Disclaimer

The material in this presentation has been prepared by Macquarie Group Limited ABN 94 122 169 279 (Macquarie) and is general background information about Macquarie's activities current as at the date of this presentation. This information is given in summary form and does not purport to be complete. Information in this presentation, including forecast financial information, should not be considered as advice or a recommendation to investors or potential investors in relation to holding, purchasing or selling securities or other financial products or instruments and does not take into account your particular investment objectives, financial situation or needs. Before acting on any information you should consider the appropriateness of the information having regard to these matters, any relevant offer document and in particular, you should seek independent financial advice. All securities and financial product or instrument transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments and, in international transactions, currency risk.

This presentation may contain forward looking statements including statements regarding our intent, belief or current expectations with respect to Macquarie's businesses and operations, market conditions, results of operation and financial condition, capital adequacy, specific provisions and risk management practices. Readers are cautioned not to place undue reliance on these forward looking statements. Macquarie does not undertake any obligation to publicly release the result of any revisions to these forward looking statements to reflect events or circumstances after the date hereof to reflect the occurrence of unanticipated events. While due care has been used in the preparation of forecast information, actual results may vary in a materially positive or negative manner. Forecasts and hypothetical examples are subject to uncertainty and contingencies outside Macquarie's control. Past performance is not a reliable indication of future performance.

Unless otherwise specified all information is for the full year ended 31 March 2015.

Certain financial information in this presentation is prepared on a different basis to the Macquarie Group Limited Financial Report, which is prepared in accordance with Australian Accounting Standards. Where financial information presented within this presentation does not comply with Australian Accounting Standards, a reconciliation to the statutory information is provided.

This report provides further detail in relation to key elements of Macquarie Group Limited's financial performance and financial position. It also provides an analysis of the funding profile of the Group because maintaining the structural integrity of the Group's balance sheet requires active management of both asset and liability portfolios. Active management of the funded balance sheet enables the Group to strengthen its liquidity and funding position.

Any additional financial information in this presentation which is not included in the Macquarie Group Limited Financial Report was not subject to independent audit or review by PricewaterhouseCoopers.

Regulatory update

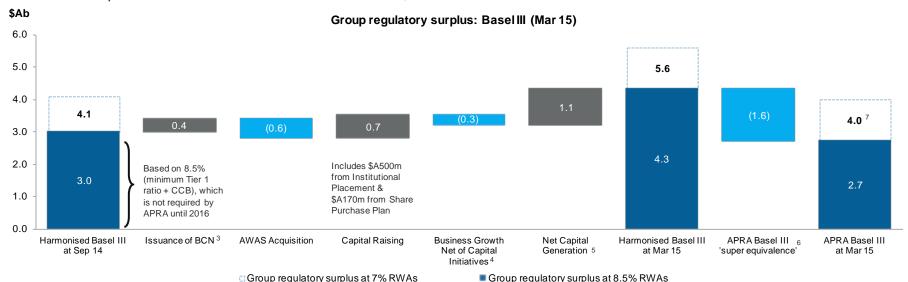

- In Aug 14, APRA issued its final rules for Conglomerates with the implementation timing dependent on the outcomes of the Financial System Inquiry. We continue to work through the application of the rules with APRA and our current assessment remains that Macquarie has sufficient capital to meet the minimum APRA capital requirements for Conglomerates
- Based on finalised BIS leverage ratio requirements¹ released in Jan 14, the Bank Group is well in excess of the currently proposed Basel III 3% minimum, with an estimated 6.0% leverage ratio as at 31 Mar 15
 - APRA published draft standards relating to the leverage ratio in Sep 14 and is currently undertaking industry consultation regarding its final form
 - APRA has not implemented a minimum leverage ratio requirement at this stage
- Liquidity Coverage Ratio (LCR) requirements¹ came into effect on 1 Jan 15. As at 31 Mar 15, the Bank Group's LCR exceeded 120%
 - Macquarie has been compliant with the LCR at all times since the ratio became a minimum requirement, with the average LCR for the first quarter of CY15 also exceeding 120%
- APRA has recently indicated its intention to deal with the level of capital held against mortgages, perhaps narrowing the mortgage risk weight differential between internal ratings-based (IRB) and standardised approach banks
 - it remains unclear if, and to what extent, the gap will be narrowed
 - if the current APRA standardised approach were to be used instead of Macquarie's IRB mortgage risk weights, the expected impact on the Bank Group's CET1 capital would be less than \$A250m

Basel III capital position

- APRA Basel III Group capital at Mar 15 of \$A16.1b, Group surplus of \$A2.7b (1 Jan 16 requirements¹)
- Bank Group APRA Basel III CET1 ratio: 9.7%; Tier 1 ratio: 11.0%
- Bank Group Harmonised Basel III CET1 ratio: 11.4%; Tier 1 ratio: 12.6%²

MACQUARI

Continued retail deposit¹ growth

- Macquarie has been successful in pursuing its strategy of diversifying its funding sources through growing its deposit base
 - In excess of 1.1 million retail clients, of which approx. 600,000 are depositors
 - Focus on the composition and quality of the deposit base
 - Continue to grow deposits in the CMA product, which has an average account balance of approx. \$A44,000

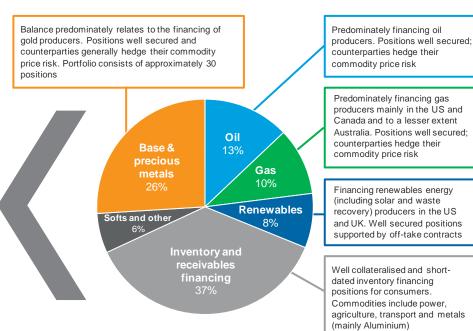

^{1.} Retail deposits are those placed with the Banking and Financial Services Group and includes products such as the Cash Management Account, Term Deposits and Business Banking deposits. Retail counterparties primarily consist of individuals, self-managed super funds and small-medium enterprises.

