MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION, RESULTS OF OPERATIONS AND CASH FLOWS FOR THE FOURTH QUARTER AND YEAR ENDED 31 MARCH 2015

The financial statements of the Group are prepared in accordance with Singapore Financial Reporting Standards, which are the same, in material respects, to International Financial Reporting Standards. The financial statements for the year ended, and as at, 31 March 2015 are audited.

Numbers in all tables may not exactly add due to rounding.

For all pages, "@" denotes more than +/- 500%, "" denotes less than +/- S\$500,000 or A\$500,000 and "***" denotes less than +/- 0.05%, unless otherwise indicated.*

For all tables, a negative sign for year-on-year change denotes a decrease in operating revenue, expense, gain or loss.

SECTION 1 : GROUP

BUSINESS SEGMENTS

The Group is organised by three business segments, Group Consumer, Group Enterprise and Group Digital Life, to better serve the evolving needs of its customers and to capture growth opportunities globally.

Group Consumer comprises the consumer businesses across Singapore and Australia, as well as the Group's investments, mainly, AIS in Thailand, Airtel in India, Africa and South Asia, Globe in the Philippines, and Telkomsel in Indonesia. It focuses on driving greater value and performance from the core carriage business including mobile, pay TV, fixed broadband and voice, as well as equipment sales.

Group Enterprise comprises the business groups across Singapore and Australia and focuses on growing the Group's position in the enterprise markets. Key services include mobile, fixed voice and data, managed services, cloud computing, IT services and professional consulting.

Group Digital Life ("GDL") focuses on using the latest internet technologies and assets of the Group operating companies to develop new revenue and growth engines by entering adjacent businesses where it has a competitive advantage. It included digital marketing, data analytics, mobile banking payment, e-commerce, concierge and hyper-local services. With effect from April 2015, following a sharpening of its digital business strategy, GDL focuses on three key businesses - digital marketing (Amobee), regional premium video (HOOQ) and advanced analytics and intelligence capabilities (DataSpark), in addition to strengthening its role as Singtel's digital innovation engine through Innov8.

Corporate comprises the costs of Group functions not allocated to the business segments.

The following tables show the operating performance of the three business segments:

	Quarter		YOY Chge %	Year		YOY Chge %

DELISTING OF SINGTEL FROM ASX Limited ("ASX")

In April 2015, Singtel received approval from ASX to remove its listed securities from the official list of ASX. The effective date of delisting will be on 5 June 2015.

FINAL DIVIDEND

The Directors have proposed a final ordinary dividend of 10.7 cents per share (FY2014: 10.0 cents per share), totalling approximately S\$1.71 billion in respect of the current financial year ended 31 March 2015.

Together with the interim dividend of 6.8 cents per share amounting to S\$1.08 billion paid in the quarter, the total amount of ordinary dividends in respect of the current financial year ended 31 March 2015 would be 17.5 cents per share (FY2014: 16.8 cents per share), totalling approximately S\$2.79 billion. This represented a payout ratio of 74% of underlying net profit.

REVIEW OF GROUP OPERATING PERFORMANCE**For The Fourth Quarter Ended 31 March 2015**

The Group delivered a strong set of results for the fourth quarter. Despite operating losses in digital businesses, underlying net profit grew 3.3% and in constant currency terms would have increased by 3.8%.

The Group's operating revenue grew 5.1%. EBITDA, however, declined 1.8% due to the depreciation of the Australian Dollar by 6%. In constant currency terms, operating revenue and EBITDA would have increased 9.1% and 2.3% respectively.

Group Consumer contributed 60% (Q4 FY2014: 60%) and 68% (Q4 FY2014: 66%) to the Group's operating revenue and EBITDA respectively. Operating revenue grew 6.3% while EBITDA was stable. In constant currency terms, operating revenue and EBITDA would have increased by 12% and 5.7% respectively. Singapore Consumer revenue grew 11% mainly on growth in Equipment sales, Mobile Communications and Consumer Home Services. EBITDA, however, declined 4.4% on increased mobile acquisition and retention expenses and staff costs. There was a write-back of costs accruals in March quarter last year not repeated this quarter. Australia Consumer delivered strong growth in revenue of 12% and increase in EBITDA of 9.0%. The increases were driven by mobile customer growth, ARPU gains and lower mobile acquisition and retention expenses with higher take-up of device repayment plans.

SECTION 1 : GROUP

Group Enterprise contributed 37% (Q4 FY2014: 39%) and 39% (Q4 FY2014: 39%) to the Group's operating revenue and EBITDA respectively. Adjusted for the fibre rollout business which was transferred to NetLink Trust from October 2014, operating revenue grew 1.3%. In constant currency terms, operating revenue would have increased 3.1%. Singapore Enterprise revenue grew 2.6% driven mainly by higher Data and Internet revenue and Equipment sales. Australia Enterprise revenue grew 4.4% with stronger ICT and mobile revenue growth. EBITDA was stable and was up 2.1% in constant currency terms.

In April 2015, Group Enterprise entered into a conditional agreement to acquire approximately 98% of the share capital of Trustwave Holdings, Inc., the largest independent managed security services provider in North America with presence in Europe and Asia Pacific, for an aggregate consideration of approximately US\$810 million, excluding net debt, and subject to working capital adjustments at closing. The acquisition will expand Group Enterprise's existing portfolio of cloud based solutions and entrench its leadership position in the managed services market.

GDL contributed 3% (Q4 FY 2014: 1%) to the Group's operating revenue. Operating revenue nearly tripled to S\$110 million with contributions from Adconion and Kontera which were acquired in the September 2014 quarter. Negative EBITDA of S\$72 million was recorded for the quarter, reflecting higher selling and staff costs.

Depreciation and amortisation charges increased 1.7% mainly from higher amortisation from the acquired intangibles from digital acquisitions and spectrum investments.

The Group and its regional mobile associates continued to record strong customer growth. The combined mobile customer base reached 555 million as at 31 March 2015, up 2.2% from a quarter ago.

The Group's share of associates' pre-tax profits increased 14% to S\$646 million with strong earnings growth at Airtel India, Telkomsel and Globe.

Net finance expense increased S\$8.0 million to S\$52 million mainly due to higher borrowings and lower dividend income from the Southern Cross consortium, partly offset by net foreign exchange gains with a stronger US Dollar.

The higher tax expense resulted mainly from a write-back of prior years' tax provision in March quarter last year partially offset by lower associates' taxes mainly at Airtel Africa.

The net exceptional loss of S\$11 million in the quarter comprised mainly impairment charges of S\$22 million on non-current assets partially offset by a gain of S\$12 million on sale of venture investments.

Net profit increased by 4.5% to S\$939 million and in constant currency terms, would have been up by 5.0%.

Free cash flow in the quarter was S\$964 million, higher by S\$96 million or 11% from the same quarter last year on higher associates' dividends and lower capital expenditure.

The Group continued to maintain a healthy capital structure. As at 31 March 2015, net debt gearing ratio was at 24%, stable from a quarter ago.

