Mr Culhane takes responsibility for acquisitions and the more transactional businesses within the Group such as Pepper's CRE advisory business. The internal mergers and acquisitions team also report to Mr Culhane.

In 2006, Mr Culhane organised the sale of Pepper and the wider Oakwood group of businesses to Merrill Lynch debt capital markets. From 2006 to 2008, Mr Culhane was the Group CEO of Oakwood that in turn owned Pepper and numerous speciality finance businesses in Europe.

As the financial crisis hit in 2008, Mr Culhane and his senior United Kingdom team grew Oakwood's United Kingdom residential mortgage servicing business that was not owned by Merrill Lynch at the time.

In 2010, Mr Culhane teamed up with Patrick Tuttle to organise the purchase of Pepper back from Merrill Lynch that, by then, had been sold to Bank of America. In January 2011, Mr Culhane relocated from London to Sydney to run Pepper along with Patrick Tuttle.

Prior to founding Pepper, Mr Culhane served as the Executive Chairman of Future Mortgages (a United Kingdom-based non-conforming residential mortgage lender that was sold to Citigroup in 2001) and the Chief Executive Officer of the European subsidiary of FBR, a United States based, NYSE-traded, investment bank. While at FBR, Mr Culhane worked for 10 years in equity capital markets, 4 years in Washington DC in the US and 6 years in London in the United Kingdom.

#### Other listed directorships in the last three years:

None

#### Interests in shares and options:

Mr Culhane has 96,743 performance rights, 209,520 loan shares, and interests in 8,263,500 ordinary shares.

### Patrick Tuttle (Co-Group Chief Executive Officer and Director)

#### Experience:

Patrick Tuttle is CEO (appointed in December 2007) for Pepper's Australian operating business, comprising its residential mortgage lending, asset finance and specialist loan servicing activities, and the country heads responsible for Pepper's European and Asian lending and loan servicing businesses also report directly to him in his capacity as Co-Group CEO. He is Chairman of Pepper's Australian Executive Committee and Co-Chairman (with Mr Culhane) of Pepper Group's Global Executive Committee.

Mr Tuttle has extensive experience in financial services, investment banking and mortgage banking, with a particular emphasis on structuring and managing Australian mortgage-backed securities programs, and managing specialty mortgage finance and loan servicing operations. Prior to joining Pepper in 2001 as CFO & Treasurer, Mr Tuttle held a number of director-level roles within Macquarie Bank Limited, principally as Divisional CFO for a number of the Bank's trading businesses, including Project & Structured Finance, Corporate Finance, Banking & Property Group, Macquarie Capital, and the Direct Investments Group. Mr Tuttle initially joined Price Waterhouse in 1986 as an undergraduate and worked for the firm's financial services practices in both Sydney and London until 1998, attaining the position of Senior Manager.

Mr Tuttle has a Bachelor of Economics (Accounting & Finance) degree from Macquarie University. He is a Member of the Australian Institute of Chartered Accountants, a Fellow of the Australian Securitisation Forum, Inc. (ASF), a Member of the Australian Institute of Company Directors, a Member of the Ireland Institute of Company Directors, and a Member of the Financial Services Institute of Australasia. Mr Tuttle was also a board Member of the ASF from 2004 to 2013, Deputy Chairman of the ASF from 2008 to 2013, and Co-Chair of the ASF Government and Industry Liaison Committee from 2010 to 2013.

### Operating and financial review

The board presents its 2015 Operating and Financial Review, in order to provide shareholders with an overview of the Group's operations, financial position, business strategies and prospects for future financial years. The review complements the financial report.

### Principal activities and review of operations

Pepper is a specialist residential mortgage and consumer lender and loan servicer, operating in targeted market segments and asset classes in Australia and internationally, many of which are underserved by traditional bank and other lenders.

Pepper has developed a strong specialist lending and loan servicing group through a combination of organic growth and targeted acquisitions across Australia, New Zealand, Ireland, the United Kingdom, Spain, South Korea, and Hong Kong and China where it acquired a 12% equity interest in Prime Credit Holdings Ltd (Prime Credit) which occurred on 6 May 2015.

Pepper offers a broad range of lending products across residential mortgages, auto and equipment finance, point of sale finance and personal loans, underpinned by a comprehensive risk based pricing methodology. Pepper also provides loan servicing for its own originated loans as well as for third party originated loans, including residential mortgages, consumer unsecured and secured loans as well as commercial real estate backed loans.

Through Pepper Property Group, Pepper is also an independent real estate investment adviser that provides integrated property and capital solutions for corporations, investors and developers.

Pepper's business model provides a diversified base of income generated at multiple points across the customer relationship and includes income from loan origination fees, lending income, servicing and loan administration fees, performance fees and advisory income.

Pepper's unique operating model combines credit risk based underwriting expertise with highly developed specialist loan servicing and collection management capabilities which together deliver enhanced performance in both its lending and servicing businesses across multiple asset classes including: residential mortgages, auto loans, equipment finance, small balance commercial mortgages, small and medium sized enterprise loans and personal loans.

Pepper's core capabilities include:

- Product manufacturing: Deep manufacturing expertise in residential mortgage loans gives Pepper flexibility in providing a range of products with attractive risk-return profiles in Australia. Internationally, Pepper's management team has experience in specialist lending in the United Kingdom and consumer finance lending in Spain. The Management teams in Asia are deeply experienced in consumer finance lending. Pepper is able to apply its detailed knowledge of borrowers to develop new products that address unmet demand;
- Distribution: Pepper distributes loans in Australia through its relationships with approximately 8,000 accredited brokers and approximately 15 key White-Label partners. Strong, long-term relationships with global loan portfolio acquirers help Pepper win and maintain servicing contracts across multiple jurisdictions;
- Treasury and funding expertise: Pepper has strong long-term relationships with funding partners and is a trusted issuer in the Term Securitisation markets;
- Risk management: Pepper operates with a holistic risk management and governance framework; and
- Collections management: Pepper's specialised collections processes are based on deep experience, expertise, analytical capabilities and a solution based approach to customer management.

