## 2014 Sustainability Report

- **Sydney Airport is the first Australian airport to release a Sustainability Report**
- **Report responds to stakeholder feedback and covers key sustainability issues**
- **Sustainability reporting supports Sydney Airport's environmental, community engagement and other initiatives**

Sydney Airport is delighted today to release our inaugural Sustainability Report, making it the first Australian airport to commit to annual sustainability reporting in line with the Global Reporting Initiative's G4 guidelines.

The Sustainability Report focuses on the key sustainability issues which are most significant for Sydney Airport, covering four key themes:

- Engaging and responding to our stakeholders;
- Responsibly managing the airport, enhancing the passenger experience;
- Supporting passenger growth; and
- Developing our people.

"We understand that by considering the impact of our business, we are able to deliver sustainable growth while creating value for our investors over the long term." Sydney Airport managing director and chief executive officer Kerrie Mather said.

The report is the culmination of extensive engagement with and feedback from key stakeholder groups and the Sydney Airport team.

The Sustainability Report can be downloaded from Sydney Airport's website at [www.sydneyairport.com.au/sustainability](http://www.sydneyairport.com.au/sustainability)