SECTION 1 : GROUP

The Group has successfully diversified its earnings base through its expansion and investments in overseas markets. Hence, the Group is exposed to currency movements. On a proportionate basis if the associates are consolidated line-by-line, operations outside Singapore accounted for 76% (Q4 FY2014: 75%) of the Group's proportionate revenue and 75% (Q4 FY2014: 73%) of proportionate EBITDA.

For The Year Ended 31 March 2015

The Group's performance is in line with its guidance issued for the year ended 31 March 2015.

Operating revenue for the year grew 2.2% while EBITDA declined 1.3%. The Australian Dollar depreciated 4% from last year. If the Australian Dollar had remained stable from a year ago, operating revenue and EBITDA would have increased by 4.8% and 1.3% respectively.

Operating revenue for Group Consumer was up 1.4% while EBITDA grew 1.0%. In constant currency terms, operating revenue grew 4.8% and EBITDA was up 4.6% on growth across Singapore and Australia.

Excluding the fibre rollout business, operating revenue for Group Enterprise grew 2.1% while EBITDA declined 2.1%. In constant currency terms, operating revenue grew 3.3% while EBITDA was down 1.4%. The results reflected the keen competition in core carriage business, price declines with the Next Gen NBN environment in Singapore as well as pricing reduction with contract transition for a large government infrastructure and ICT project.

Operating revenue for GDL more than doubled to S\$343 million. Negative EBITDA was S\$216 million on investments in growing the digital businesses.

With higher associates' contributions mainly at Airtel India and Globe, underlying net profit grew 4.7% to S\$3.78 billion. In constant currency terms, underlying net profit would have increased 7.5%.

The Group's net exceptional gain of S\$3 million for the year mainly comprised S\$65 million of gain on dilution of its equity interest in SingPost partially offset by S\$30 million of staff restructuring costs and share of Airtel's one-off items (see Page 16).

Including exceptional items, net profit for the year increased by 3.5% to S\$3.78 billion, and in constant currency terms would have increased 6.2%.

The Group's free cash flow grew 9.2% to S\$3.55 billion. Excluding one-off payment to NetLink Trust in December 2013, free cash flow increased 4.6% due to positive working capital movements partly offset by higher capital expenditure.

SECTION 1 : GROUP**SEQUENTIAL QUARTERLY RESULTS**

Results for the current quarter compared to the preceding quarter ended 31 December 2014 were as follows:

	Quarter		QOQ Chge %
	31 Mar 2015 S\$ m	31 Dec 2014 S\$ m	
Operating revenue	4,339	4,427	-2.0
EBITDA	1,274	1,229	3.7
EBITDA margin	29.4%	27.8%	
Share of associates' pre-tax profits	646	667	-3.2
EBITDA and share of associates' pre-tax profits	1,920	1,896	1.3
EBIT	1,377	1,355	1.6
Profit before exceptional items and tax	1,325	1,285	3.1
Underlying net profit	950	970	-2.1
Exceptional items (post-tax)	(11)	*	nm
Net profit	939	970	-3.2
Free cash flow	964	669	44.2

Operating revenue decreased 2.0% due to the weaker Australian Dollar which depreciated 4% against the Singapore Dollar as well as seasonally lower mobile revenue. The Group's EBITDA grew 3.7% on seasonally lower customer acquisition and retention costs. The Group's tax expense in the preceding quarter included a net tax credit of S\$39 million which arose from certain property, plant and equipment transferred to an associate. With higher tax expense, underlying net profit declined 2.1% from a quarter ago.

The increase in free cash flow was mainly due to positive movements in working capital and higher dividends from associates, mainly from Telkomsel.

SECTION 1 : GROUP

OUTLOOK FOR THE FINANCIAL YEAR ENDING 31 MARCH 2016

Macro-economic Environment

The Singapore economy is forecasted to grow between 2.0% and 4.0% in 2015. The Australia GDP is projected to grow by 2.0% to 3.0% for the fiscal year ending June 2016.

India, Indonesia and the Philippines are expected to register economic growth of between 5% and 7% and the Thai economy is anticipated to grow by 4%. Airtel's key countries in Africa are expected to deliver GDP growth of between 4% and 8%.

Strategic focus

Singtel continues to strengthen its core business and build new growth engines.

In its core business², Singtel will drive profitable revenue growth, build scale and a competitive cost structure in delivering its brand promise. These will be underpinned by strategic investments in networks, systems, technologies and talent.

In its digital business, Singtel will sharpen its focus in three key areas - digital marketing, mobile video and data analytics. It will leverage its unique telco assets to build successful global digital businesses and grow new revenue streams.

Singtel also continues to review opportunities for upstakes in the regional mobile associates.

Singtel has given an undertaking to IDA to divest its stake in NetLink Trust to less than 25% holding by 22 April 2018.

Currency

The guidance for FY2016 is based on the following average exchange rates during FY 2015.

Australian Dollar	AUD 1	SGD 1.1234
Indonesian Rupiah	SGD 1	IDR 9,395
Indian Rupee	SGD 1	INR 47.5
Thailand Baht	SGD 1	THB 25.2
Philippine Peso	SGD 1	PHP 34.3

The Group's consolidated results and cash flow may be impacted by material exchange rate movements in the Australian Dollar and regional currencies.

Group

Excluding Trustwave³ and acquisitions, consolidated revenue of the Group is expected to increase by mid single digit level and EBITDA is expected to grow at low single digit level.

² Comprises Group Consumer and Group Enterprise.

³ The Group's acquisition of Trustwave is subject to the fulfilment of certain conditions precedent, including relevant approvals from regulatory authorities and other third parties, and is expected to complete by October 2015.

SECTION 1 : GROUP

Capital expenditure on an accrual basis is expected to be approximately S\$3.0 billion (FY 2015: S\$2.4 billion) with S\$1.9 billion for Australia and S\$1.1 billion for Singapore. The increased capital expenditure reflects multi-year investments to support the transformation in its core business, including:

- A new data centre in Singapore, expected to be ready in FY 2017, to meet the growing demand for cloud and managed services in the enterprise sector,
- Investments in Australia's mobile infrastructure to deliver a competitive network for enhanced 4G data coverage and performance, and
- New unified billing and customer care systems for greater flexibility and long term cost savings. By leveraging advanced analytics, the new systems will also drive a better customer experience across the Group's core operations in Singapore and Australia.

Capital expenditure on a cash basis is however expected to be S\$2.3 billion with credit terms in place.

Free cash flow, excluding associates' dividends, is expected to be around S\$1.5 billion. Free cash flow is expected to be lower due to increased working capital requirements to accelerate customer growth in Australia, higher tax payments, as well as the cessation of fibre rollout and maintenance businesses with OpenNet's fibre rollout completion and subsequent transfer of this business to NetLink Trust.

Ordinary dividends from the regional mobile associates are expected to be approximately S\$1.1 billion.

Key Business Units

Core Business

- Revenue from the Core Business is expected to increase at mid single digit level and EBITDA to increase by low single digit level.
- Mobile service revenue from Australia is expected to increase by low single digit level.
- Mobile Communications revenue from Singapore is expected to increase by mid single digit level.
- Group ICT revenue (comprising Managed Services and Business Solutions) is expected to increase by mid single digit level.

