#### Brief Explanation and background to the above results:

- 1. London City's cautious approach to new investment has continued while it searches for a distinctive long term investment. Its key holding in Fiducian Limited has passed 5%. In addition a modest holding of 1.5% in Coffey International Limited has been acquired. Fiducian's excellent performance has been marred by adverse surprises coming from Coffey since its AGM on 4 November 2014.
- 2. Profits have been restrained due to low interest rates and difficulty in locating attractive higher yielding investments that meet our criteria. Franking credits have increased again.
- 3. London City continues to work closely with advisers in assessing the information given to investors by Penrice Soda (now in liquidation) in 2008 and 2009 so as to assess what action might be undertaken and funds recovered from various parties.
- 4. Directors have continued to adopt a conservative approach to accounting for future tax benefits. They have not accounted for a major component of future benefits that might arise from realised losses. This has impacted on net assets significantly, reducing them in the order of \$2 million.
- 5. Liquidity remains comfortable.

#### 13. Other Information:

#### 14. Commentary on Results

#### (a) General

- 1. London City's portfolio has benefited from the appreciation of its 5.1% shareholding in Fiducian Group. This gain has been reduced by the negative performance of the 1.5% holding in Coffey International Limited.
- 2. Modest and frustrating results, despite active research and company visits.
- 3. Net Tangible Assets per share are static at 21 cents, following another payment of a 1.0 cent fully franked dividend in late 2014. The Board of London City has continued to defer accounting for potential future tax benefit of investment losses realised during the years.
