

For ASX Market Release: 29 January 2016

Quarterly Activities Report – December 2015

HIGHLIGHTS

Wetar Copper Project

- Copper cathode produced for the quarter was 494 tonnes. Sales were 280 tonnes at an average price of US\$2.08/lb
- Earthworks construction continues to perform in line with expectations
- Power station ready for commissioning
- First copper cathode production from 25,000 t.p.a. SX-EW plant expected early Q2 2016
- The 12 month rolling LTIFR and Injury Severity rates remain at zero

Corporate

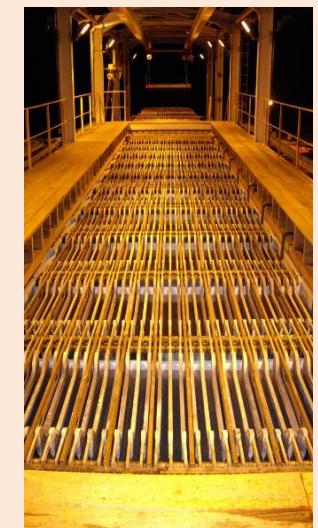

- A further US\$37.0 million drawn under the Term Loan Facility and VAT Working Capital Facility
- Hedge book (copper and diesel fuel) valued at US\$44.1 million as at 31 December 2015
- At 31 December, cash on hand was AUD\$34.7 million and unused project finance facilities were US\$71.0 million

Managing Director Barry Cahill commented: “Construction progress on the 25,000 t.p.a expansion project during the quarter has been exceptional in light of the very tight schedule. While the expansion project remains on budget, the schedule has slipped slightly due to the delay in the delivery of structural steel which will push first production into early Q2 2016.”

Quarterly Activities Report December 2015

WETAR COPPER PROJECT (FINDERS 72%)

3,000 t.p.a. SX-EW plant Production Report

The 3,000 t.p.a. plant operated as expected during the quarter as summarised in the following table:

Table 1: Wetar Quarterly Copper Production

| | | Full Year 2014 Total | June 15 Half-Year | September 15 Quarter | December 15 Quarter | Full Year 2015 Total |
|-------------------|------------|----------------------|-------------------|----------------------|---------------------|----------------------|
| Ore stacked | t | 139,587 | 44,540 | 42,898 | 97,119 | 184,557 |
| Grade | % Cu | 2.42 | 1.72 | 1.59 | 1.99 | 1.83 |
| Metal stacked | t Cu | 3,385 | 764 | 682 | 1,935 | 3,381 |
| Copper stripped | t Cu | 1,416 | 307 | 425 | 494 | 1,226 |
| Copper sold | t Cu | 1,306 | 203 | 406 | 280 | 889 |
| Copper sale price | US\$/lb Cu | 2.88 | 2.68 | 2.38 | 2.08 | 2.35 |

Ore stacking on the Gold Pit Leach Pad (GPLP) was suspended during the quarter following the arrival of the new crushing circuit. The 3kt crusher is currently being refurbished in preparation for restarting in February 2016 when the new stacker arrives. The 3kt stacker and conveyors were moved to the KKV leach pad for use with the new crushing circuit.

Copper recoveries from the GPLP were in line with expectations. Limestone irrigation continued successfully during the quarter, further reducing the acid levels in solution. The 3kt neutralisation plant has also been returned to full operation.

Image 1 – GPLP heap, broken ore stocks and limestone heap

Quarterly Activities Report December 2015

The new crushing circuit was commissioned during the quarter. A number of commissioning issues were encountered and modifications are being completed.

The crushing circuit has achieved its design tonnage rate but only intermittently as the 3kt stacker is not rated for 300 tonnes per hour. The new stacker does not arrive until the end of January 2016.

Image 2 – Crusher on KKV leach pad with stacked KKV Heap 1 in the background

Ore mining has advanced well ahead of the crusher commissioning, with over 90,000 tonnes of ore now stockpiled for crushing and stacking.

The crusher also processed 34,598 tonnes of sub grade material for the bedding layer on the KKV leach pad.

Copper cathode produced during the quarter has continued to be exported as LME Grade A copper cathode without any specification issues.

25,000 t.p.a. SX-EW plant Construction Progress

Mine civil construction and related activities advanced in accordance with expectations during the December quarter.

Earthmoving progress was assisted by a late commencement to the wet season and enabled the majority of construction activities to be completed.

The dam wall for Stormwater Pond Three has now been constructed up from the bottom of the valley and the embankment fill has commenced. The remaining ponds to be constructed are the various solution ponds servicing the new 25kt plant.

Constructed solution ponds are now piped and connected so that the leach solution can be moved between the various heaps and the two SX-EW plants.

The KKV leach pad construction continues with Cell 3 now in the process of being lined in preparation for placement of the bedding layer.