### Funding

Across each of its lending markets, Pepper maintains access to a diversified funding platform supported by established funding relationships and a board approved funding policy. Pepper's funding is split between corporate funding and asset funding of Pepper's lending activities to customers.

- Corporate Debt Facilities: Utilised for working capital and business operations.
- Warehouse Facilities: Third-party funders provide limited-recourse financing to special purpose vehicles established by Pepper to originate or acquire loans to Pepper's customers.

## Directors' report

---

### Operating and financial review (continued)

#### Funding (continued)

- Term Securitisations: Loans that are initially funded via a warehouse facility can be pooled together and refinanced by being sold to a new Funding Vehicle that issues limited-recourse asset-backed securities to public market investors.
- Whole Loan Sales: Pepper is able to create additional liquidity by selling specific pools of loans to release and recycle capital.
- South Korea deposits: Pepper's lending business in South Korea holds a banking license and the lending book is primarily funded by deposits.

#### Principal risks

The Group's key risks include, but are not limited to:

- Funding risk: Pepper's funding platform currently comprises a mix of warehouse facilities, term securitisations, corporate debt facilities and customer deposits. Pepper depends on these sources to fund mortgage and consumer loan originations and therefore faces funding risks which could lead to the inability to access funding or less favourable terms;
- Capital and liquidity requirements: there is a risk that Pepper could be required to contribute additional "first loss" equity capital to support the credit position of senior ranking noteholders in Pepper warehouse facilities and term securitisations, and could be required to contribute additional capital to support the regulatory capital requirements or business needs of Pepper South Korea, which could impact Pepper's profitability, ability to grow and/or could force it to raise additional capital;
- Regulatory and licence compliance: Pepper is subject to extensive regulation in each of the jurisdictions in which it conducts its business. Changes in law or regulation in a market in which Pepper operates could materially impact the business. Pepper is licensed and/or registered to operate a number of its services across a range of jurisdictions. Changes to these licensing regimes, the revocation of existing licences, an inability to renew or receive necessary licences or the imposition of capital requirements could materially adversely affect Pepper's business, operating and financial performance; and
- Downturn in the global economy: Pepper is a global business operating in multiple jurisdictions. A material downturn in the economies in which Pepper operates, a sustained outbreak of higher inflation or shocks to the financial system could result in a material increase in unemployment, decreases in house prices, higher interest rates, general reduction in demand for credit and/or a reduction in a borrower's ability to service their debt (credit risk).

### Operating and financial review (continued)

#### Business strategies

Pepper is focused on a number of growth strategies to continue to drive income and profitability over coming years:

##### 1. Organic lending growth

Australia and New Zealand (ANZ) Division<sup>1</sup>: Pepper is well-positioned to continue to build upon strong volume growth experienced in Australia, driven by:

- expected underlying market growth in the non-conforming (including near-prime) and prime segments of the residential mortgages market;
- continuing development of all distribution channels, particularly direct, and further investment in Pepper's brand positioning; and
- ongoing new product development initiatives such as Pepper Asset Finance.

International Division<sup>1</sup>: Pepper expects growth driven by new lending in the United Kingdom, Spain and more recently in Ireland, in addition to continued strong growth in South Korea. The recent acquisition of 12% of Prime Credit is expected to generate growth in Hong Kong and China.

##### 2. Organic servicing growth

- Volume increases in Pepper originated loans are expected to support growth in servicing revenue;
- Servicing assets under management are expected to be driven by recently awarded third-party contracts; and
- Pepper continues to identify a healthy pipeline of potential new third-party servicing opportunities across Europe.

##### 3. Acquisitive growth

- Management has demonstrated a strong track-record in identifying and executing acquisitions in targeted markets that are consistent with Pepper's strategy to deliver value outcomes and create platforms that can be used for future growth;
- Pepper expects that it will be able to capitalise on certain opportunities globally stemming from regulatory change and capital markets volatility and is focused on executing these opportunities in a disciplined and structured manner through the use of a dedicated internal mergers and acquisitions team; and
- Pepper will continue to explore opportunities for further international transaction collaborations and market specific partnership/joint venture style arrangements, where appropriate.

### Financial review

#### *Income statement*

	<b>Year ended 31 December 2015 \$'000</b>	Year ended 31 December 2014 \$'000
<b>Statutory income statement</b>		
Total revenue	<b>527,729</b>	423,381
Profit from share of results of associates	<b>3,143</b>	-
Total expenses	<b>(520,675)</b>	(378,645)
Profit before tax	<b>10,197</b>	44,736
Earning per share - basic (cents per share)	<b>3</b>	37

The Group recorded a statutory profit before tax for the year of \$10.2m, a decrease of 77% year on year (2014: \$44.7m).

Total statutory revenue increased \$104m (25%) to \$528m, driven by:

- a \$54m increase in interest revenue in the Australian Mortgage and Asset Finance businesses, Spanish lending business, and Pepper South Korea, reflecting the organic growth of these underlying businesses; and
- a \$58m increase in fee revenue in the UK and Irish servicing businesses, reflecting the improved performance of these businesses.