For **Group Consumer**, Optus will drive growth in mobile data revenue, supported by significant network investments for a deeper coverage and improved data experience. It also aims to capture an increased share in the fixed line with innovative service offerings.

In Singapore, Singtel will increase mobile data penetration and usage among customers. In the residential segment, it will offer differentiated home services, through better content and network experience, to win the homes.

Group Enterprise will leverage enhanced capabilities in cyber security, cloud computing and smart cities solutions to grow new revenues.

SECTION 1 : GROUP

Group Digital Life

- Revenue from Amobee Group is projected to be S\$350-S\$400 million.
- Group Digital Life is expected to record negative EBITDA of S\$150-S\$180 million.

Group Digital Life will execute with a focus to gain scale and profitability. This will be led by Amobee in the digital marketing space. HOOQ will target consumers with compelling video content in close collaboration with the regional mobile associates. DataSpark will deliver analytics solutions focused on geospatial insights for the telco and public sectors.

Dividend policy

Singtel's dividend payout ratio is between 60% and 75% of underlying net profit. The dividend payout is influenced by the Group's cash flow generation, including dividends from associates.

The Group remains committed to an optimal capital structure and investment grade credit ratings, while maintaining financial flexibility to pursue growth.

Notes:

- (1) Comprise revenues mainly from digital marketing, e-commerce, concierge and hyper-local services. The comparatives have been restated to be consistent with the current periods.
- (2) Fibre rollout and maintenance revenue ceased to be recognised with effect from 1 October 2014 as Singtel relinquished its role as OpenNet's key-subcontractor.
- (3) Proportionate share of revenue of associates is based on operating revenue of the associate multiplied by Singtel's effective ownership interest.

SECTION 1 : GROUP

Operating revenue of the Group grew 5.1% on higher Equipment sales and digital revenues partially offset by lower National and International Telephone revenues. In constant currency terms, operating revenue would have increased 9.1%.

The significant increase in equipment sales was due to higher handset sales in both Singapore and Australia driven by continued strong demand for smartphones.

Mobile Communications revenue was stable and would have increased 5.6% in constant currency terms. The strong data growth across Singapore and Australia was partially mitigated by continued declines in voice, SMS and roaming. In Singapore, Mobile Communications revenue increased 1.9% while mobile service revenue in Australia grew 6.3% in local currency terms.

Including the proportionate share of operating revenue from the associates, the Group's enlarged revenue grew 8.6% to S\$7.57 billion, underpinned by Airtel's strong revenue growth.

Group	23,546	23,279	22,066	23,546	22,066	6.7

As of 31 March 2015, Group headcount increased 1,480 or 6.7% from a year ago to 23,546. The net increase was due to staff additions from acquisitions of Adconion and Kontera, increased IT hirings to support ICT projects and conversions of some contract staff to permanent staff.

The higher staff costs in the quarter were due to increase in average staff headcount, annual salary increments, higher performance share expense on increase in fair value of grants for cash-settled awards, and higher incentive accruals. In addition, the March quarter last year included the write-back of some incentive accruals.

Notes:

- (1) Comprise interest earned on the unitholder's loan to NetLink Trust, net of the finance lease expenses on the exchange buildings leased from NetLink Trust.
- (2) Comprise mainly dividend income from other non-equity accounted investments.
- (3) Comprise mainly adjustments for hedging instruments measured at fair values at reporting date under *FRS 39 Financial Instruments: Recognition and Measurement*.

Interest income reduced with lower cash balance while interest expense increased from higher debt.

In the quarter, the Group received dividend income of S\$6 million (Q4 FY2014: S\$11 million) from the Southern Cross consortium.

Net foreign exchange gains arose mainly from revaluation of net monetary assets on a stronger US Dollar compared to a year ago.

Notes:

- (1) Exceptional items are material non-recurring items for which separate disclosure is considered necessary to avoid distortion of reported results of performance.
- (2) Comprised intangibles, property, plant and equipment and available-for-sale investment.

In the quarter, the net exceptional loss resulted mainly from total impairment charges of S\$22 million (Q4 FY2014: S\$14 million) on non-current assets partially offset by a gain on sale of venture investments of S\$12 million (Q4 FY2014: S\$1 million).

Note:

(1) Withholding and dividend distribution taxes are deducted at source when dividends are remitted by the overseas associates. For accounting purposes, the dividend income and related withholding or dividend distribution taxes are accrued when declared by the associates. Dividend income has no impact on the income statement of the Group as they are eliminated at Group. The cash inflows upon the receipt of dividend are shown in **Section 5**.

The increase in the Group's tax expense was mainly due to a write-back of prior years' tax provision in the same quarter last year partially offset by lower associates' taxes mainly at Airtel Africa.

The Group is in a strong financial position as at 31 March 2015. Singtel is rated Aa3 by Moody's and A+ by Standard & Poor's.

The currency translation losses decreased by S\$75 million from a quarter ago, arising mainly from the impact of the stronger Indian Rupee, Thai Baht and Philippine Peso against the Singapore Dollar on translation of net investments in Airtel, AIS and Globe, partly offset by higher losses on translation of net assets of Optus due to a weaker Australian Dollar against the Singapore Dollar.

Notes:

- (1) The net hedging asset/ liability relates to the fair values of cross currency and interest rate swaps.
- (2) Gross debt gearing ratio refers to the ratio of gross debt to gross capitalisation. Gross capitalisation is the aggregate of gross debt, shareholders' funds and minority interests.

Hedged gross debt increased by S\$34 million to S\$8.53 billion from a quarter ago, mainly due to net increase in S\$136 million of borrowings, and mark-to-market movements. Net debt gearing decreased to 24.3% from 24.9% a quarter ago.

Note:

(1) Adjusted to exclude tax benefit payment of S\$143 million to NetLink Trust during the December 2013 quarter. The S\$143 million was subsequently applied by NetLink Trust towards the acquisition of OpenNet.

SECTION 1 : GROUP

Net cash inflow from operating activities (before associates' dividend receipts) for the quarter amounted to S\$1.42 billion, down 2.1% from the corresponding quarter last year due mainly to lower EBITDA impacted by the weaker Australian Dollar partly mitigated by lower cash tax payments. Gross dividends from associates increased due mainly to receipt of Telkomsel's interim dividend partly offset by lower dividend from Globe.

Compared to a quarter ago, operating cash flow increased 25% mainly attributed to positive movements in working capital and higher dividends received from associates, partly offset by higher cash taxes.

Net cash outflow for investing activities was S\$587 million. Capital expenditure was S\$561 million, comprising S\$262 million for Singapore and S\$299 million (A\$280 million) for Australia. In Singapore, major capital investments in the quarter included S\$84 million for fixed and data infrastructure, S\$57 million for mobile networks and S\$47 million for ICT assets. In Australia, capital investments in mobile networks and other core infrastructure were A\$156 million and A\$124 million respectively. Other investing cash outflows included A\$9.7 million for the acquisition of Ensyst Pty Limited in Australia.

With lower cash capital expenditure and higher dividends from associates, the Group's free cash flow grew 11% to S\$964 million from a year ago.

