**FIRST INTERNATIONAL COLLABORATION
AGREEMENT FOR ENVIROSUITE**

Pacific Environment Limited (“PEH”) is excited to announce a new Collaboration Agreement with the world’s leading Odour Group. Odournet (“ON”) is an international consulting and technology group in odour, air quality and acoustics, and is the global leader in the design and development of odour measurement equipment and proficiency testing schemes.

ON has operations and offices in eight countries including The Netherlands, France, Spain, Germany, UK, Brazil, Mexico and India.

The agreement will initially focus on specific collaboration between the two companies on opportunities such as a current shared proposal to provide odour monitoring equipment and EnviroSuite software platform with online modelling and prognostic capabilities for a major wastewater treatment development in Oman. The proposal has been requested by one of the three multinational companies that have entered a bid for this tender. In this project the robust modelling and data analysis expertise incorporated in EnviroSuite is combined with the deep odour monitoring expertise of Odournet Group.

Mr Robin Ormerod, Founder, Director and Head of Science and Innovation said,

“This is an exciting and tangible initial step in the global distribution of EnviroSuite. Odournet is an internationally respected and dominant industry participant and this initial project demonstrates the capability of EnviroSuite in the export market.”

The interest shown by internationally respected companies, such as Odournet, in a number of countries provides significant validation of the industry leading nature of our technology and the scope for global distribution.

About EnviroSuite

EnviroSuite is a unique platform of cloud-based software applications addressing a range of environmental management and compliance issues across the resources, ports, hospitals, heavy industry and government sectors. EnviroSuite was borne from seven years of research and development work and provides a range of historical, real-time and predictive capabilities that enhance productivity and provide operational efficiencies while focusing on environmental compliance and performance imperatives.

EnviroSuite 2.0 is the commercialised version of EnviroSuite 1.0. It incorporates a modular, highly scalable design that is hosted in the Amazon Web Services cloud. EnviroSuite 1.0 has been operating commercially in the domestic market since 2011 with over 20 blue-chip clients.