Total statutory expenses increased \$142m (38%) to \$521m, driven by:

- a \$84m increase in employee benefits expenses, reflecting the ongoing investment into the growth of the Group's core businesses together with the recognition of share based payment expenses of \$33m accelerated as part of the IPO process;
- a \$20m increase in borrowing costs, reflecting growth in the Group's lending businesses; and
- a \$16m increase in net loan loss expenses in line with the growth of underlying portfolios in Australia, South Korea and Spain, and entry into unsecured higher margin business opportunities in South Korea and Spain.

The Group performed in line with forecast, reflecting ongoing growth across the Group and continued investment into consumer lending in Australia, Spain and South Korea and into mortgage lending in the UK.

### Financial review (continued)

#### Balance sheet

	Year ended 31 December 2015 \$'000	Year ended 31 December 2014 \$'000
<b>Statutory balance sheet extract</b>		
Loans and advances	5,652,260	3,963,660
Investment in associates	94,075	-
Total assets	6,546,375	4,867,709

The Group's loans and advances grew by \$1.7bn (43%) underpinning its core profitability, driven by origination growth in Australia, South Korea and Spain.

In May 2015, the Group acquired a 12% interest in Prime Credit Holdings Ltd, a consumer finance business in Hong Kong and China from Standard Chartered Bank. This investment has been classified as an investment in an associate due to the Group's significant involvement in the financial and operating policy decisions of Prime Credit Holdings Ltd.

#### Equity

	Year ended 31 December 2015 \$'000	Year ended 31 December 2014 \$'000
<b>Total equity attributable to the owners of the company</b>		
Issued capital	296,065	143,517
Retained earnings	118,431	116,876
Foreign currency translation reserve	18,839	7,547
Other equity and reserves	(23,961)	(19,726)
<b>Total equity</b>	<b>409,374</b>	<b>248,214</b>

In July 2015, the Group embarked on an Initial Public Offering (IPO) and listed on the ASX under the ASX ticker code: PEP. The IPO comprised an offer of 53.2 million new shares, and the sale of 2.3 million existing shares, at an offer price of \$2.60 per share, increasing the Group's issued capital by \$130m after transaction costs.

Total other comprehensive income for the year increased 370% compared with the prior period to \$10m (31 December 2014: \$2.1m) driven by an \$11.3m net movement in the foreign currency translation reserve from translating the Group's foreign operations, caused by the weakening of the Australian dollar against the Hong Kong dollar and Pound Sterling. This increase was offset by a net movement of \$1.2m in the cash flow hedge reserve (31 December 2014: \$0.4m net decrease).

#### Significant changes in state of affairs

The most significant change to the Group's state of affairs recorded during the year was the IPO that took place on 31 July 2015, when Pepper Group Limited (the Company), listed on the ASX. Please refer to the general information section in note 1.

Additionally noted in the second paragraph of the principal activities and review of operations section of this report, the acquisition of a 12% interest in the Prime Credit Group, and the entry into the Hong Kong and Chinese markets are considered significant.

There were no other significant changes in the state of affairs of the Group during the financial year.

## Remuneration report

---

*Letter from the Chairman*

Dear Shareholders,

On behalf of the Board, I am pleased to present you with Pepper's first Remuneration Report.

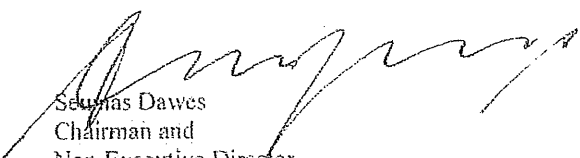

This has been an exciting and successful year for Pepper, which included listing on the Australian Securities Exchange on 31 July 2015.

- The Board has adopted and implemented a remuneration structure that aligns with the Group's strategy and is appropriate for Pepper's new listed environment. There are three main components to the Company's remuneration structure:
  1. a fixed remuneration component that comprises base salary and compulsory employer superannuation contributions;
  2. an 'at risk' cash short term incentive (STI), which is subject to both individual and Group financial and non-financial performance measures. Payment of 20% of the cash award is deferred for 3 years; and
  3. an 'at risk' long term incentive (LTI) award of performance rights and loan shares which is subject to net profit after tax and return on equity performance conditions.

The Board is committed to ensuring that remuneration outcomes link to Company performance and the long term interests of shareholders. The Board considers that the current remuneration arrangements achieve this goal and these arrangements will continue to apply in FY2016.

I am pleased to report that for FY2015, Pepper achieved both its NPAT target of \$47 million and ROAE target of 20%. Based off this strong result, the CEO's each received 92% of their maximum "stretch" STI award, and the CFO received 90% of his maximum "stretch" STI award. As noted above, a portion of this award will be deferred for 3 years. No LTI tranches were due to vest in FY2015 and as a result there has been no vesting of LTI.

On behalf of the Board, I invite you to read the 2015 Remuneration Report and welcome any feedback that you may have.

Chairman and  
Non-Executive Director

### Remuneration governance and framework

#### Role of the Board and Remuneration and Nomination Committee

The Board is responsible for establishing, and overseeing the implementation of, the Company's remuneration structure and ensuring that it is competitive and appropriate for the Company's circumstances and performance, and aligned with the long-term interests of Pepper and its shareholders.

The Remuneration and Nomination Committee has been established to assist the Board with these responsibilities. The Remuneration and Nomination Committee is comprised of three Non-executive Directors:

- Seumas Dawes (Chair)
- Matthew Burlage
- Des O'Shea

The role of the Remuneration and Nomination Committee is to review key aspects of Pepper's remuneration structure and arrangements and make recommendations to the Board. The Committee reviews and recommends:

- arrangements for the senior executives (including annual remuneration and participation in incentive plans);
- major changes and developments in the Company's remuneration, recruitment, retention and termination policies and procedures for senior management;
- major changes and developments to the Company's equity incentive plans; and
- remuneration arrangements for Non-executive Directors.

