ASX ANNOUNCEMENT

29th July, 2015

\$500,000 German Lake Project

Phoslock Water Solutions Ltd (PHK) is pleased to announce that a contract to apply Phoslock to a recreational lake in Southern Germany has been awarded to PWS' licensee, where Phoslock is sold under the registered trade name "Bentophos".

The project, which will be undertaken in the upcoming Northern Hemisphere winter, is valued at around A\$500,000 and will use some 94 tonnes of product.

The lake has a surface area of 24 ha and is one of Southern Germany's most popular recreational lakes. In recent years, the lake has suffered from elevated levels of phosphorus. The application will be undertaken in order to lower these levels and improve the quality of water for recreational users. This project will be the Company's 53rd application to a European lake.

In addition to this application, Bentophos GmbH expects to undertake several other projects in Germany during the peak application season between autumn 2015 and spring 2016.

ABOUT PHOSLOCK WATER SOLUTIONS LIMITED (PHK)

PHK produces *Phoslock*, a patented technology which was developed by the Australian government scientific body, Commonwealth Scientific and Industrial Research Organisation (“CSIRO”). PHK has lodged a subsequent patent application to protect the core *Phoslock* technology which is in an advanced stage of being granted in some 50 countries, with the intention of extending the core *Phoslock* technology to the year 2033.

PHK is headquartered in Sydney, Australia and has offices in Brisbane, Sichuan, China and European Operations (covering Europe, Central & South America) near Bremen, northern Germany. PHK is represented by licensees and agents in ten other countries including SePRO Corporation in the United States.

Phoslock is a certified NSF/ANSI Standard 60 product - North American Drinking Water (see websites ansi.org and scc.ca).

Phoslock Water Solutions is listed on the Australian Stock Exchange (ASX Code: PHK).

For more information about Phoslock Water Solutions and *Phoslock* please visit our websites: www.phoslock.com.au or www.phoslock.eu (Spanish, Italian, Dutch and German) or www.phoslock.com.br (Portuguese) or www.phoslock.com.cn (Chinese)

ABOUT PHOSLOCK – the Product

Phoslock is a unique water treatment product that binds phosphorus from a water body and provides a protective permeable layer to sediments preventing the re-release of phosphorus. Retention of phosphorus reduces the level of algae by depriving it of nutrients. This in turn improves water quality both for human use and aquatic life as well as preventing and controlling Harmful Algal Blooms (HAB).

Phoslock is primarily used as an in-water solution for lakes, drinking water reservoirs and other high value recreational water bodies. It is also used as a preventative product to absorb phosphorus before it is transported into water bodies by being applied in storm water basins and inflow channels, rivers and canals.

Phoslock is approved for use in North American Drinking Water Reservoirs via NSF/ANSI Standard 60 Certification. This certifies that *Phoslock* is safe for use in drinking water.

Phoslock has been used on a number of high profile water bodies in Europe/UK, North America and Australia.

Over 30 peer reviewed technical papers, authored by leading academics, have been published in leading scientific journals on *Phoslock*. For access: www.phoslock.com.au