Net cash financing outflow of S\$1.03 billion mainly comprised interim dividend payment of S\$1.08 billion in respect of the current financial year and interest payments of S\$68 million, partly offset by net increase in borrowings of S\$136 million. The proceeds from notes issue of S\$300 million were partly offset by net repayment of bank loans in the quarter.

Overall cash balance decreased S\$67 million from a quarter ago, and the cash balance was S\$563 million as at 31 March 2015.

GROUP CONSUMER OPERATING HIGHLIGHTS

For The Fourth Quarter Ended 31 March 2015

Australia Consumer contributed 76% (Q4 FY2014: 77%) and 78% (Q4 FY2014: 77%) to the Group Consumer's operating revenue and EBITDA respectively. The Australian Dollar depreciated 6% against the Singapore Dollar from the same quarter last year, negatively impacting Group Consumer's results.

Operating revenue increased 6.3%, while EBITDA was stable. In constant currency terms, operating revenue grew 12%, and EBITDA and EBIT increased by 5.7% and 3.4%, respectively.

This quarter, Australia delivered strong growth in operating revenue of 12% and increases in EBITDA and EBIT of 9.0% and 9.4% respectively from growth in mobile service ARPU and higher mobile customer base.

Operating revenue for Singapore Consumer increased strongly by 11% driven by growth in Equipment sales, Mobile Communications and Consumer Home Services. However, EBITDA and EBIT declined by 4.4% and 9.6% respectively mainly from higher operating expenses as well as write-back of certain cost accruals in March 2014 quarter.

For The Year Ended 31 March 2015

For the full year, operating revenue was up 1.4% while both EBITDA and EBIT grew 1.0%. In constant currency terms, operating revenue grew 4.8%, and EBITDA and EBIT were up 4.6% and 4.4% respectively with strong growth across Singapore and Australia (see details on page 27 and page 31).

SECTION 2 : GROUP CONSUMER**SEQUENTIAL QUARTERLY RESULTS**

SECTION 2 : GROUP CONSUMER

SINGAPORE CONSUMER OPERATING PERFORMANCE

For The Fourth Quarter Ended 31 March 2015

This quarter, operating revenue increased strongly by 11% driven by growth from Equipment sales, Mobile Communications and Consumer Home Services.

Equipment sales revenue increased by 85% on continued demand for smartphones.

Mobile Communications revenue grew 2.5% with strong data revenue growth in both prepaid and postpaid, mitigating the continued declines in roaming, voice, and SMS. Postpaid subscription and data revenues continued to grow steadily as more customers signed up for 4G Combo service plans. Revenue was also boosted by 26% of customers on new tiered plans exceeding their data bundles, up from 16% in the same quarter last year.

To enhance customers' data usage experience, Singtel offered premium WiFi in more than 400 access points across shopping malls and train stations, up from approximately 200 access points a quarter ago. More than 50% of Combo plan customers made active use of premium WiFi service, which complemented their 4G data usage.

In the quarter, Singtel announced a partnership with Ericsson to trial LTE Broadcast technology during the 28th South East Asian Games in June 2015. This trial shall showcase the commercial viability of live broadcast and streaming of sporting events on smart devices by leveraging on mobile frequency spectrum and network resources.

Consumer Home Services which comprise residential pay TV, fixed broadband and voice revenues increased by 3.6% with a higher customer base and increased ARPU. Revenue from pay TV was up 12% as a result of higher content upgrades, and growth in the number of customers with bundled services. Fixed broadband grew 1.9% as more customers upgraded to higher speed plans and migrated from ADSL to fibre. To enhance customer experience, customers on lower speed fibre plans were given a free speed boost to 200Mbps in the quarter.

Overall operating expenses increased by 21%. The increase was due to higher cost of sales with increased handset sales, higher staff costs and selling and administrative expenses. In addition, there was write-back of costs accruals in March quarter last year not repeated this quarter. Selling and administrative expenses grew 5.6% on increased customer acquisition and retention costs as more customers renewed and upgraded their mobile plans.

Other income increased by S\$6 million due to foreign exchange gains recognised on revaluation of monetary trade balances.

Overall, EBITDA declined 4.4% and EBIT decreased 9.6% after including higher depreciation resulting mainly from the expansion and upgrading of mobile networks.

For The Year Ended 31 March 2015

Operating revenue for the full year grew 6.1% mainly from growth in Equipment sales, increase in pay TV revenue driven mainly by higher ARPU as well as higher Mobile Communications revenue. EBITDA and EBIT rose 4.0% and 3.5% respectively, notwithstanding the 2014 FIFA World Cup subsidy in the first half year, and the higher handset subsidies in the second half year.

SECTION 2 : GROUP CONSUMER**SEQUENTIAL QUARTERLY RESULTS**

Results for the current quarter compared to the preceding quarter ended 31 December 2014 were as follows:

	Quarter		QOQ Chge %

EBITDA	190	163	16.8
- margin	30.2%	25.0%	
EBIT	124	101	23.4

EBITDA and EBIT grew 17% and 23% respectively compared to the preceding quarter. The growth was contributed mainly by seasonally lower operating expenses from handset subsidies and roaming traffic expenses.

AUSTRALIA CONSUMER OPERATING PERFORMANCE**For The Fourth Quarter Ended 31 March 2015**

This quarter, Australia Consumer delivered strong growth in operating revenue of 12% and increase in EBITDA of 9.0%. The improvements were driven mainly by stronger mobile performance from increased mobile service ARPU and a higher mobile handset customer base.

The strong trading momentum of 'My Plan' offers has accelerated with net postpaid handset customer additions of 59,000⁴ in the March 2015 quarter, while prepaid handset customer base remained steady.

The number of 4G mobile customers increased by 340,000 this quarter, resulting in the total 4G customer base increasing to 3.49 million at 31 March 2015, up from 3.15 million⁵ a quarter ago.

Optus continued its mobile network investments and achieved 4G national population coverage of 86% as of 30 April 2015. 4G is now available on 3,383 mobile sites, of which 2,107 have been upgraded to the 700 MHz spectrum.

In Mass Market Fixed, operating revenue grew 3.0% from higher off-net revenue driven mainly by an increase in the NBN customer base. The on-net customer base returned to growth as a result of successful launches of unlimited data bundles, as well as unmetered Netflix subscriptions.

Wholesale fixed revenue declined A\$5 million or 2.7% mainly due to lower Data and IP revenues.

⁴ Including Enterprise customers, total Optus postpaid handset customers grew 64,000 to 4.62 million.

⁵ Including Enterprise customers, total Optus 4G customers increased from 3.18 million to 3.53 million.

SECTION 2 : GROUP CONSUMER

Total operating expenses increased 14%. Cost of sales increased with higher handset shipment volumes. Traffic expenses increased 10% in line with higher mobile service revenue. Staff costs grew 13% due to annual salary increases and higher retail staff costs on higher number of Optus owned stores. The increases were partially offset by lower selling and administrative expenses which declined 8.1% mainly due to lower customer acquisition and retention costs as a result of higher take-up of DRP plans.

