Programmed FM adopts Urbanise Platform for asset and energy monitoring

Urbanise.com Limited (**Urbanise**) (**ASX:UBN**) announced today that leading facility manager Programmed FM (**Programmed**) has signed an agreement to commence using its software and sensors to deliver remote asset monitoring service to its customers in Australia and New Zealand.

Programmed will use the Urbanise Platform and remote monitoring devices to deliver proactive critical asset maintenance, reducing the incidence of asset failure.

Urbanise CEO Ben Churchill added, “As one of the largest providers of FM services in Australia, we are delighted that Programmed has selected the Urbanise Platform to deliver its customers an expanded range of maintenance services. Smart sensors not only deliver service providers the visibility needed to adopt a more proactive asset maintenance strategy, but allow them to identify issues and potential problems before any critical asset fails.”

Under the agreement, Urbanise will receive variable platform usage fees (Pay As you Grow) calculated on a monthly basis.
