Directors

The following persons were directors of Affinity Education Group Limited during the whole of the financial half-year and up to the date of this report, unless otherwise stated:

Stuart Bruce James - Chairman Justin Michael Laboo Stephanie Jane Daveson Jeffrey Ian Forbes Gabriel Anna Giufre

Principal activities

The principal activity of the Group is that of a provider of education and care to children aged 6 weeks to 12 years through its owned and managed child care centres in Australia.

Dividends

There were no dividends paid, recommended or declared during the current or previous financial half-year.

Review of operations

The Group delivered a significant increase in underlying earnings before interest, income tax, depreciation and amortisation ("Underlying EBITDA") of \$8.6 million up 76% on the prior year (2014: \$4.9 million). After acquisition expenses, which the Group expenses in accordance with IFRS, the group made an EBITDA of \$2.0 million which again was a significant improvement on last year (2014: \$2.9 million loss).

After providing for income tax, the Group saw a loss of \$2.1 million, again significantly up on the prior year (30 June 2014: loss of \$5.0 million).

The expensing of acquisition costs in accordance with IFRS of \$6.6 million (2014: \$7.8 million) comprise agent commissions (calculated as a percentage of purchase price), stamp duty and due diligence related expenses. This result was an improvement in the target set by the Group for FY15 with the cost representing 7.9% of acquisition value, a significant reduction of expense as a percentage of purchase price, relative to the prior year. This result demonstrates the group's intention to improve its financial performance whilst still maintaining a strong appetite for continued growth.

On 12 March 2015, the Company announced an 8 for 21 pro-rata accelerated renounceable entitlement offer at an offer price of \$1.18 per share. The institutional and retail offers were completed on 24 March 2015 and 14 April 2015 respectively raising \$75.3 million. The entitlement offer was conducted to enable the purchase of a portfolio of child care and early education centres and recapitalise the Group's balance sheet to enable continued future growth. For the first time the Group provided a growth target of between 20%-25% per annum.

Occupancy at the Group's child care centres has improved through the half year period as a result of industry seasonality and centre specific occupancy improvement initiatives. Occupancy continues to improve into the second half of the year providing an expectation of a much stronger second half performance for 2015. The Group has also seen improvement in average fees collected with fees increasing 5.7% across 2015, and in line with growing revenue, improving wage to revenue performance over the year.

Strategy and future performance

The education sector is set to continue to receive strong support from Government and still provides high levels of fragmentation, where the Group's aim is to continue to achieve growth for shareholders through organic and acquisitive opportunities. By delivering efficiencies and economies of scale through effective integration the Group will improve its current margin performance and increase shareholder returns. Disciplined investment will continue to target growth in our people and deliver greater value to our families and children, which will underpin the Group's improved financial returns.

Affinity Education Group Limited Directors' report 30 June 2015

Summary statement of cash flows

During the half year to 30 June 2015 the Company raised \$75.3m from the issue of shares as part of an accelerated renounceable entitlement offer, which combined with borrowings and operating cash flows resulted in the acquisition of child care centres totalling \$81.6 million.

Most pleasing for the group was the cash flows from operating activities of \$9.3 million, which included \$6.3 million of payments relating to acquisition costs. Excluding acquisition costs, cash flows from operating activities were \$15.6 million, up significantly on 2014 and a strong indication of the positive cash generation from the group's centres.

Summary statement of financial position

As at 30 June 2015, the Group has a net asset position of \$219.3 million driven primarily by intangible assets of \$254.1 million comprising mainly goodwill on the acquisitions of child care centres. The Group saw continued growth in the goodwill position as a result of the acquisition of \$81.6 m of new centres to the group's portfolio. The group is in strong debt funding position with only \$33.9 million of borrowings offsetting the Group's assets, equating to gearing of approximately 13% (debt / debt + equity).

Working capital

The Group actively manages working capital to ensure it is utilised in an efficient manner. The working capital position benefits from a customer payment cycle which is shorter than the creditor payment cycle. The operational cash flow continues to strengthen as demonstrated by significant improvement relative to 2014. Continued increases in cash generation and access to debt funding places the Group in strong capital position.

Debt position

As at 30 June 2015 the Group remained in a strong funding position with available banking facilities of \$117.5 million. The Group had utilised only \$33.9 million in relation to its acquisition facility, \$10.2 million in relation to bank guarantees and \$0.7 million in relation to Group credit cards and finance leases, leaving \$72.7 million available as at 30 June 2015. Strengthening this position even further is the \$13.2m cash the Group retains as at 30 June 2015.

As announced on 15th June 2015, the Group has extended and improved its existing debt facilities by 12 months to June 2018, the interest rate margins have also been reduced, with an increase of \$2m provided in relation to the total facility limit and the reporting requirements under the facility have also reduced.

The favourable changes in Group's funding arrangements reflect the maturity of the group and the ongoing support of its principal lender. The Group has received interest from a number of additional lenders who wish to increase the group's borrowing capacity. The Group will pursue potential additional arrangements at the time that best meets the Group's needs.