- 1. Range excludes FY09 provisions for loan losses of \$A135m related to Real Estate Structured Finance loans as this is a restructured business.
- 2. Range excludes FY09 loss on sale of Italian mortgages of \$A248m as this is a discontinued business.
- 3. During FY14, Group Treasury revised internal funding transfer pricing arrangements relating to BFS's deposit and lending activities. FY13 comparatives only have been restated to reflect the current methodology.

Short term outlook

- While the impact of future market conditions makes forecasting difficult, we currently expect the FY16 combined net profit contribution¹ from operating groups to be broadly in line with FY15
- The FY16 tax rate is currently expected to be broadly in line with 2H15 and down on FY15
- Accordingly, the Group's result for FY16 is currently expected to be slightly up on FY15
- Our short term outlook remains subject to a range of challenges including:
 - Market conditions
 - The impact of foreign exchange
 - The cost of our continued conservative approach to funding and capital
 - Potential regulatory changes and tax uncertainties

Additional information Funding

Group funding structure

- MGL and MBL are the Group's two primary external funding vehicles which have separate and distinct funding, capital and liquidity management arrangements
- MBL provides funding to the Bank Group
- MGL provides funding predominately to the Non-Bank Group

Funded balance sheet reconciliation

- The Group's statement of financial position is prepared based on generally accepted accounting principles which do not represent actual funding requirements
- A funded balance sheet reconciliation has been prepared to reconcile the reported assets of the consolidated Group to the assets that require funding

Explanation of Funded Balance Sheet reconciling items

- Self funded trading assets: Macquarie enters into stock borrowing and lending as well as repurchase agreements and reverse repurchase agreements in the normal course of trading activity that it conducts with its clients and counterparties. Also as part of its trading activities, Macquarie pays and receives margin collateral on its outstanding derivative positions. These trading related asset and liability positions are presented gross on the statement of financial position but are viewed as being self funded to the extent that they offset one another and, therefore, are netted as part of this adjustment.
- Derivative revaluation accounting gross-ups: Macquarie's derivative activities are mostly client driven with client positions hedged by offsetting positions with a variety of counterparties. The derivatives are largely matched and this adjustment reflects that the matched positions do not require funding.
- Life investment contracts and other segregated assets: These represent the assets and liabilities that are recognised where Macquarie provides products such as investment-linked policy contracts or where Macquarie holds segregated client monies. The policy (contract) liability and client monies will be matched by assets held to the same amount and hence does not require funding.
- Outstanding trade settlement balances: At any particular time Macquarie will have outstanding trades to be settled as part of its
 brokering business and trading activities. These amounts (payables) can be offset in terms of funding by amounts that Macquarie is
 owed on other trades (receivables).
- Short term working capital assets: As with the outstanding trade settlement balances above, Macquarie through its day-to-day operations generates working capital assets (e.g. receivables and prepayments) and working capital liabilities (e.g. creditors and accruals) that produce a 'net balance' that either requires or provides funding.
- Securitised and non-recourse assets: These represent assets that are funded by third parties with no recourse to Macquarie including lending assets (mortgages and leasing) sold down into external securitisation entities.

Conservative long standing liquidity risk management framework

Liquidity Policy

- The key requirement of MGL and MBL's liquidity policies is that the entities are able to meet all liquidity obligations during a period of liquidity stress:
 - a minimum 12 month period with constrained or no access to funding markets and with only a limited impact on franchise businesses
- Term assets are funded by term funding, stable deposits and equity

Liquidity Framework

- A robust liquidity risk management framework ensures that both MGL and MBL are able to meet their funding requirements as they fall due under a range of market conditions. Key tools include:
 - Scenario analysis
 - Unencumbered liquid asset holdings
 - Liability driven approach to balance sheet management
- Liquidity management is performed centrally by Group Treasury, with oversight from the Asset and Liability Committee and the Risk Management Group
- The Boards of each entity approve their respective liquidity policy and are provided with liquidity reporting on a monthly basis

Macquarie Group regulatory capital Non-Bank Group contribution

- APRA has specified a regulatory capital framework for MGL
- A dollar capital surplus is produced; no capital ratio calculation is specified
- APRA has approved Macquarie's Economic Capital Adequacy Model (ECAM) for use in calculating the regulatory capital requirement of the Non-Bank Group
- Any significant changes to the ECAM must be approved by the MGL Board and notified to APRA within 14 days
- The ECAM is based on similar principles and models as the Basel III regulatory capital framework for Banks, with both calculating capital at a one year 99.9% confidence level:

| Risk ¹ | Basel III | ECAM |
|-------------------|--|---|
| Credit | Capital requirement generally determined by Basel III IRB formula, with some parameters specified by the regulator (e.g. loss given default) | Capital requirement generally determined by Basel III IRB formula, but with internal estimates of key parameters |