Overall EBITDA increased A\$53M or 9.0%. EBIT was up A\$30M or 9.4% as there was higher depreciation and amortisation charges from increased investments in the mobile network and spectrum (700 MHz spectrum was released on 1 January 2015).

For The Year Ended 31 March 2015

For the full year, operating revenue increased 4.6%, with EBITDA and EBIT up 4.9% and 5.1% respectively. The improvements were driven mainly by stronger mobile performance from increased mobile service ARPU and a higher postpaid handset customer base. Operating expenses increased mainly from higher cost of sales and higher staff costs from the transition to Optus owned stores, partly offset by lower selling and administrative expenses.

SECTION 2 : GROUP CONSUMER**SEQUENTIAL QUARTERLY RESULTS**

Results for the current quarter compared to the preceding quarter ended 31 December 2014 were as follows:

	Quarter		QOQ Chge %
	31 Mar 2015 A\$ m	31 Dec 2014 A\$ m	
Operating revenue	1,870	1,907	-1.9
Operating expenses	(1,257)	(1,344)	-6.5
EBITDA	639	580	10.1
- margin	34.2%	30.4%	
EBIT	350	304	15.1

Operating revenue declined 1.9% in the quarter due to seasonally lower mobile revenue, while both EBITDA and EBIT improved on lower selling expenses.

AUSTRALIAN GOVERNMENT'S NBN PROJECT

In June 2011, Optus and NBNSCo reached an agreement on the migration of Optus' HFC customers, with the total value of the agreement being approximately A\$800 million on a post-tax NPV basis. In December 2014, Optus and NBNSCo reached a revised agreement where the overall value remains comparable to the 2011 Optus HFC Subscriber Agreement, with the majority of the payments to be received progressively on migration.

Under the terms of the agreement, once Optus HFC subscribers have been migrated to the NBN, Optus will progressively transfer ownership of its coaxial cable and ancillary assets to NBNSCo, while retaining ownership of strategic aerial fibre assets used to connect mobile base stations and business customers.

The revised agreement is conditional upon ACCC's approval and a ruling by the Australian Taxation Office.

SECTION 3 : GROUP ENTERPRISE

GROUP ENTERPRISE**MANAGEMENT DISCUSSION AND ANALYSIS**

Group Enterprise provides comprehensive and integrated ICT solutions to enterprise customers both in Singapore and Australia, covering mobile, fixed voice and data, managed services, cloud computing, and IT services and professional consulting.

With the integration of NetLink Trust and OpenNet on 1 October 2014, Singtel relinquished its role as the key sub-contractor in respect of fibre rollout and maintenance. Accordingly, the financial highlights shown below reflected the cessation of fibre rollout and maintenance business and the related revenue share.

FINANCIAL HIGHLIGHTS**FOR THE FOURTH QUARTER ENDED 31 MARCH 2015**

- **Operating revenue at S\$1.61 billion – up 1.3%.**
- **EBITDA stable at S\$502 million.**
- **EBIT at S\$347 million – up 2.4%.**
- **In constant currency terms, operating revenue, EBITDA and EBIT increased 3.1%, 2.1% and 3.3% respectively.**

FOR THE YEAR ENDED 31 MARCH 2015

- **Operating revenue at S\$6.24 billion – up 2.1%.**
- **EBITDA at S\$1.99 billion – down 2.1%.**
- **EBIT at S\$1.39 billion – down 2.1%.**
- **In constant currency terms, operating revenue increased 3.3% while EBITDA and EBIT decreased 1.4% and 1.6% respectively.**

SECTION 3 : GROUP ENTERPRISE

GROUP ENTERPRISE OPERATING HIGHLIGHTS

For the Fourth Quarter Ended 31 March 2015

Singapore contributed 73% (Q4 FY2014: 72%) and 82% (Q4 FY 2014: 84%) to Group Enterprise's operating revenue and EBITDA respectively.

Singtel relinquished its role as OpenNet's key sub-contractor in respect of the fibre rollout and maintenance, following the integration of OpenNet by NetLink Trust⁶ on 1 October 2014. Accordingly, Group Enterprise's results have been prepared to reflect the cessation of fibre rollout and maintenance business and related revenue share.

Operating revenue grew 1.3%. In constant currency terms, operating revenue would have increased 3.1%. Singapore Enterprise revenue grew 2.6% driven by higher Data and Internet revenue, Equipment sales and miscellaneous project management services. In Australian Dollar terms, Australia Enterprise revenue grew 4.4% with stronger ICT and mobile revenue growth.

Adjusted for the fibre rollout business, operating expenses grew 2.6%. Staff costs increased with higher average headcount on increased IT hirings to deliver revenue growth as well as conversions of certain contract staff to permanent staff. Selling and administrative expenses were higher on accrued professional fees for the acquisition of Trustwave Holdings, Inc of approximately S\$10 million. The increases were partly offset by lower cost of sales and traffic expenses.

Other income increased due mainly to foreign exchange gains recognised on revaluation of monetary trade balances.

Consequently, EBITDA was stable while EBIT grew 2.4% on lower depreciation charges. In constant currency terms, EBITDA and EBIT grew 2.1% and 3.3% respectively.

In April 2015, Group Enterprise entered into a conditional agreement to acquire Trustwave Holdings, Inc., the largest global independent managed security services provider in North America with presence in Europe and Asia Pacific. The aggregate consideration⁷ for the acquisition is approximately US\$810 million, excluding net debt, and subject to working capital adjustments at closing. The acquisition will expand Group Enterprise's existing portfolio of cloud based solutions and entrench its leadership position in the managed services market. To further enhance its cyber security capabilities, a 'Cyber Security Cadet Scholarship Programme' with Singapore Polytechnic was also launched to nurture young talents in this space.

In the area of enterprise cloud, Group Enterprise launched Video-as-a-Service – a cloud-based multi-party video conferencing service that allows enterprises to be connected cost-effectively from anywhere via the Internet, across multiple platforms and devices. In Singapore, G-Cloud continued to gain traction with more than 70 government agencies on the service. In Australia, Optus Business was selected to be part of the Australian Federal Government's Cloud Panel to provide Infrastructure-as-a-Service and Software-as-a-Service. Optus Business also announced it will become an Intercloud partner, leveraging Cisco's Intercloud technologies to provide enterprises with the ability to manage and access their workloads across multiple private and public clouds in a diverse environment.

⁶ At the Group level, Singtel equity accounted for its interest in NetLink Trust, an independently managed trust.

⁷ For 98% of Trustwave share capital.

SECTION 3 : GROUP ENTERPRISE

For the Year Ended 31 March 2015

Excluding the fibre rollout business, operating revenue for the year grew 2.1% while EBITDA and EBIT each declined 2.1%. In constant currency terms, operating revenue grew 3.3% while EBITDA and EBIT declined 1.4% and 1.6% respectively.

The results reflected the keen competition in core carriage business, price declines with the Next Gen NBN environment in Singapore as well as pricing reduction with contract transition for a large government infrastructure and ICT project.

Excluding the fibre rollout business, operating revenue was up 2.6% at S\$1.17 billion mainly driven by growth in Data and Internet, Equipment sales and miscellaneous project management services.