#### Use of remuneration consultants and other advisors

The Remuneration and Nomination Committee sought advice from external advisors during the process of developing Pepper's remuneration framework. The Committee intends to continue to obtain external independent advice when required, and will use it to guide and inform their considered decision-making. During FY2015, the Remuneration and Nomination Committee engaged remuneration specialists, Egan and Associates to conduct a review and provide advice on the remuneration structure for KMP.

#### Notes

1 – Total fixed remuneration includes base salary and compulsory employer superannuation contributions.

2 – This reflects the STI amounts awarded to the CEOs and CFO in respect of FY2015 but does not include any amount of the FY2015 award that has been deferred.

# Remuneration report

## Remuneration governance and framework (continued)

Under the terms of the engagement with Egan and Associates, ‘remuneration recommendations’ were provided as defined under the Corporations Act 2001 and the consultant was paid \$71,379 (including GST) during the reporting period for these services. No other advice was sought from Egan and Associates during the period.

The engagement of Egan and Associates was based on an agreed set of protocols that would be followed by the consultant to enable them to carry out their work, including gathering information and forming recommendations, free from undue influence by members of the KMP to whom the recommendations may relate. Under the engagement, Egan and Associates reported to the Chair of the Remuneration and Nomination Committee.

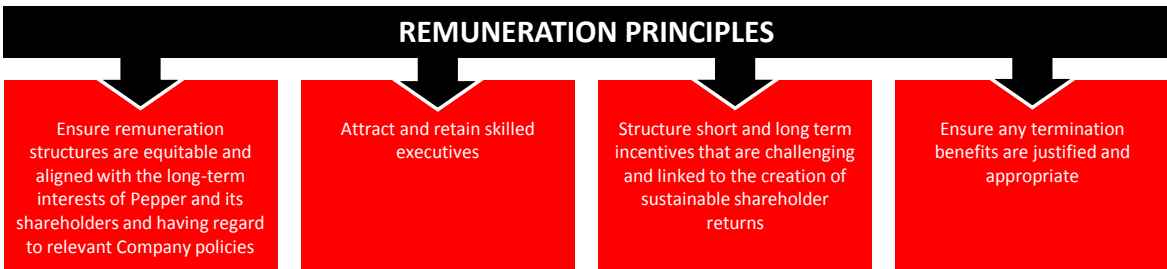

The Board undertook its own inquiries and review of the processes and procedures followed by Egan and Associates and is satisfied that their remuneration recommendations were made free from undue influence by members of the KMP about whom the recommendations may relate.

## Remuneration policy and guiding principles

### Executive remuneration

The Board is committed to developing and maintaining a remuneration framework that is competitive and appropriate for the Company’s circumstances and performance, and aligned with the long-term interests of Pepper and its shareholders. A robust remuneration and reward framework that supports and encourages safe growth, and drives our people, is critical to the successful execution of our strategy.

In considering executive remuneration, the Board and the Remuneration and Nomination Committee are guided by the following principles:

### Non-executive Director remuneration

Pepper’s remuneration policy for Non-executive Directors aims to ensure that Pepper can attract and retain suitably qualified and experienced Directors having regard to:

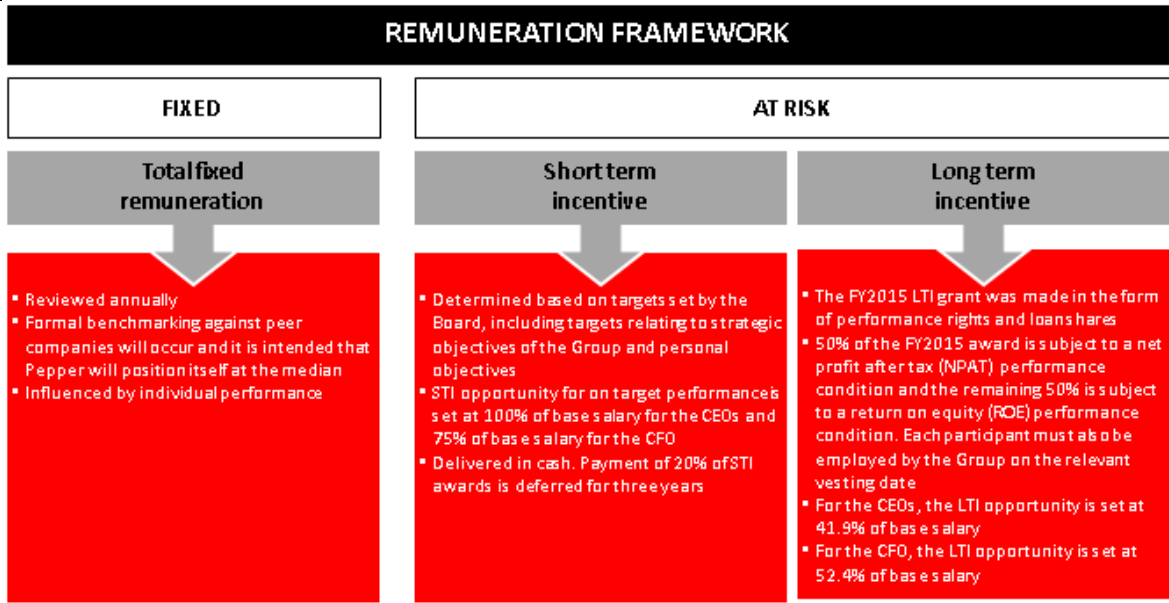

- the level of fees paid to non-executive directors of other comparable Australian companies;
- the size and complexity of Pepper’s operations; and
- the responsibilities and work requirements of Board members.

