## Month in Review

Donaco International (+20.2%) and Beijing Capital International Airport (+12.2%) were the largest contributors to performance over the month. Beijing Capital International Airport advanced on better than expected traffic growth in recent months. This was driven by international flights, which collect significantly higher tariffs compared to domestic. Management revised upwards their guidance for international traffic growth for 2015 to high single digits.

The company's currency positioning also contributed positively to performance as the Australian Dollar continued its decline against the US Dollar (-3.0%).

Additionally, Turquoise Hill Resources continued its strong start to the year (+41.9% YTD) after announcing the signing of the 'Oyu Tolgoi Underground Mine Development and Financing Plan' with Rio Tinto and the Government of Mongolia. This agreement addresses key outstanding shareholder issues which have postponed the development of the underground mine since 2013.

51Job (-13.8%) and Mindray Medical (-12.7%) detracted from performance over the month after disappointing Q115 results releases. Both businesses were impacted by a slowdown in activity in mainland China. Mindray Medical in particular has been impacted by the corruption crackdown which has impacted procurement activities within the healthcare sector.

There were no substantial changes to the portfolio over the month.

**PORTFOLIO COMPOSITION**

### Company Profile

PM CAPITAL Asian Opportunities Fund Limited (PAF or the Company) provides investors with an opportunity to invest in a concentrated portfolio of predominantly undervalued listed Asian equities and other investment securities in the Asian region (ex-Japan)<sup>1</sup>. The aim is to provide investors with long term capital growth and an opportunity to invest in an actively managed portfolio that does not replicate the standard industry benchmarks.

### Who manages the Company's portfolio?

The Chief Investment Officer of PM CAPITAL, Paul Moore, who has over 29 years experience in successfully managing global investment funds. The portfolio manager, Kevin Bertoli, who has over 9 years industry experience. Paul and Kevin are supported by a team of investment analysts.

### Manager Profile

PM CAPITAL Limited, founded in 1998, is a Sydney-based specialist equity and income fund manager that manages over \$2.0 billion on behalf of private clients, institutional investors and the clients of financial advisers. PM CAPITAL provides its clients with an opportunity to invest alongside its investment team, investing in businesses that it believes are currently trading below their long-term intrinsic value, but will return to full value over time.

PAF's investment mandate is based on the guidelines of the unlisted PM CAPITAL Asian Companies Fund (ACF) and will generally invest in the same investments as the ACF once the portfolio has been established (although there may be differences in portfolio positioning from time to time). PAF's investment objective is to provide long-term capital growth over a seven-year plus investment horizon through investment in a concentrated portfolio of Asian (ex-Japan)<sup>1</sup> equities and other investment securities.

### Investment Philosophy

PAF's investment portfolio is managed by PM CAPITAL, which uses the same investment philosophy and process they utilise for their unlisted retail funds. This philosophy is a belief that:

***"the best way to preserve and enhance your wealth is to buy a good business at a good price."***

This investment philosophy has been successfully executed by PM CAPITAL's Chief Investment Officer, Paul Moore, for 29 years, and has been applied at PM CAPITAL since its inception in 1998. The philosophy involves taking a business owner's approach to investing by looking to understand how the business works, management's philosophy in managing the business and those parts of the business that determine its intrinsic value.

PM CAPITAL then asks, "What would a rational business owner pay for the business?" Because in the end, the Manager believes that if a company's intrinsic valuation is not recognised by the stock market, it will eventually be recognised by a business owner.