Managed Services revenue grew 2.8% with the continued on-boarding of Singapore government's agencies to the G-Cloud platform, growth in managed security services and higher project implementation and maintenance revenue, partly offset by price reductions on contract transition for a large government infrastructure and ICT project.

Business Solutions revenue declined by 4.0% from lower project related equipment sales.

NCS continued to maintain a healthy ICT services order book of S\$2.1 billion as at 31 March 2015.

In the quarter, Singtel set the foundation for new growth in cybersecurity, cloud technology and smart nation initiatives. It launched cybersecurity cadet talent program with the Singapore Polytechnic and also launched SURF@NCS - a living lab for co-creation of Solutions for Urbanised Future (SURF). It also continued to gain momentum in developing a vibrant partner eco-system for 'Smart and Safe Cities'. To date, more than 15 partners have committed to collaborate in areas such as fog computing, Internet-of-Things (IOT) and critical infrastructure management.

SECTION 3 : GROUP ENTERPRISE

Data and Internet revenue grew 3.3% from increased demand for circuits and bandwidth. The increase was partially offset by lower satellite revenue on customer churn as well as continued migration of legacy satellite products to IP-based satellite solutions.

Mobile Communications revenue grew 1.0%. The growth in mobile customer base and increased mix of customers on tiered data and roaming plans were offset by lower voice, SMS and VAS revenues.

Miscellaneous revenue grew 44% mainly from higher mobile equipment sales, as well as higher miscellaneous project management services.

ICT and Managed Services revenue grew strongly by 11% from sale of hardware and continued services growth from key enterprise and government customers.

Data and IP revenue was stable with new customer revenue turn-on being offset by continued price competition, migration of legacy data services to IP network solutions and customer-led rationalisation of services.

Voice revenue declined 3.8%, slower than industry's decline of 7%⁸. The decrease was due to price erosions and declines in switched voice as businesses migrated to lower cost IP-based voice solutions.

Mobile revenue increased 7.4%. The increase was mainly from stronger equipment sales, a higher mobile customer base and ARPU growth partially offset by lower roaming.

SECTION 3 : GROUP ENTERPRISE

Optus Business clinched a 5-year contract to build and operate Wi-Fi networks in Westfield Shopping Centres, Australia's largest shopping centre chain. Through this partnership Optus Business will expand its foothold in real time, dynamic marketing, thus providing Australians with a more personalised shopping experience.

Optus Business's Managed Network services contract with the Australian Taxation Office ("**ATO**") has also been renewed for three years. Under this contract extension, Optus will provide voice and data communications, contact centre, and videoconferencing services, as well as project services to support ATO's digital innovation programs.

SECTION 4 : GROUP DIGITAL LIFE

GROUP DIGITAL LIFE**MANAGEMENT DISCUSSION AND ANALYSIS**

Group Digital Life (“GDL”) focuses on using the latest Internet technologies and assets of the Group’s operating companies to develop new revenue and growth engines by entering adjacent businesses where it has a competitive advantage. It included digital marketing, e-commerce, data analytics, mobile banking payment, concierge and hyper-local services.

With effect from 1 April 2015, following a sharpening of its digital business strategy, GDL focuses on three key businesses in digital life – digital marketing (Amobee), regional premium video (HOOQ) and advanced analytics and intelligence capabilities (DataSpark), in addition to strengthening its role as Singtel’s digital innovation engine through Innov8.

SECTION 4 : GROUP DIGITAL LIFE

GROUP DIGITAL LIFE OPERATING HIGHLIGHTS

For The Fourth Quarter Ended 31 March 2015

Following the acquisitions of Kontera in July 2014 and Adconion in August 2014, operating revenue rose 180% to S\$110 million. Key customer wins in the quarter included L'Oréal and Ikea.

Negative EBITDA amounted to S\$72 million (Q4 FY2014: S\$56 million) and negative EBIT was S\$84 million (Q4 FY2014: S\$67 million), reflecting investments in digital businesses and initiatives. The increase in staff costs was due to higher average headcount on new acquisitions as well as accruals of staff incentive payments at year end.

Amobee group (including Adconion and Kontera) recorded operating revenue of S\$98 million in the quarter. Negative EBITDA was S\$32 million and negative EBIT was S\$33 million in the quarter with the amortisation of the acquired intangibles.

Amobee continues to leverage on 'real moment marketing', using real-time brand intelligence and media activation to execute advertising campaigns for leading brands in major events such as Oscar 2015, Super Bowl and March Madness.

In February 2015, Amobee won awards for best advertising solution, most innovative use of mobile advertising and best in-app advertising.

HOOQ, a partnership between Singtel, Sony Pictures Entertainment and Warner Bros. Entertainment offering regional over-the-top (OTT) video service, was launched in the Philippines on 12 March 2015. HOOQ was launched in Thailand in May 2015, to be followed by India.

For The Year Ended 31 March 2015

Operating revenue for the year more than doubled to S\$343 million (FY2014: S\$144 million). Negative EBITDA and EBIT were at S\$216 million (FY2014: S\$170 million) and S\$289 million (FY2014: S\$218 million) respectively.

SECTION 4 : GROUP DIGITAL LIFE**SEQUENTIAL QUARTERLY RESULTS**

Results for the current quarter compared to the preceding quarter ended 31 December 2014 were as follows:

	Quarter		QOQ Chge %
	31 Mar 2015 S\$ m	31 Dec 2014 S\$ m	
Operating revenue (before intercompany eliminations)	126	118	7.5
Intercompany eliminations	(16)	(12)	29.0
Operating revenue	110	105	4.9
EBITDA	(72)	(49)	45.5
EBIT	(84)	(70)	20.9

Compared to a quarter ago, EBITDA weakened mainly due to higher staff costs and selling expenses.

SECTION 5: ASSOCIATES / JOINT VENTURES

**FINANCIAL HIGHLIGHTS
FOR THE FOURTH QUARTER ENDED 31 MARCH 2015**

- The regional currencies generally strengthened this quarter, positively impacting the Group's earnings.
- Despite significant fair value losses, associates' pre-tax and post-tax contributions grew strongly by 14% and 23% respectively on strong earnings growth at Airtel India, Telkomsel and Globe.
- The Group's combined mobile customer base⁹ was up 12 million or 2.2% in the quarter to 555 million.

FOR THE YEAR ENDED 31 MARCH 2015

- Associates' pre-tax and post-tax contributions grew by 17% and 20% respectively.
- If the regional currencies had remained stable from a year ago, the pre-tax and post-tax contributions from the associates would have increased by 21% and 24% respectively.

⁹ Combined mobile customer base here refers to the total number of mobile customers in Singtel, Optus and the regional mobile associates.

“**” denotes less than +/- S\$0.5 million and “@” denotes more than +/-500%.

The associates' pre-tax and post-tax contributions were up 14% and 23% respectively on strong earnings growth at Airtel India, Telkomsel and Globe. Excluding significant fair value losses mainly at Airtel Africa, pre-tax contributions would be up 26%.