## Remuneration mix and components

The Company’s current compensation arrangements for KMP were disclosed in the Prospectus dated 17 July 2015.

The components of remuneration are structured to create a mix of short-term and long-term incentives that motivate executives to deliver sustained returns. The Company’s executive remuneration framework is summarised below.

### C. EXECUTIVE REMUNERATION IN DETAIL

#### *Details of components of executive remuneration*

##### **Fixed remuneration**

The remuneration of all senior executives includes a fixed component comprised of base salary and employer superannuation contributions.

Fixed remuneration is regularly reviewed by the Remuneration and Nomination Committee with reference to each senior executive's individual performance and relevant comparative compensation in the market.

Benchmarking of fixed remuneration of the senior executives was conducted during FY2015 against peer companies. Fixed remuneration for senior executives is market-aligned to similar roles in companies of a comparable size, complexity and scale to Pepper. Fixed remuneration is generally set at market median levels.

##### **Short term incentive**

Set out below is an explanation of the terms and conditions applying to the STI arrangements for the senior executives in FY2015.

<b>Overview of the STI plan</b>	The STI plan is the 'at-risk' cash based component of executive remuneration which is subject to the satisfaction of performance conditions.																				
<b>Participation</b>	The CEOs, CFO and other members of senior management are eligible to participate in the STI plan.																				
<b>Performance period</b>	1 January 2015 to 31 December 2015																				
<b>STI opportunity</b>	<p>The STI opportunities of the KMP are set out below:</p> <table border="1"> <thead> <tr> <th></th> <th colspan="3">Level of performance</th> </tr> <tr> <th></th> <th>Threshold</th> <th>Target</th> <th>Outstanding/stretch</th> </tr> </thead> <tbody> <tr> <td>Michael Culhane</td> <td>75% of base salary</td> <td>100% of base salary</td> <td>125% of base salary</td> </tr> <tr> <td>Patrick Tuttle</td> <td>75% of base salary</td> <td>100% of base salary</td> <td>125% of base salary</td> </tr> <tr> <td>Cameron Small</td> <td>50% of base salary</td> <td>75% of base salary</td> <td>100% of base salary</td> </tr> </tbody> </table> <p>If performance is assessed as below acceptable, no STI award will be paid.</p>		Level of performance				Threshold	Target	Outstanding/stretch	Michael Culhane	75% of base salary	100% of base salary	125% of base salary	Patrick Tuttle	75% of base salary	100% of base salary	125% of base salary	Cameron Small	50% of base salary	75% of base salary	100% of base salary
	Level of performance																				
	Threshold	Target	Outstanding/stretch																		
Michael Culhane	75% of base salary	100% of base salary	125% of base salary																		
Patrick Tuttle	75% of base salary	100% of base salary	125% of base salary																		
Cameron Small	50% of base salary	75% of base salary	100% of base salary																		
<b>Performance conditions</b>	<p>Both financial and non-financial performance conditions apply to STI awards. 40% of the STI award relates to the achievement of financial targets based on the Group's financial results (including 3 year average ROAE and NPAT), and 60% is based on achievement of Divisional and Personal KPI's. The financial targets were set in accordance with the Group's financial strategy for FY2015.</p> <p>Divisional KPI's include cost, volume and reporting targets aligned to the Group's financial strategy whilst Personal KPI's relate to leadership, risk and financial metrics.</p> <p>A combination of financial and non-financial performance conditions have been chosen because the Remuneration and Nomination Committee believes that there should be a balance between financial measures and more strategic non-financial measures which in the medium to longer term will ultimately drive future growth and return for shareholders.</p>																				

## Remuneration report

<p><b>Measurement of performance conditions</b></p>	<p>Following the end of the financial year, the Remuneration and Nomination Committee assesses the performance of the CEOs and CFO against the performance conditions set by the Board and determines the actual level of award for the KMP for FY2015.</p> <p>Performance against the relevant performance conditions is assessed annually as part of the broader performance review process for each individual. The financial KPIs are based on the Group's audited financial statements. The use of financial statements ensures the integrity of the measure and alignment with the true financial performance of the Company.</p> <p>Non-financial KPIs are assessed quantitatively where possible. Where quantitative assessment is not possible, qualitative performance appraisals are undertaken by the Remuneration and Nomination Committee</p> <p>For the purpose of testing the achievement of the ROAE hurdle, NPAT will be adjusted NPAT (being, net profit after tax adding back non-cash amortisation of finite life intangible assets recognised following acquisitions undertaken by the Group), but will also be adjusted for NPAT arising from new equity raised for acquisitions. For the FY2015 award, NPAT will be calculated in the same manner as pro forma forecast NPAT (subject to any adjustment for equity raised for acquisitions, if relevant) as set out in section 3 of the Prospectus</p>
<p><b>Delivery of STI awards</b></p>	<p>STI awards will be paid in cash.</p> <p>80% of each STI award is paid shortly after the release of the audited results for FY2015.</p> <p>The remaining 20% will be deferred for a period of 3 years, subject to a continuous service condition.</p>
<p><b>Treatment on cessation of employment</b></p>	<p>If a member of KMP ceases employment with the Group before STI performance conditions are achieved, any entitlement to an STI bonus for that year will be forfeited unless the Board determines otherwise.</p> <p>If a member of KMP ceases employment before the end of the deferral period in respect of an STI award, any entitlement to deferred STI will be forfeited unless the Board determines otherwise.</p>

### *Percentage of STI paid and forfeited for senior executives for FY2015*

The table below details the STI awards received by senior executives for FY2015, as well as the percentage of the maximum that was awarded and forfeited.