Quarterly Activities Report December 2015

The neutralisation pad is complete and concrete construction is well advanced.

Image 3 – KKV leach pad solution draining into the 25kt solution pond

Concrete works have reduced to minor finishing items and non-critical areas. Structural steel installation and piping has commenced and was well underway by quarter end. The majority of equipment has arrived on site and the outstanding items are either in transit to Surabaya port, clearing customs or in transit to site. There have been some delays to fabricated steel that has delayed progress.

Image 4 – 25 kt plant construction from the KKV leach pad

Quarterly Activities Report December 2015

Electrical work has commenced with the installation of high voltage powerlines and buried cable. The power station has been completed and is ready for commissioning once the high voltage gear is established. It is anticipated that the 3kt plant will be reticulated onto this circuit in early February.

The installation of two new fuel storage tanks is well underway and will add two and a half million litres of storage capacity to the project.

Image 5 – Power station and fuel tank

Coastal facilities progressed well with construction of the workshop and warehouse remaining. The accommodation camp has been completed and is being occupied by construction crews.

The expansion project schedule has slipped slightly due to the delay in delivery of some materials, including structural steel, and it is anticipated that this will push first production into early Q2 2016 and while disappointing, is not unexpected in the very tight construction schedule. The project remains on budget.

Videos showing construction progress at the Wetar Project are available for viewing at:

www.findersresources.com/wetar-copper-project/gallery/

OH&S

There were no serious injuries recorded during the quarter, with the Lost Time Injury Frequency Rate (LTIFR) remaining at zero. The 12 month rolling LTIFR is 0.00 and the Injury Severity Rate is 0.00. There were no injuries requiring medical treatment recorded, with all employees returning to normal duties immediately following first aid treatment at the on-site medical clinic.

Quarterly Activities Report December 2015

Wetar Community Development

Community development programs, which assist with health and economic development, continued during the quarter.

- Agricultural initiatives, including vegetable growing and chicken farming, increased as the number of workers on the project increased.
- The community employment initiative was extended to island villages further afield of the operation following the successful recruitment program from the three local villages. At the end of the quarter, a total of 479 of the 815 company employees at the Wetar Project originate from the local region, which is equivalent to 59% of the total project workforce.
- Staffing levels at the local health centre and two medical posts have been supported to reduce the dependency on the Site Clinic. During the quarter 524 visits were dealt with. Any serious conditions were elevated to the Site Clinic of which there were 34 visits during the quarter.
- The emergency airstrip for medical evacuation of both employees and local residents is now in operation.
- 10% of the available passenger seats on marine vessels servicing the Wetar Project are now allocated to the local community.

Stakeholder engagement also continued and included information meetings and site visits with various Government officials, community leaders, elders and landowners.

Wetar Environmental Management

Environmental monitoring activities and reporting to the relevant Indonesian authorities in accordance with the Project's environmental permit was ongoing and no non-compliance occurrences were reported.

March 2016 Quarter

The Company's planned activities for the March 2016 quarter are:

- Continue stacking ore to the KKV leach pad and recommence stacking at the GPLP
- Finish construction of site earthworks
- Finish construction and commence commissioning of the 25,000 t.p.a. plant

Quarterly Activities Report December 2015

OJOLALI GOLD-SILVER PROJECT (FINDERS 72%)

Activities

The Mines Department has continued its evaluation of documents submitted in support of the application for an Operation Production permit, including an informal technical meeting with respect to the study assumptions, waste management and scope of the mine closure program. A formal evaluation report is still outstanding.

The Company is currently evaluating strategic options for the Ojolali Project and a number of parties have expressed an interest in the project.

Tenement

The Exploration Licence (IUP B.24/DPE-WK/HK/2014) expired on 11 March 2015. The Company has applied for a Mining Licence (IUP Exploitation). If approved, the Mining Licence will have a tenure of 20 years.

Quarterly Activities Report December 2015

CORPORATE

Cash and Project Finance Facility

Finders previously entered into a Senior Facilities Agreement with BNP Paribas, Commonwealth Bank of Australia, Hong Kong and Shanghai Banking Corporation (HSBC) and Societe Generale ("the Senior Lenders") which provides for a US\$162 million commitment from the Senior Lenders consisting of:

- US\$127 million Term Loan Facility;
- US\$20 million Cost Overrun Facility; and
- US\$15 million VAT Working Capital Facility.

The facilities will be sufficient to enable the completion of construction of the 25,000 t.p.a. SX-EW plant.

During the quarter Finders Indonesian subsidiary, PT Batutua Tembaga Raya (BTR) received a further two drawdowns under the Senior Facilities Agreement totalling US\$37 million. Total amount drawn under the Senior Facilities Agreement as at the end of the quarter was US\$91 million. BTR remained comfortably in compliance with all covenants.

At the end of the quarter, undrawn facilities were US\$71 million.