Telkomsel registered double-digit growth in revenue and higher EBITDA partly offset by higher network charges from network expansion. Airtel recorded increases in both consolidated revenue and EBITDA. The strong results in India were partly offset by weaker operational performance at Airtel Africa compounded by significant fair value losses as the African currencies depreciated sharply against the US Dollar. Both AIS and Globe reported robust revenue growth and increased EBITDA with continued growth in mobile data services.

On a post-tax basis, the associates contributed 48% to the Group's underlying net profit, up 8 percentage points from the same quarter last year.

For the full year, the Group's share of associates' pre-tax and post-tax profits grew 17% and 20% respectively. If the regional currencies had remained stable from last financial year, the pre-tax and post-tax contributions from the associates would have increased by 21% and 24% respectively.

PT Telekomunikasi Selular (“Telkomsel”)

Telkomsel is the leading operator of cellular telecommunications services in Indonesia with over 90,500 radio base stations (of which 48% are 3G/4G base transceiver stations “BTS”) providing nationwide coverage. Telkomsel continued to expand its network with a focus to grow data and digital services. In the quarter, Telkomsel added approximately 5,100 radio base stations, of which 89% were 3G/4G.

Operating revenue was up 12% year-on-year driven by robust growth in data and digital services, as well as higher voice and SMS revenue. Data and digital services grew a strong 37% on higher data usage and continued strong take-up of smartphones. Voice and SMS revenue recorded healthy growth of 8% and 5% respectively amid stable market conditions.

EBITDA was up 9% despite higher operation and maintenance costs from the accelerated network deployment. With flat depreciation charges, the Group's share of Telkomsel's pre-tax operating profit rose 13% in Indonesian Rupiah terms.

SECTION 5 : ASSOCIATES/ JOINT VENTURES

With a stable Indonesian Rupiah against the Singapore Dollar this quarter, the Group's overall share of Telkomsel's pre-tax profit grew 11%.

On a post-tax basis, Telkomsel's profit contribution for the quarter increased 11% to S\$181 million which constituted 19% (Q4 FY2014: 18%) of the Group's underlying net profit.

Compared to the preceding quarter, operating revenue declined 4% due to seasonally low usage in both voice and SMS. Operating expenses grew 7% on higher operation and maintenance costs. As a result, EBITDA declined 12%.

Telkomsel gained 0.9 million mobile customers in the quarter, compared to 1.2 million in the preceding quarter. The total mobile customer base grew 8.8 million or 6.6% from a year ago to 141 million, including 64 million of data customers at end of March 2015.

Bharti Telecom Group ("Airtel")

Airtel is listed on the Indian Stock Exchanges - National Stock Exchange and the Bombay Stock Exchange. It is a leading integrated telecommunications company with operations in 20 countries across Asia and Africa, offering telecom services under wireless and fixed line technology, national and international long distance connectivity, digital TV and IPTV service and complete integrated telecom solutions to its enterprise customers. Airtel also owns tower infrastructure pertaining to telecom operations through its subsidiary and joint venture companies.

India, Bangladesh and Sri Lanka ("India and South Asia")

Airtel continued its strong operating momentum in India this quarter. Operating revenue grew 12% with strong mobile data increase driven by higher data usage and robust customer growth. Total data traffic rose 82% while data ARPU increased 32%. Year-on-year, total minutes on its networks increased by 5% while voice realisation per minute was down 3% partly due to a regulatory change in interconnect usage charges effective 1 March 2015.

EBITDA was up by a robust 23% and margin expanded on sustained revenue growth and improved operational efficiency.

'South Asia' comprised operations in Sri Lanka and Bangladesh. Airtel recorded lower operating revenue and a negative EBITDA in South Asia, impacted by lower minutes of usage.

The Group's share of pre-tax operating profit (before finance costs and fair value adjustments) from India and South Asia grew steeply by 35% in Indian Rupee terms. With a 5% appreciation of the Indian Rupee against the Singapore Dollar, pre-tax operating profit contribution increased 43% to S\$287 million.

Compared to the preceding quarter, both Airtel's revenue and EBITDA from its India and South Asia operations grew 2% and 7% respectively.

Airtel added 8.8 million mobile customers in India this quarter, compared to 5.5 million added in the preceding quarter. As at 31 March 2015, Airtel had 226 million mobile customers in India, an increase of 20 million or 10% from a year ago. Reflecting the success of its customer acquisition and retention strategy, the average mobile monthly churn in India remained low at 2.5%.

SECTION 5 : ASSOCIATES/ JOINT VENTURES

In March 2015, Airtel successfully auctioned for 111.6 MHz of prime spectrum across 900 MHz, 1800 MHz and 2100 MHz bands in 17 service areas for a total consideration of INR 291 billion (~US\$4.6 billion). Of this, INR 176 billion (~US\$2.8 billion) is the cost of renewing the existing spectrum while the balance of INR 115 billion (~US\$1.8 billion) is the cost of acquiring new spectrum. The acquired spectrum will enable Airtel to provide world class voice and data services to its customers across 2G, 3G and 4G technologies.

In the quarter, Airtel completed the sale of 55 million shares in its subsidiary, Bharti Infratel Limited (“**Infratel**”) for a total consideration of INR 19.3 billion (~US\$300 million). Consequently, Airtel’s shareholding in Infratel was reduced from 74.9% to 71.9%.

Africa

As at 31 March 2015, ‘Airtel Money’ service was available in all the 17 African countries that Airtel operated in, while 3G mobile services had been launched across 16 African countries.

Africa’s operating revenue grew 3% in constant currency terms driven by growth in mobile data and ‘Airtel Money’ services. Mobile data revenue grew 61% in constant currency terms on higher usage and increased data penetration. However, the significant depreciation of the African currencies had negatively impacted Africa’s reported results in US Dollar terms. Consequently, operating revenue declined 13% and EBITDA fell 28%.

The Group’s share of Airtel Africa’s pre-tax operating profit (before finance costs and fair value adjustments) declined 23% to S\$27 million in the quarter.

Compared to the preceding quarter, Airtel Africa’s revenue and EBITDA declined 9% and 14% respectively partly due to the weaker African currencies.

Airtel Africa added 1.7 million mobile customers in the quarter, compared to 3.2 million added in the preceding quarter. As at 31 March 2015, the total customer base stood at 76 million, an increase of 6.8 million or 9.8% from a year ago.

Overall

In Singapore Dollar terms, with a stronger Indian Rupee, the Group’s share of overall ordinary pre-tax profit from Airtel grew 4.2% to S\$177 million after including the share of net finance costs of S\$61 million (Q4 FY2014: S\$56 million) and fair value losses of S\$76 million (Q4 FY2014: S\$10 million) mainly from Africa as a result of translation of its liabilities from local African currencies to US Dollar.

The share of Airtel’s exceptional post-tax losses of S\$11 million this quarter included staff restructuring costs, adjustments arising from re-assessment of levies for earlier periods and a gain on divestment of telecom towers in one African country.

Year-on-year, post-tax profit contribution from Airtel grew 41% to S\$90 million on lower taxes in Africa due to higher operating losses and lower withholding taxes.

Overall, Airtel contributed 9% (Q4 FY2014: 7%) to the Group’s underlying net profit.

