

CE Mark for Oscar 2 with SphygmoCor inside

AtCor Medical Holdings Limited (ASX:ACG), the developer and marketer of the SphygmoCor® system which measures central aortic blood pressures and arterial stiffness non-invasively, and SunTech Medical Inc., a leader in non invasive blood pressure products and technologies, today announced that their jointly developed product, Oscar 2 with SphygmoCor inside for ambulatory blood pressure monitoring (ABPM), has received CE Mark certification.

The CE Mark indicates compliance with European Commission legislation and will enable commercial marketing and sales to commence in Europe, Australia and select Asian countries. Oscar 2 with SphygmoCor inside combines SunTech's leading ABPM technology and AtCor's gold standard central blood pressure technology, enabling doctors to monitor a patient's blood pressure over an extended time period. The product was developed as part of a multi-year alliance between AtCor and SunTech Medical (part of the Halma plc group).

The device will be jointly marketed, with AtCor taking the lead role in the pharmaceutical clinical trials market and SunTech in the clinical practice and research market. In Australia, AtCor will be the sole distributor for all markets. The global ambulatory blood pressure market is estimated at 45,000 units per annum, with the pharmaceutical clinical trials market representing approximately 50 per cent of sales.

Duncan Ross, CEO of AtCor Medical said "This is a significant step forward which allows both AtCor and SunTech to actively sell Oscar 2 with SphygmoCor inside into major medical device markets. It is a high quality product which will allow physicians, researchers, and pharmaceutical companies to record important information on a patient's central aortic blood pressures and arterial stiffness over 24 hours."

The parties have filed for US FDA 510k clearance and, assuming clearance is granted, Oscar 2 with SphygmoCor inside is expected to be available for sale in the US later in 2015.

About AtCor Medical:

AtCor Medical develops and markets products for the early detection of cardiovascular risk and management of cardiovascular disease. Its technology allows researchers and clinicians to measure central aortic blood pressure non-invasively. The company's SphygmoCor® system visibly identifies the effects of reflected blood pressure in the central aortic pressure wave, effects which cannot be detected with standard blood pressure monitoring. More than 3,800 SphygmoCor® systems are currently in use worldwide at major medical institutions, research institutions and in various clinical trials with leading pharmaceutical companies. The company's technology has been featured in over 900 peer-reviewed studies published in leading medical journals and thousands of citations. AtCor has operations in Australia, the United States, and Europe. For further information, please visit our web site at www.atcormedical.com.

About SunTech Medical:

SunTech Medical, a Halma company, has been the preeminent supplier of clinical grade blood pressure monitoring products and technologies for nearly 30 years. Over 80 companies trust SunTech Medical's OEM non-invasive blood pressure solutions for their patient monitoring needs. SunTech Medical produces the leading cardiac stress test blood pressure monitor and is the world's foremost manufacturer of ambulatory blood pressure monitoring products. SunTech Medical also offers solutions for in-office blood pressure monitoring as well as a complete line of blood pressure cuffs designed for general and specific applications.

For more information on SunTech Medical's full line of clinical-grade non-invasive blood pressure products and technologies, call +1.800.421.8626 or visit www.suntechmed.com.
