

NetComm Wireless signs agreement with USA based telecommunications carrier regarding USA rural broadband initiative

25 November 2015: NetComm Wireless Limited (ASX: NTC) is pleased to announce that it has signed a Master Purchase Agreement with a large USA based telecommunications carrier. The agreement concerns the supply of NetComm Wireless' fixed-wireless devices required to connect households and businesses to a fixed-wireless rural broadband network which will be built by that carrier.

Whilst this agreement has been signed, there are a number of additional requirements normal to this type of project that need to be satisfied to progress the project.

Due to a confidentiality agreement in place with this large USA based telecommunications carrier, NetComm Wireless is unable to provide specifics in relation to the agreement at the present time.

Commenting on the agreement, NetComm Wireless Managing Director and CEO David Stewart said: "This agreement is a key milestone in NetComm Wireless' global growth strategy for regional broadband. It builds on our success to date with Ericsson in delivering a similar service to Australia's National Broadband Network. We see potential for this technology solution in many different countries."
