MWH to roll out Urbanise remote monitoring across 180 offices

Urbanise.com Limited (Urbanise) (ASX:UBN) announced today that it has entered into a Hosted Services Agreement (HSA) with MWH Global (MWH) – one of the largest water engineering companies in the world. MWH offices and projects span 35 countries and six continents.

Under the agreement, MWH will trial the use of Urbanise smart sensors and *Asset Monitoring* technology to measure and optimise energy consumption in its Sydney and Melbourne offices. Once installed and operational, MWH intends to use their offices as a case study to demonstrate the benefits of the Urbanise Platform and remote monitoring technology to its key clients.

Commenting on the announcement, Michelle Brownlie Senior Energy Specialist, Sustainability & Environment Group at MWH said, *"We are very excited about working with Urbanise to transform our own offices into an environmental case study. The Urbanise solution is unique in that it offers an end-to-end wireless asset-monitoring platform that is easy to use and fast to implement. We anticipate that this technology will appeal to many of our global customers when they can see the effectiveness of its energy, water and asset monitoring capability."*

Urbanise CEO Ben Churchill added, *"MWH's commitment to adopting innovative solutions that promote the efficient use of resources is second to none and we are pleased that they have selected the Urbanise Platform to help support their sustainability goals. The Urbanise Platform provides real-time remote monitoring of energy and water consumption – allowing inefficiencies to be identified and addressed. We look forward to working with MWH as they look to reduce their own energy costs as well as those of their clients."*

Urbanise will receive variable platform usage fees (Pay As You Grow) agreements calculated on a monthly basis based on the number of monitoring devices installed. It is anticipated that 8 to 12 smart sensors will be installed in each MWH office.

-Ends-

About MWH

MWH Global is dedicated to *Building a Better World*. As specialists in water, natural resources and transportation, MWH employees use innovative ideas and technology to help solve complex infrastructure and environmental challenges. This work is built on a nearly 200-year history during which MWH has delivered services from initial planning and design through construction, start-up and operations. Today, MWH employs approximately 7,000 experts including engineers, consultants and construction professionals in 35 countries on six continents. Each of these experts is committed to serving global communities through sustainable development and project delivery. MWH is a private, employee-owned company headquartered in Broomfield, Colorado. www.mwhglobal.com

About Urbanise

Urbanise is the creator of a cloud-based platform for delivering building services. Designed for service providers, the Urbanise Industry Cloud software-as-a-service platform is transforming the traditional engineering approach to building operations – improving customer service, removing operational costs and enabling new revenue streams. Urbanise technology is used in some of the tallest towers and most prestigious communities around the globe. www.urbanise.com