Senior executives	Target STI opportunity	Outstanding / Stretch STI opportunity	Actual STI awarded (\$) <sup>1</sup>	Actual STI awarded as % of maximum STI	% of maximum STI award forfeited
Michael Culhane	\$750,000	\$937,500	\$862,500	92%	8%
Patrick Tuttle	\$750,000	\$937,500	\$862,500	92%	8%
Cameron Small	\$300,000	\$400,000	\$360,000	90%	10%

Note

<sup>1</sup> – Payment of 20% of this amount will be deferred until February 2019.

### Long term incentive

Set out below is an explanation of the terms and conditions applying to the LTI awards for senior executives in FY2015.

<b>Overview of the LTI plan</b>	The LTI plan is the 'at-risk' equity component of executive remuneration which is subject to the satisfaction of long term performance conditions.
<b>Participation</b>	The CEOs, CFO and other members of senior management are eligible to participate in the LTI plan.
<b>Instrument</b>	For FY2015, awards were delivered using a combination of Performance Rights and a loan to acquire Loan Shares.
<b>Performance Rights</b>	Performance Rights are rights to receive a share in the Company. Upon vesting, each performance right entitles the senior executive to one share.  Performance Rights are granted for nil consideration and no amount is payable on vesting.
<b>Loan and Loan Shares</b>	Participants are provided with a limited recourse loan from the Company for the sole purpose of subscribing for Loan Shares. Loan Shares are shares in the Company which are held on trust for the participants subject to the satisfaction of performance conditions and repayment of the loan.  Loans are interest free and have a term of seven years.  Any Loan Shares which vest will continue to be held on trust until the loan is repaid in full or the loan period expires.
<b>Performance period</b>	FY2015 LTI awards are divided into three equal tranches. The relevant performance periods are as follows: <ul style="list-style-type: none"> <li>• Tranche 1: 1 January 2016 to 31 December 2016</li> <li>• Tranche 2: 1 January 2017 to 31 December 2017</li> <li>• Tranche 3: 1 January 2018 to 31 December 2018</li> </ul> The awards will be subject to retesting as explained below.
<b>Performance conditions</b>	In order for any of the Performance Rights or the Loan Shares to vest, certain conditions must be met.  Service condition  Each participant must be employed by the Group on the relevant vesting date. The vesting date is in April after the end of each performance period for each tranche.  NPAT and ROE conditions  Each grant of Performance Rights, Options and Loan Shares (as appropriate) (LTI Awards) under the LTI Scheme will vest in three equal tranches (each a Tranche). For each of the Tranches:  (1) 50% of the LTI Awards are subject to an NPAT performance condition (NPAT Vesting Entitlement); and  (2) 50% of the LTI Awards are subject to a ROE performance condition (ROE Vesting Entitlement),  each a Vesting Entitlement.

**Remuneration report**

	<p>For Tranche 1 of each of the 2015 and 2016 LTI Awards only, 100% of the NPAT Vesting Entitlement will occur on achievement of a 25% increase, or greater, in NPAT for FY2016 relative to FY2015. If the increase in NPAT is less than 25%, none of the NPAT Vesting Entitlement will occur.</p> <p>For Tranches 2 and 3 of the 2015 and 2016 LTI Awards and Tranches 1, 2 and 3 of any subsequent grants of LTI Awards, the NPAT Vesting Entitlement is determined as follows:</p> <table border="0" style="width: 100%;"> <thead> <tr> <th style="text-align: left;">NPAT performance condition (percentage increase on prior year NPAT)</th> <th style="text-align: left;">% of NPAT Vesting Entitlement that will vest</th> </tr> </thead> <tbody> <tr> <td>Less than 15%</td> <td>Nil</td> </tr> <tr> <td>15% – 17.49%</td> <td>30% + 0.08% for each basis point in excess of 15% up to 17.49% (rounded to the nearest whole number)</td> </tr> <tr> <td>17.5% – 19.99%</td> <td>65% + 0.08% for each basis point in excess of 17.5% up to 19.99% (rounded to the nearest whole number)</td> </tr> <tr> <td>20% or greater</td> <td>100%</td> </tr> </tbody> </table> <p>For all Tranches, the ROE Vesting Entitlement is determined as follows:</p> <table border="0" style="width: 100%;"> <thead> <tr> <th style="text-align: left;">ROE performance condition</th> <th style="text-align: left;">% of ROE Vesting Entitlement that will vest</th> </tr> </thead> <tbody> <tr> <td>Less than 12%</td> <td>Nil</td> </tr> <tr> <td>12% – 15.99%</td> <td>30% + 0.05% for each basis point in excess of 12% up to 15.99% (rounded to the nearest whole number)</td> </tr> <tr> <td>16% – 19.99%</td> <td>65% + 0.05% for each basis point in excess of 16% up to 19.99% (rounded to the nearest whole number)</td> </tr> </tbody> </table>	NPAT performance condition (percentage increase on prior year NPAT)	% of NPAT Vesting Entitlement that will vest	Less than 15%	Nil	15% – 17.49%	30% + 0.08% for each basis point in excess of 15% up to 17.49% (rounded to the nearest whole number)	17.5% – 19.99%	65% + 0.08% for each basis point in excess of 17.5% up to 19.99% (rounded to the nearest whole number)	20% or greater	100%	ROE performance condition	% of ROE Vesting Entitlement that will vest	Less than 12%	Nil	12% – 15.99%	30% + 0.05% for each basis point in excess of 12% up to 15.99% (rounded to the nearest whole number)	16% – 19.99%	65% + 0.05% for each basis point in excess of 16% up to 19.99% (rounded to the nearest whole number)

