Directors' Report

For the half year ended 30 September 2015

Review and results of operations

Financial performance

The Group recorded underlying net profit after tax (attributable to equity holders of the Company, and excluding restructuring and other one-off items, amortisation of acquired intangibles and divestment write-downs) of \$61.9 million for the half year. The result represents a solid performance in difficult market conditions and falls within the guidance range of \$60.0 million to \$65.0 million provided to the market at the Company's Annual General Meeting on 30 July 2015. It is 7.6% below the \$67.0 million underlying net profit from continuing operations earned in the previous corresponding period (PCP).

Half year statutory net profit after tax attributable to equity holders of the Company (including restructuring and other one-off items, amortisation of acquired intangibles and divestment writedowns) was \$57.1 million, down 2.2% on the \$58.4 million recorded in the half year to September 2014. Refer to page 3 for a detailed summary and reconciliation of results.

Revenue of \$712.1 million was up 0.25% on the \$710.3 million recorded for continuing operations in the PCP, however reduced activity in oil and gas markets and pricing pressures in most business streams resulted in a lower overall profit margin. Pleasing growth in the Life Sciences Division demonstrated the importance of the Company's strategy to increasingly diversify its profit base over recent years.

ALS Life Sciences delivered a 16% improvement in underlying contribution compared with the six months to September 2014. The performance of other business units more exposed to cyclical markets was mixed. Revenue and contribution from the Minerals Division were in line with the PCP, while the Energy and Industrial Divisions were affected by declining volumes and margins.

The Group remains focused on being ready to take advantage of future opportunities by targeting organic and acquired growth in the more stable Environmental and Food sectors (ALS Life Sciences) and by maintaining its assets, market share and reputation in the more cyclical Minerals, Energy and Industrial divisions in order to be able to respond quickly when those markets recover.

Directors have declared a partly franked (to 25% or 1.875cents) interim dividend of 7.5 cents per share, payable on all ordinary shares (2014: 11 cents, partly franked to 10% or 1.1cents). It will be paid on 18 December 2015 on all shares registered in the Company's register at the close of business on 7 December 2015. The Company's dividend reinvestment plan will be suspended for the FY2016 interim dividend.

Review and results of operations (continued)

Contributions from business segments were as follow:

ALS Life Sciences	2015 \$M	2014 \$M	Increase
Revenue	317.7	276.1	15.0%
Segment contribution	58.6	50.2	
Restructuring and related costs	0.1	0.6	
Underlying segment contribution	58.7	50.8	15.6%
Margin (underlying segment contribution to revenue)	18.5%	18.4%	_
Underlying segment EBITDA	76.2	65.9	15.6%

The ALS Life Sciences division delivered strong revenue growth in all geographic regions during the period. In particular the Environmental business stream grew revenue by 13% over the PCP with gains in all regions and improved margin performance in Australia and South America from a combination of new contract work and cost management disciplines.

ALS' global food and pharmaceutical testing business achieved revenue growth of 31% compared with the PCP. It was boosted by the acquisition in April 2015 of Controlvet which operates in Portugal, Spain and Poland. This business stream continues to deliver strong organic growth in the UK, Asia and Australia benefiting from the platform provided by its laboratory information management system and investment in new technologies.

The falls in both revenue and margin experienced by ALS Industrial came from the Asset Care business stream where revenue was down 11% on the PCP due to a decline in the capital expenditure-exposed major construction projects in the LNG and mining sectors in Australia.

The Tribology business continued to grow profitably, particularly in USA where half year contribution grew 23% compared with the PCP.

Directors' Report

For the half year ended 30 September 2015

Review and results of operations (continued)

ALS Energy	2015 \$M	2014 \$M	(Decrease)
Revenue	116.6	152.3	(23.4%)
Segment contribution	1.5	16.8	
Restructuring and related costs	2.1	0.5	
Underlying segment contribution	3.6	17.3	(79.2%)
Margin (underlying segment contribution to revenue)	3.0%	11.4%	
Underlying segment EBITDA	14.9	28.2	(47.2%)

Both business units within ALS Energy suffered declines in revenue and earnings as a result of continued market contraction. While the ALS Coal business performed above expectations during the period in Australia this was offset by lower volumes and pricing pressures in other regions, particularly Canada. The flow-on effects from the steep fall in oil prices since October 2014 continue to impact Oil & Gas drill rig counts, exploration activity and pricing for services in the sector. As a result ALS Oil and Gas recorded a break-even underlying contribution during the half year as revenue fell 28% compared with the PCP.