The book value of the hedges entered into by BTR as at 31 December 2015 is summarised in the following table (US\$ million):

| | |
|----------------|-------------|
| Copper hedging | 48.9 |
| Fuel hedging | (4.8) |
| Total | 44.1 |

As at 31 December 2015, Finders and BTR had cash of AU\$34.7 million.

During the quarter, vesting conditions for 4,189,667 shares issued to employees under the Finders Employee Share Ownership Plan were not met and the shares were cancelled by Finders.

The mining exploration entity quarterly report (Appendix 5B) is appended.

Barry Cahill

Managing Director

Quarterly Activities Report December 2015

Background Information on Finders

Finders is the operator of the Wetar Copper Project (72% interest) and the Ojolali Gold-Silver Project (72% interest) both located in Indonesia.

The Wetar Copper Project comprises the development, open pit mining and processing of the high-grade sulphide deposits at Kali Kuning and Lerokis located within 3 kilometres of the coast on Wetar Island. The project benefits from having existing infrastructure in place, particularly a wharf, camp and roads and partially pre-stripped copper ore bodies from a prior gold mining era.

Finders currently operates a 3,000 tonne per annum ("t.p.a") copper cathode solvent extraction-electrowinning ("SX-EW") demonstration plant to test copper sulphide leach kinetics and optimise process design. To date, the demonstration plant has produced over 4,000 tonnes of LME Grade A copper cathode, all of which was sold at a premium to the LME price and without specification issues.

The current construction of a 25,000 t.p.a SX-EW facility will lift annual production capacity to 28,000 t.p.a. The Bankable Feasibility Study for the expansion project estimated a US\$132.4M capital cost (excl. contingency) and a cash operating costs of US88c/lb Cu at an efficient production level.

Finders has successfully arranged a US\$162 million senior facility and an additional US\$45 million project level equity facility to fund the expansion project.

Opportunities for extending the mine life past the current 10.5 years are strongly founded on exploration upside, focussing initially on the nearby satellite Meron deposit and other identified VMS copper and gold targets on Wetar Island including Karkopang.

The Ojolali Project is an advanced gold-silver resource project covering a large epithermal system with numerous mineralised shoots within the highly productive Sumatran Gold Belt. The Jambi oxide gold deposit has potential for a small scale heap leach operation based on the defined resource.

Capital Structure

| Type of Security | | | Total |
|--|----------------|-------------|-------------------|
| Fully Paid Ordinary Shares ("Shares") | | | |
| Shares on issue at 31 December 2015 - quoted on ASX | | | 661,267,245 |

| B.24/DPEWK/HK/2014 | IUP Exploration | Gold | 11 Mar 2015 ² | 5,912 | 1 year | BWKM3 |

- Finders' interest in the Wetar Copper Project (72%) is held through Indonesian subsidiaries, PT Batutua Tembaga Raya ("BTR") and PT Batutua Kharisma Permai ("BKP"). BBW has merged with BKP and tenements previously held by BBW are in the process of being transferred to BKP.
- Application for an IUP Exploitation has been lodged.
- Finders' interest in the Ojolali Project (72%) is held through Indonesian subsidiary, PT Batutua Lampung Elo ("BLE"). BLE is a party to a cooperation agreement with BKP and PT Batutua Way Kanan Minerals ("BWKM") that hold exclusive mining authorisations (Izin Usaha Pertambangan ("IUP")).

Quarterly Activities Report December 2015

Wetar Copper Project Resources & Reserves

| Ore Reserve Estimate | | | | |
|--|--|-----------------|------------|------------|
| | | Category | Tonnes (m) | Cu (%) |

The information in this report that relates to ore reserve estimation is based on work completed by Mr John Wyche who is a full time employee of Australian Mine Design and Development Pty Ltd and a member of the Australasian Institute of Mining and Metallurgy. Mr Wyche has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Wyche consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to mineral resource, exploration potential and geology estimation is based on work compiled by Dr Phillip Hellman who is a consultant to H&S Consultants Pty Ltd and a Fellow of the Australian Institute of Geoscientists. Dr Hellman has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Hellman consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Note: Rounding errors may occur

The information in this report that relates to exploration potential and geology is based on work compiled by Dr Chris Farmer. Dr Farmer is a full-time employee and director of Finders Resources Ltd and a Member of the Australian Institute of Geoscientists. Dr Farmer has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Farmer consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to the estimate of the Mineral Resource at Ojolali is extracted from the report entitled "Quarterly Report for the Period Ended December 31st 2010" created on 31st January 2011 and is available to view on www.findersresources.com. The company confirms that it is not aware of any new information or data that materially effects the information included in the original market announcement and, in the case of estimates of the Mineral Resource, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the original market announcement.

Appendix 5B

Mining exploration entity quarterly report

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