Including mobile customers across operations in 20 countries covering India, Bangladesh, Sri Lanka and across Africa, Airtel’s total mobile customer base across all geographies grew 27 million or 9.6% from a year ago to 311 million as at 31 March 2015.

SECTION 5 : ASSOCIATES/ JOINT VENTURES

Advanced Info Service (“AIS”)

AIS is the largest mobile communications operator in Thailand and is listed on the Stock Exchange of Thailand.

Service revenue (excluding interconnect revenue) grew 5% driven by growing demand for mobile data and higher smartphone penetration. EBITDA grew 10% largely attributed to regulatory costs savings from 3G migration. Including higher depreciation and amortisation charges from continued investments in 3G network, AIS pre-tax profit increased 3.1% in Thai Baht terms. As the Thai Baht appreciated 7% against the Singapore Dollar this quarter, the Group's share of AIS' pre-tax profit rose 10% to S\$119 million.

Post-tax contribution rose 12% to S\$96 million and constituted 10% (Q4 FY2014: 9%) of the Group's underlying net profit.

Against the preceding quarter, AIS' service revenue increased 1% while EBITDA grew 2% on lower marketing expenses due to seasonality.

As at 31 March 2015, AIS' total mobile customer base was 42 million, 2.4 million lower than a quarter ago due to an adjustment by AIS to remove customers who have been inactive for more than 90 days. 3G customers represented 93% of its total mobile customer base as at end of the quarter.

Globe Telecom, Inc (“Globe”)

Globe is the second largest mobile communications service provider in the Philippines and is listed on the Philippine Stock Exchange.

Globe's service revenue grew by 13% driven by a higher mobile customer base and strong adoption of data services. Operating expenses increased 5% on implementation of cost management initiatives. Consequently, Globe's EBITDA rose 25% and with higher depreciation charges, its pre-tax profit contribution rose 26% in Philippine Peso terms.

With the Philippine Peso appreciating by 7%, Globe's pre-tax profit contribution increased 36% year-on-year to S\$87 million. On a post-tax basis, Globe contributed S\$61 million or 6% (Q4 FY2014: 5%) to the Group's underlying net profit.

Against the preceding quarter, Globe's service revenue was stable while EBITDA rose 16% from lower marketing expenses, staff costs and provisions.

Globe added 2.1 million mobile customers in the quarter, compared to 1.2 million in the preceding quarter. As at 31 March 2015, its mobile customer base expanded to 46 million, up 5.4 million or 13% from a year ago.

SECTION 5 : ASSOCIATES/ JOINT VENTURES

NetLink Trust

The Group's share of post-tax profits from NetLink Trust was S\$10 million for the quarter compared to S\$1 million in the same quarter a year ago.

The higher share of profits of NetLink Trust reflected the enlarged NetLink Trust following its acquisition of 100% equity interest in OpenNet in November 2013. Singtel relinquished its role as the key sub-contractor for the fibre rollout and maintenance with effect from 1 October 2014 (see page 33).

PROFORMA INFORMATION

The following tables show unaudited proforma proportionate financial information which has been derived from the Income Statements of the Group prepared on a statutory basis.

Proportionate presentation is not required by Singapore GAAP and is not intended to replace the financial statements prepared in accordance with Singapore GAAP. However, since the associates are not consolidated on a line by line basis, proportionate information is provided as supplemental data to facilitate a better appreciation of the relative contribution from the Group's operations in Australia, Singapore and other regional markets.

Notes:

- (1) The cash dividends received from overseas associates as stated here are before related tax payments.
- (2) Telkomsel declared a full year dividend of 90% on net profit for its 2014 financial year (FY 2013: 90%). The Group's share of the dividend is approximately S\$628 million, of which S\$71 million had been received in the current quarter and approximately S\$557 million is expected to be received in the June 2015 quarter.
- (3) AIS declared a full year dividend of 99% on net profit for its 2014 financial year (FY 2013: 100%). Dividends will be paid twice a year, with an interim dividend distributed from the first half operating results and final dividend distributed from the second half operating results. On 24 March 2015, AIS declared a final dividend of THB 5.96 per share for its 2014 financial year. The Group received its share of final dividend of S\$165 million in April 2015.
- (4) Effective from the second half of its 2014 financial year, Globe will pay dividends on a quarterly basis as compared to semi-annually in March and September of each year. Globe's dividend policy is to pay ordinary dividends of 75% to 90% of prior year's core net income. Globe declared a full year dividend of 76% of core net income for its 2014 financial year (FY 2013: 86%). The Group received its share of the first quarterly dividend for Globe's 2014 financial year in March 2015. Globe will pay its next quarterly dividend of Peso 20.75 per common share in June 2015. The Group's share of this dividend is Peso 1.30 billion (approximately S\$40 million).
- (5) Airtel does not have a fixed dividend policy. The Group received its share of the final dividend for 2014 financial year and an interim dividend for 2015 financial year from its direct stake of 15.01% in September 2014. Airtel declared a final dividend of Rs 2.22 per share for its 2015 financial year, subject to shareholders' approval. The Group's share of this dividend is Rs 1.33 billion (approximately S\$29 million) which will be received in September 2015 quarter.
- (6) Southern Cross Cables Holdings Limited and Pacific Carriage Holdings Limited (PCHL), part of the Southern Cross consortium, do not have fixed dividend policies.

SECTION 5 : ASSOCIATES/ JOINT VENTURES

The total dividends received from the associates for the quarter increased 43% to S\$122 million on receipt of Telkomsel's interim dividend partly offset by lower dividend from Globe.

BUSINESS SEGMENT INFORMATION FOR FY 2014

The costs of shared and common infrastructure are allocated to the business segments using established methodologies. As a result of higher utilisation of shared infrastructure by mobile in Australia, certain costs had been reallocated between Consumer and Enterprise business segments with effect from 1 April 2014. For comparative purpose, the EBITDA and EBIT of the business segments for the prior periods had been restated to reflect the changes in cost allocation and other adjustments.

The Group's overall EBITDA and EBIT for the respective periods remained unchanged. The business segments for FY2014 are restated as follows:

CURRENCY RISK MANAGEMENT & OTHER MATTERS

The Group maintains a policy of hedging all known foreign currency exposures related to commercial commitments or transactions. These commitments or transactions include payment of operating expenses, traffic settlement, capital expenditure, interest and debt. Translation risks of foreign currency EBITDA and net investments are not hedged unless specifically approved by the Board.

Financial instruments such as foreign currency forward contracts and cross currency swaps are used only to hedge underlying commercial exposures and are not held or sold for speculative purposes. All hedging transactions are reviewed regularly.

To minimise the adverse impact of foreign exchange movements on the Group's financial position, the Group determines the appropriate debt currency mix by matching it to the currency mix of the Group's underlying cash flows.

Debt Currency Mix	As at		
	31 Mar 2015	31 Dec 2014	31 Mar 2014
SGD	66%	66%	67%
AUD	34%	34%	33%
Total	100%	100%	100%

The debt currency mix is constantly being reviewed and aligned with the Group's cash flows.
