

## **BuildingIQ Secures Industry Partnerships and Expands Reach of Predictive Energy Optimization™ Platform**

*Continues strong growth pattern across Australia and the United States leading up to A\$20 Million IPO*

**Sydney – 17 December 2015** – [BuildingIQ](#), a leading energy management software company, announces that it has continued to solidify its position as a market leader in recent months. Key company milestones achieved in the 3<sup>rd</sup> quarter 2015 include:

- **Selected for government initiatives in Australia and the United States**
- **Secured two patents for its innovative Predictive Energy Optimization™ platform**
- **Surpassed 140 buildings under management - 35 million total square feet**
- **Announced a partnership with major utility provider, Xcel Energy**
- **Renewed lease with an iconic New York City building**
- **Recognized with multiple awards in the Australian market**
- **Entered an agreement that will promote its platform to BSA Group's portfolio of commercial building clients**
- **Expanded presence across higher education sector with installations at the University of California Los Angeles (UCLA), California State University, Jefferson State Community College, University of South Florida, and the University of Miami**

In Australia, BuildingIQ has become an approved supplier for services by the New South Wales Office of Environment & Heritage (OEH). As a result, projects utilizing BuildingIQ's technology are now eligible for government funding that could contribute up to 80 percent toward costs.

In the United States, BuildingIQ advanced its partnership with the New York State Energy Research and Development Authority ([NYSERDA](#)) and [Energy Solutions](#) for a scaled deployment of its platform across New York State through the Emerging Technology Accelerated Commercialization Commercial-Institutional (ETAC-CI) program. To facilitate market adoption, the program will offer training as well as installation incentives per building. On the energy supplier side, BuildingIQ began a pilot program with [Xcel Energy](#), which serves more than 3.3 million electric customers and 1.8 million natural gas customers.

Meanwhile, BuildingIQ continued to enhance its library of intellectual property by securing two patents for its innovative three-loop methodology, which involves a unique combination of continuous learning over hours, minutes and seconds.

BuildingIQ's technology and leadership continued to be recognized with the company being named the National iAward winner in Sustainability. In addition, chief technology officer, Peter Dickinson, received an HVACR Leadership Award for Emerging Energy Savings Leader of the Year from *Climate Control News*, a leading industry publication.

"BuildingIQ continues to grow and advance its technology to meet the dynamic needs of energy users around the world," said Michael Nark, president & CEO of BuildingIQ. "In recent months we've established new partnerships, continued to strengthen existing ones, and brought the energy saving potential of our technology to numerous industry sectors."

### **About BuildingIQ:**

BuildingIQ is a leading provider of advanced energy management software that actively predicts and manages HVAC loads in commercial buildings. As the only supplier of patented Predictive Energy Optimization™ technology, BuildingIQ's cloud-based solution is powering energy and operational savings in buildings across the globe with reductions in HVAC energy costs by as much as 25 percent. BuildingIQ delivers measureable results and has received backing from tier one industry leaders including Aster Capital (backed by Schneider Electric, Alstom and Solvay), the Venture Capital unit of Siemens Financial Services (SFS VC), Paladin Capital and the Energy Division of the Commonwealth Scientific and Industrial Research Organisation (CSIRO).

Recognized as a leader in its industry, BuildingIQ most recently was named winner of a [National iAward](#) for Sustainability, a [National Energy Efficiency Industry Award](#) for Best Commercial Energy Efficiency Project, [Bloomberg New Energy Pioneers Award](#), [Fierce Innovation Awards' "Best in Show"](#), a [Cool Vendor in Green IT and Sustainability](#) by Gartner and listed on the [Global Cleantech 100](#) and [AlwaysOn Going Green Global 200](#).
