About Prima BioMed

Prima BioMed is a globally active biotechnology company that is striving to become a leader in the development of immunotherapeutic products for the treatment of cancer. Prima BioMed is dedicated to leveraging its technology and expertise to bring innovative treatment options to market for patients and to maximise value to shareholders.

Prima's pipeline of products includes IMP321 based on the LAG-3 immune control mechanism which plays a vital role in the regulation of the T cell immune response. IMP321 is its most clinically advanced product, a T cell immunostimulatory factor (APC activator) for cancer chemoimmunotherapy which has completed early Phase II trials. A number of additional LAG-3 products including antibodies for immune response modulation in autoimmunity and cancer are being developed by large pharmaceutical partners.