Outlook

The Group maintains a positive outlook, strengthening it's full year underlying EBITDA guidance to \$30m to \$32m on the back of continuing improvement in occupancy, wage to revenue and overhead efficiency. The Group is expecting to continue its growth plans with the available capacity from its strong balance sheet and continued access to debt from Australian banks. Further growth is expected to improve the leverage from the corporate platform that the Group has invested in, which is expected to improve returns to shareholders. Continued increases in the returns generated by the Group are expected to enable the commencement of the Group's dividend program for 2015, which are expected to be paid in early 2016.

Significant changes in the state of affairs

During the half-year the Group completed the acquisition of 8 new subsidiaries, comprising of 19 childcare centres and an addition 17 childcare education businesses. The acquisitions were funded using the increased banking facilities, cash flows from operations and the issue of shares through the accelerated rights entitlement offer announced on 12 March 2015.

This has resulted in Affinity Education Group Limited ('Affinity') consisting of multiple legal entities which now prepares financial statements as a Group.

There were no other significant changes in the state of affairs of the Group during the financial half-year.

Note 1. Significant accounting policies

These general purpose financial statements for the interim half-year reporting period ended 30 June 2015 have been prepared in accordance with Australian Accounting Standard AASB 134 'Interim Financial Reporting' and the Corporations Act 2001, as appropriate for for-profit oriented entities. Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34 'Interim Financial Reporting'.

These general purpose financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, these financial statements are to be read in conjunction with the annual report for the year ended 31 December 2014 and any public announcements made by the company during the interim reporting period in accordance with the continuous disclosure requirements of the Corporations Act 2001.

The principal accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period, except for the policies stated below.

Principles of consolidation

Following the acquisition of 8 new subsidiaries during the half year ended 30 June 2015, this accounting policy is now relevant to the reporting period. The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Affinity Education Group Limited ('company' or 'parent entity') as at 30 June 2015 and the results of all subsidiaries for the half-year then ended. Affinity Education Group Limited and its subsidiaries together are referred to in these financial statements as the 'Group'.

Subsidiaries are all those entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between entities in the Group are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

Non-controlling interest in the results and equity of subsidiaries are shown separately in the statement of comprehensive income, statement of financial position and statement of changes in equity of the Group. Losses incurred by the subsidiary are attributed to the non-controlling interest in full, even if that results in a deficit balance.

Where the Group loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The Group recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

New, revised or amending Accounting Standards and Interpretations adopted

The Group has adopted all of the new, revised or amending Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new, revised or amending Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

The adoption of these Accounting Standards and Interpretations did not have any significant impact on the financial performance or position of the Group.

Note 1. Significant accounting policies (continued)

The following Accounting Standards and Interpretations are most relevant to the Group:

AASB 2014-1 Amendments to Australian Accounting Standards (Parts A to C)

The Group has applied Parts A to C of AASB 2014-1 from 1 January 2015. These amendments affect the following standards: AASB 2 'Share-based Payment': clarifies the definition of 'vesting condition' by separately defining a 'performance condition' and a 'service condition' and amends the definition of 'market condition'; AASB 3 'Business Combinations': clarifies that contingent consideration in a business combination is subsequently measured at fair value with changes in fair value recognised in profit or loss irrespective of whether the contingent consideration is within the scope of AASB 9; AASB 8 'Operating Segments': amended to require disclosures of judgements made in applying the aggregation criteria and clarifies that a reconciliation of the total reportable segment assets to the entity's assets is required only if segment assets are reported regularly to the chief operating decision maker; AASB 13 'Fair Value Measurement': clarifies that the portfolio exemption applies to the valuation of contracts within the scope of AASB 9 and AASB 139; AASB 116 'Property, Plant and Equipment' and AASB 138 'Intangible Assets': clarifies that on revaluation, restatement of accumulated depreciation will not necessarily be in the same proportion to the change in the gross carrying value of the asset; AASB 124 'Related Party Disclosures': extends the definition of 'related party' to include a management entity that provides KMP services to the entity or its parent and requires disclosure of the fees paid to the management entity; AASB 140 'Investment Property': clarifies that the acquisition of an investment property may constitute a business combination.

Note 2. Operating segments

Identification of reportable operating segments

The Group operates in one segment, being provision of education and care to children aged 6 weeks to 12 years. This is based on the internal reports that are reviewed and used by the Board of Directors (who are identified as the Chief Operating Decision Makers ('CODM')) in assessing performance and in determining the allocation of resources. There is no aggregation of operating segments.

As a result of this, the operating segment information is as disclosed in the statements and notes to the financial statements throughout the report.

Major customers

During the half-year ended 30 June 2015, none of the Group's external revenue was derived from sales to one specific customer or group of customers that derived more than 10% of the revenue figure.

Revenue by product set

In addition to International Financial Reporting Standards ('IFRS') financial information, the CODM uses Earnings before interest, tax, depreciation and amortisation ('EBITDA') excluding acquisition and integration expenses ('Underlying EBITDA') as a measure to assess the underlying financial performance of the business. The table below contains a reconciliation between the loss before income tax (expense)/benefit (as presented in the Statement of profit or loss and other comprehensive income) and the measure used by the CODM:
