

4 AUGUST 2015

ASX: FOY

EXECUTION OF NEW FEEDSTOCK SUPPLY CONTRACT

Foyson Resources Limited (**FOY**) is pleased to announce that Integrated Green Energy Limited (**IGE**) has advised FOY it has executed a new feedstock supply agreement (**Feedstock Agreement**), replacing the feedstock supply agreements described in FOY's announcement of 10 April 2015. The Feedstock Agreement gives significantly more certainty to the arrangements for securing sufficient feedstock to operate IGE's commercial waste plastic to fuel plant in Berkeley Vale, New South Wales.

The contracted term is for up to 10 years with an initial 5 year period and an optional 5 year extension. The Feedstock Agreement start date is 1 October 2015 and secures supply up to specified maximum quantities. The parties will review the Agreement before the end of its initial 5 year term regarding the further 5 year extension.

IGE has also secured fixed yearly prices for its waste plastic as low as \$160 per tonne (plus GST) under the Feedstock Agreement.

The shareholders of FOY approved the proposed acquisition of IGE's business by FOY at its Extraordinary General Meeting on 30 July 2015. The Feedstock Agreement will be assigned to FOY on completion of that acquisition.