## Remuneration report

<p><b>Treatment on cessation of employment</b></p>	<p>If the participant ceases employment for cause, unless the Board determines otherwise, any unvested LTI awards will lapse or be forfeited as appropriate.</p> <p>In all other circumstances:</p> <ul style="list-style-type: none"> <li>• unless the Board determines otherwise, a pro rata portion of the unvested tranche of LTI awards for the financial year in which the participant ceases employment (calculated by reference to the portion of the relevant financial year that has elapsed up to the date of their cessation) will remain on foot and will vest in due course if the performance conditions are achieved (save that the continuing employment and retesting conditions will not apply); and</li> <li>• any unvested LTI awards (including other tranches) will automatically lapse or be forfeited.</li> </ul> <p>Where Loan Shares are forfeited, the corresponding loan obligation will be extinguished and any voluntary repayments that the participant has made against the loan (other than as result of dividends paid and applied to the repayment of the loan by the Company) will be repaid to the participant.</p>
<p><b>Treatment in the event of a change in control</b></p>	<p>In the event of a takeover event, the Board has discretion to vest any Performance Rights or Loan Shares, based on performance against the performance conditions up to the date of the change of control.</p> <p>Where only some of the Performance Rights or Loan Shares are vested on a change of control, the remainder will immediately lapse or be forfeited (as the context requires).</p> <p>The Board also has discretion to provide a participant with shares in a company that has obtained control of the Company on vesting of Performance Rights.</p>

### *Executive service agreements*

All senior executives are party to a written executive service agreement with Pepper.

#### *Key terms of Executive Service Agreement for CEOs and CFO*

Duration	Ongoing term
Fixed Remuneration for FY2015	Michael Culhane – \$750,000 per annum base salary plus superannuation Patrick Tuttle – \$750,000 per annum base salary plus superannuation Cameron Small – \$400,000 per annum base salary plus superannuation
Periods of notice required to terminate and termination payments	Either party may terminate the contract by giving 6 months' notice. The Company may terminate immediately in certain circumstances, where the relevant senior executive engages in serious or wilful misconduct, he has been convicted of an offence punishable by imprisonment or he has been dishonest, misleading or deceptive in the course of his dealings with the Board.

### **D. Non-executive Director remuneration**

#### *Principles of Non-executive Director remuneration*

As outlined in section B, Pepper's remuneration policy for Non-executive Directors aims to ensure that Pepper can attract and retain suitably qualified and experienced Directors having regard to:

- the level of fees paid to non-executive directors of other major Australian companies;
- the size and complexity of Pepper's operations; and
- the responsibilities and work requirements of Board members.

#### *Current fee levels and fee pool*

The current Non-executive Director fee pool has been set by Pepper at \$800,000 per annum. Annual directors' fees to be paid by Pepper are \$75,000 (plus superannuation) to the Chairman and other Non-executive Directors, inclusive of Committee fees.

Other payments may be made for additional services outside the scope of Board and Committee duties. Directors are also entitled to be remunerated for all reasonable travel and other expenses reasonably incurred in attending to Pepper's affairs.

There are no retirement benefit schemes for Non-Executive Directors.

#### *IPO arrangements*

As disclosed in the Prospectus, each of the Non-Executive Directors received a one-off grant of options as part of the Director's remuneration.

On 5 August 2015, each of the Non-executive Directors were allocated 75,000 options over Shares for nil consideration as part of their remuneration packages. The issue of options further enhanced the alignment of interests between Non-executive Directors and shareholders.

The options are not subject to any performance or service conditions in order to preserve the Directors' impartiality.

Each option entitles the Director to acquire one Share on payment of an exercise price. The exercise price is \$2.60, which was the offer price under the Prospectus. The options will become exercisable in three equal tranches on the 12, 24 and 36 month anniversaries of the grant. Any unexercised options will expire on 5 August 2022.

Options do not carry any dividend or voting rights prior to vesting and exercise.

Any dealing with options is prohibited, unless the Board determines otherwise. Directors will be free to deal with Shares allocated on exercise of the options, subject to the requirements of the Company's Securities Dealing Policy.

#### Notes

1 – The amounts disclosed as other benefits relate to car spaces, private health insurance, telephone and internet fees and other similar items.

2 – The value of rights and options granted to the senior executives is based on the fair value, measured using a Black Scholes simulation model. The factors and assumptions used in determining the fair value on grant date are set out in the Note 27 to the financial statements. The Grant date of the options and rights granted in 2015 was 1 August 2015. There has been no forfeiture of any options or rights granted under this plan and no options or rights have been exercised.

3 – Loan Shares are treated as options under the Australian Accounting Standards and have been included in this column.

4 – The amounts disclosed as STI relate to amounts expensed in the current year. Under the current STI arrangements 20% of an awarded STI is deferred for three years subject to a continuous service condition. Deferred components are expensed over the relevant vesting period. The amount expensed in FY2015 relating to deferred STI with a vesting date in 2017 is \$80,671. The amount expensed in FY2015 relating to deferred STI with a vesting date in 2018 is \$87,797.

