San Diego, California and Sydney, Australia (Friday, 10 July 2015 AEST) – REVA Medical, Inc. (ASX: RVA) (“REVA” or the “Company”) announces that 128,000 shares of common stock (equivalent to 1,280,000 CDIs) have been issued upon the exercise of employee and consultant stock options. The options had been issued under the Company’s 2001 Stock Option/Stock Issuance Plan. Details of the exercises are provided in the attached Appendix 3B.

Following these exercises, there are outstanding options to purchase a total of 4,440,583 shares of common stock (equivalent to 44,405,830 CDIs) and 984,200 restricted stock units subject to vesting under the Company’s equity incentive plans.

About REVA

REVA is a development stage medical device company located in San Diego, California, USA, that is focused on the development, testing, and eventual commercialization of its proprietary bioresorbable stents, which are called “scaffolds” because of their temporary nature. The Company’s scaffolds are currently in clinical studies and have been developed as an alternative to metal stents, which are small tube-like devices permanently implanted into an artery to treat coronary artery disease. Scaffolds provide restoration of blood flow, support the artery through the healing process, then disappear (or “resorb”) from the body over a period of time. This resorption allows the return of natural movement and function of the artery, a result not attainable with permanent metal stents. The Company’s initial intended commercial product, the *Fantom*TM scaffold, has been designed to offer an ideal balance of thinness and strength, and distinct ease-of-use features including complete scaffold visibility under x-ray, expansion with one continuous inflation, and no procedural time limitations. REVA will require successful clinical trial results and regulatory approval before it can commercialize *Fantom* or any other products.