ALS remains committed to the Oil & Gas sector and believes it can develop a substantial, successful business servicing that market by creating a differentiated, integrated, well-site service, built around testing in-situ, at the well head and in a full service hub laboratory. Restructuring initiatives are continuing and are concentrated on right-sizing the business by rationalising facilities and aggressively removing waste from the operations. These initiatives, together with the recent opening of the major hub laboratory in Houston, are expected to start delivering benefits prior to the end of the current financial year.

ALS Minerals	2015 \$M	2014 \$M	Increase/ (Decrease)
Revenue	183.3	182.0	0.7%
Segment contribution	35.2	35.4	_
Restructuring and related costs	0.6	0.7	
Underlying segment contribution	35.8	36.1	(0.8%)
Margin (underlying segment contribution to revenue)	19.5%	19.8%	
Underlying segment EBITDA	47.4	47.5	(0.2%)

ALS Minerals recorded a steady performance across the division over the half year. Sample volumes in the Geochemistry business remained flat at levels experienced for the past 18 months and its underlying contribution margin was maintained at 21% of revenue. While this is below its target range, the business has maintained its focus on cost management and ensuring its facilities are well-equipped to manage work flow increases when market activity improves.

Although revenue from the Metallurgy business was down 5% on the PCP, the Inspection business stream achieved strong growth in operating margin on revenue growth of 22% derived from increased market share.

Events subsequent to balance date

Equity raising

The Entitlement Offer will further strengthen the Company's balance sheet and provide funding flexibility for growth predominantly in its Life Sciences division. The new shares issued will not participate in the FY2016 interim dividend. Further information concerning the Entitlement Offer is contained in the shareholder offer materials lodged separately with the ASX.

- Level 2: Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation.

6. Segment reporting

The Group has 4 reportable segments, as described below, representing 4 distinct strategic business units each of which is managed separately and offers different products and services. Directly attributable transaction costs of \$31,500 were included in administration and other expenses in the profit and loss statement. Performance-hurdle rights and service-based rights granted

During the period the Group granted performance-hurdle rights and service-based rights under its Long Term Incentive (LTI) plan which is designed as a retention and reward tool for high performing personnel. Under the plan key employees may be granted conditional rights to receive ordinary shares in the Company at no cost to the employees (or in limited cases to receive cash-settled awards).

The concept of service-based rights was introduced during the previous financial year. The only condition attaching to such rights is that an employee must remain employed by the Group until vesting date. As no performance hurdles attach to these rights, the number of rights issued to an individual employee is significantly less than the number of performance-hurdle rights that would otherwise be issued to an employee of similar standing.

The terms and conditions of rights granted during the current and prior periods are set out below:

	Half year ended 30 Sept 2015	Half year ended 30 Sept 2014
Equity-settled		
Date of grant	30 July 2015	29 July 2014
Number of performance-hurdle rights	612,625	391,675
Weighted average fair value at date of grant of performance-hurdle rights	\$4.04	\$5.40
Testing date for performance hurdles	31 March 2018	31 March 2017
Number of service-based rights	63,852	97,976
Weighted average fair value at date of grant of service- based rights	\$4.83	\$6.52
Vesting date and testing date for service condition	1 July 2018	1 July 2017
Cash-settled		
Date of grant	30 July 2015	29 July 2014
Number of performance-hurdle rights	72,540	45,174
Weighted average fair value at date of grant of performance-hurdle rights	\$4.04	\$5.40
Testing date for performance hurdles	31 March 2018	31 March 2017
Number of service-based rights	10,436	21,434
Weighted average fair value at date of grant of service- based rights	\$4.83	\$6.52
Vesting date and testing date for service condition	1 July 2018	1 July 2017

The fair value of services received in return for all rights is based on the fair value of the rights granted measured using Binomial Tree (EPS and EBITDA hurdles and service condition) and Monte-Carlo Simulation (TSR hurdle) valuation methodologies.

Vesting conditions in relation to performance-hurdle rights:

Employees must remain employed by the Group until vesting date. The rights vest only if underlying Earnings Per Share ("EPS"), relative underlying EBITDA margin or relative Total Shareholder Return ("TSR") hurdles are achieved by the Company over the specified performance period. 25 percent of each employee's rights are subject to EPS measurement, 25 percent are subject to EBITDA measurement and 50 percent are subject to the TSR measurement.

Vesting condition in relation to service-based rights:

Employees must remain employed by the Group until vesting date.

Accordingly, we do not express an audit opinion.
