SUCCESSFUL PRELIMINARY p-GaN RESULTS IN GREEN LEDs – BRR WEBCAST

BLUGLASS LIMITED (ASX: BLG) has released a webcast with the following details:

BluGlass update on RPCVD p-GaN for green LEDs

Speaker: Mr Giles Bourne

Live date: Thursday 21 May 2015 10:30am AEST

Access this webcast at <http://www.brrmedia.com/event/138658>

Access other BLG webcasts at www.brrmedia.com/asx/BLG

About BluGlass:

BluGlass Limited (winner of the 2013 Australian Cleantech Competition) is an Australian green technology company formed to commercialise a breakthrough in the Semiconductor Industry. BluGlass has invented a new process using Remote Plasma Chemical Vapour Deposition (RPCVD) to grow semiconductor materials such as gallium nitride (GaN) and indium gallium nitride (InGaN), crucial to the production of high efficiency devices such as next generation lighting technology Light Emitting Diodes (LEDs) with advanced low cost potential.

The RPCVD technology, because of its low temperature and highly flexible nature, offers many potential benefits over existing technologies including higher efficiency, lower cost and greater scalability.
