

ASX ANNOUNCEMENT

Megaport Limited enters into alliance agreement with AMS-IX to provide Internet Exchange services

Megaport Limited (ASX:MP1) is pleased to advise that its US subsidiary has entered into a binding alliance agreement with Amsterdam Internet Exchange, B.V. (AMS-IX) to become the exclusive global elastic cloud interconnection partner for AMS-IX. AMS-IX will in turn provide its Internet Exchange service in key Megaport-enabled markets.

The partnership brings Megaport's elastic cloud exchange services to existing AMS-IX markets like Amsterdam and addresses industry fragmentation of internet peering services by connecting the two companies' fabrics to create greater reach to key peering locations. Customers can access the AMS-IX Internet Exchange service across the Megaport fabrics, while customers of the existing AMS-IX Internet Exchanges can take advantage of Megaport's elastic connectivity solutions to network and cloud service providers.

Megaport CEO, Denver Maddux said, "AMS-IX has a long history of building critical mass of peering partners on their Internet Exchanges. They operate one of the largest Internet Exchanges in the world. Connecting the AMS-IX and Megaport fabrics creates greater opportunity for Internet peers to reach desired content, cloud services and end-user networks".

Megaport and AMS-IX will begin offering their services to each other's customers in Chicago and the San Francisco Bay Area in the U.S., as well as Hong Kong.

About Megaport

Megaport is a global leader and pioneer in elastic interconnection. Since commencing operations in January 2014, Megaport has experienced strong growth and is already servicing over 200 customers in six markets in Australia, Singapore and Hong Kong. This growth has been driven by the continuing increase of data consumption as well as significant demand by enterprises in adopting cloud computing services. Megaport has been built by a management team with diverse and global operational experience building and operating networks outside of Australia, including the United States, Canada, Europe and other markets in Asia such as Singapore and Japan.
