performance in 2014 with the S&P/ASX All Ordinaries Accumulation Index rising 5.0%. After a good start to the calendar year, the sharemarket pulled back in September and October on renewed fears around global growth. Uncertainty around Chinese growth, turmoil in Europe's economy and the plunge in the oil price resulted in heightened volatility throughout the year..

The Australian Dollar continued its decline against the US Dollar in the second half of the calendar year to finish at 81.8 cents – its lowest level since June 2010 – falling 13 cents against the greenback since its highs of July 2014. Overseas, the US economy continued to perform strongly, helping the Dow Jones Industrial Average Index over 18,000 for the first time in history.

Looking forward into 2015, we remain cautious on the Australian economy and sharemarket. Record low interest rates globally are underpinning equity valuations. We believe further interest rate cuts will be forthcoming in Australia on the back of weaker inflation data and the higher unemployment rate. This, together with the lower exchange rate and lower oil prices should provide a stimulus to economic activity in the second half of 2015. We expect that the market for IPOs will stay strong for the next six months along with a heightened level of M&A activity with corporate balance sheets in great shape.
