About Bligh Resources Limited

Listed in 2011, Bligh Resources Limited (Bligh) (ASX: BGH) transformed itself from a manganese and base metal greenfield explorer into an advanced gold explorer/developer.

Bligh, since 2012 has successfully gradually purchased 100% interest in SR Mining Pty Ltd (SR Mining), which owns 100% of the advanced Bundarra Gold Project near the gold township of Leonora, Western Australia. The Bundarra Gold Project currently has reported Mineral Resources (JORC 2004) of 426,000 ounces (Inferred 182,000oz, Indicated 218,000oz, Measured 26,000oz) across three proven deposits and a new exploration zone (Celtic, Wonder North, Wonder West and Bluebush); all deposits are open in at least one direction.

To date, more than 3,000 holes were drilled with accumulated drill depth of more than 150,000 metres for the Bundarra Gold Project. In 2013, Bligh engaged CSA Global to carry out a Scoping Study for a toll milling solution and returned very attractive cashflow forecasts. Bligh shall attempt to upgrade resources through further expansive drilling programs.

On 28 October 2015, SR Mining entered into a 50/50 Joint Venture Agreement for its Bundarra Project with Perth based Contained Gold Pty Ltd (“CGPL”). CGPL shall complete a Feasibility Study for the project within 18 months then consider to full fund a Carbon-in-Pulp Gold Recovery Plant to lease back to the Bundarra Project. Detailed information may be read on ASX announcement made by Bligh on 28 October 2015.

Bligh also carries an acquisition strategy, that is, to secure projects that are near to established infrastructure so possible future development and resource recovery are not hampered by uneconomic infrastructure investment. Bligh continues to assess the acquisition of such brown-field gold projects.
