Big Review TV Video Payment Gateway Opens BIG Doors

Big Un Limited hit another key milestone today with the activation of their automated video platform payment gateway for Big Review TV users.

Bigreviewtv.com is a video review platform featuring video reviews for small and medium enterprise (SME) or merchants. Merchants are offered a range of video marketing services ranging from a free 15 sec video listing on the review platform through to value added membership and full video licensing options priced at \$75 per week.

This exciting payment gateway development is the first stage in the planned automation of Big Review TV booking and transactional services using video reviews. These will include options for consumers to book tables at restaurants, rooms in hotels or buy merchandise direct from merchants via the Big Review TV video platform.

With over 5000 businesses in the Big Review TV pipeline, the automated activation of the Big Review TV payment gateway allows merchants to select membership packages to suit their business requirements, booking production of video content and online marketing packages via www.bigreviewtv.com/membership

This milestone is expected to significantly accelerate the ease and uptake of Big Review TV products and service across the global marketplace, activating further revenues streams as Big Un Limited embark upon their global roll out strategy.
