## **BACKGROUND INFORMATION ON BLIGH RESOURCES LIMITED**

Listed in 2011, Bligh Resources Limited (“Bligh”) (the “Company”)(ASX: BGH) transformed itself from a manganese and base metal greenfield explorer into an advanced gold explorer/developer.

Bligh, throughout 2012 to 2014 has successfully purchased 97.5% interest in SR Mining Pty Ltd (“SR Mining”), which owns 100% of the advanced Bundarra Gold Project near the gold township of Leonora, Western Australia. The remaining 2.5% stake in SR Mining is owned by FSS Incentives Pty Ltd. The Bundarra Gold Project currently has reported JORC (2004) Resources of 426,000 ounces<sup>2</sup> (Inferred 182,000oz, Indicated 218,000oz, Measured 26,000oz) across three proven deposits and a new exploration zone (Celtic, Wonder North, Wonder West and Bluebush); all deposits are open in at least one direction.

To date, more than 3,000 holes were drilled with accumulated drill depth of more than 150,000 metres for the Bundarra Gold Project. In 2013, Bligh engaged CSA Global to have completed a Scoping Study for a toll milling solution and returned very attractive cashflow forecasts. The Company shall attempt to upgrade resources through further expansive drilling programs throughout 2015

Bligh also carries an acquisition strategy, that is, to secure projects that are near to established infrastructure so possible future development and resource recovery are not hampered by uneconomic infrastructure investment. Bligh continues to assess the acquisition of additional brown-field gold projects.
