Change in Portfolio Value - January, 2016

In the interests of keeping the market informed on a timely basis of the investment returns of the Global Value Fund portfolio, the manager produces an interim estimate for release to the market ahead of the more detailed monthly investment update and NTA report.

This estimate refers only to changes in the portfolio's value over the month, after the deduction of operating costs and management fees. It excludes any provisions for taxes or the impact of dilution from the Company's outstanding options. These adjustments will be included in the final monthly NTA calculations, which the Company will release by the 14th day of the month.

The manager estimates that the value of the Global Value Fund portfolio decreased by 1.2% during January 2016.

The manager highlights that during January the MSCI All Country World Index fell by 3.4% in Australian dollar terms.

After adjusting for the impact of options which were exercised during the month, the manager estimates that the pre-tax NTA per share at the end of January was \$1.1347. Adjusting for the Company's remaining outstanding options the fully diluted pre-tax NTA per share was \$1.0796.