5 – In February 2015 the senior executives utilised part of their STI deferred amounts from FY2013 and FY2014 to subscribe for shares at the prevailing market value. The amount expensed in 2015 relating to the cash component is included under STI (refer Note 4) and the amount expensed in 2015 relating to the equity settled component is included under Shares in the share-based payments column. The continuous service vesting condition attached to the original deferred component of the awarded bonus remains applicable to the shares being acquired under this arrangement.

### *Movements in Performance Rights and Loan Shares held by senior executives*

The following table sets out the movement during FY2015, by number and value, of Performance Rights and Loan Shares held by each member of KMP.

Australian Accounting Standards require the Loan Shares be treated as options for accounting purposes. As a result, the amounts receivable from senior executives in relation to these loans are not recognised in the financial statements.

### *Movements in loans held by senior executives*

The following table shows the movements in loans made, guaranteed or secured by the Company or Group entities to senior executives:

Name	Opening balance <sup>1</sup>	Advanced during FY2015 <sup>2</sup>	Repayments during FY2015 <sup>3</sup>	Closing balance <sup>4</sup>	Highest amount of indebtedness during the reporting period
Michael Culhane	\$965,955	\$544,752	\$ -	\$1,510,707	\$1,510,707
Patrick Tuttle	\$965,955	\$544,752	\$ -	\$1,510,707	\$1,510,707
Cameron Small	\$800,414	\$363,168	\$ -	\$1,163,582	\$1,163,582
<b>Total</b>	<b>\$2,732,324</b>	<b>\$1,452,672</b>	<b>\$ -</b>	<b>\$4,184,996</b>	<b>\$4,184,996</b>

### *Legacy arrangements – Michael Culhane and Patrick Tuttle*

Entities associated with Michael Culhane and Patrick Tuttle have each entered into a loan agreement with the Company under which the Company has lent each of them money in connection with shares they held in a Group entity which were exchanged for shares in the Company in connection with the Group's restructure prior to listing. The loans are interest free and limited recourse, and due to be repaid on 31 January 2021 (or such later date agreed by the Company). For legal reporting reasons, the amount of interest that would have been charged on each of the loans on an arms-length basis would have been \$60,011 for Michael Culhane and \$60,011 for Patrick Tuttle, based on an arms-length rate of 5.05%.

### *Legacy arrangements – Cameron Small*

Cameron Small was granted a limited-recourse, interest free loan from the Company to facilitate the exercise of options to acquire shares in connection with an employee incentive scheme. These shares are subject to a lien until such time as the outstanding loan amount is repaid in full. These shares are also subject to escrow arrangements in connection with the Company's IPO. The loan is due to be repaid on 31 December 2023 (or such later date agreed to by the Company). For legal reporting reasons, the amount of interest that would have been charged on this loan on an arms-length basis would have been \$47,908, based on an arms-length rate of 5.05%.

### Notes

1 – The opening balance is attributable to legacy arrangements that existed pre-IPO. A summary of the terms and conditions of these loans is set out below.

2 – This column relates to loans provided by the Company under the LTI plan to acquire Loan Shares. See below and section C for further details.

3 – No repayments have been made during the period

4 – There were no write-downs or allowances for doubtful receivables recognised by the Group in respect of loans referred to in this table.

## Remuneration report

### *LTIP arrangements – Michael Culhane and Patrick Tuttle*

The loans were provided by the Company under the LTI plan to acquire Loan Shares. They are interest free and limited recourse, and due to be repaid on 29 December 2022. For legal reporting reasons, the amount of interest that would have been charged on each of the loans on an arms-length basis would have been \$11,230 for Michael Culhane and \$11,230 for Patrick Tuttle, based on the commercial borrowing rate of Pepper of 5.05%.

### *LTIP arrangements – Cameron Small*

The loan was provided by the Company under the LTI plan to acquire Loan Shares. The loan is interest free and limited recourse, and due to be repaid on 29 December 2022. For legal reporting reasons, the amount of interest that would have been charged on the loan on an arms-length basis would have been \$7,487, based on the commercial borrowing rate of Pepper of 5.05%.

Dear Board Members

### **Pepper Group Limited**

In accordance with section 307C of the Corporations Act 2001, I am pleased to provide the following declaration of independence to the directors of Pepper Group Limited.

As lead audit partner for the audit of the financial statements of Pepper Group Limited for the financial year ended 31 December 2015, I declare that to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

Yours sincerely

# Independent Auditor's Report to the members of Pepper Group Limited

## Report on the Financial Report

We have audited the accompanying financial report of Pepper Group Limited which comprises the consolidated balance sheet as at 31 December 2015, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of cash flows and the consolidated statement of changes in equity for the year ended on that date, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration of the consolidated entity, comprising the company and the entities it controlled at the year's end or from time to time during the financial year as set out on pages 34 to 93.

### *Directors' Responsibility for the Financial Report*

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error. In Note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with International Financial Reporting Standards.

### *Auditor's Responsibility*

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. Those standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control, relevant to the company's preparation of the financial report that gives a true and fair view, in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## *Auditor's Independence Declaration*

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*. We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of Pepper Group Limited, would be in the same terms if given to the directors as at the time of this auditor's report.

## *Opinion*

In our opinion:

- (a) the financial report of Pepper Group Limited is in accordance with the *Corporations Act 2001*, including:
  - (i) giving a true and fair view of the consolidated entity's financial position as at 31 December 2015 and of its performance for the year ended on that date; and
  - (ii) complying with Australian Accounting Standards and the *Corporations Regulations 2001*; and
- (b) the consolidated financial statements also comply with International Financial Reporting Standards as disclosed in Note 1.

## **Report on the Remuneration Report**

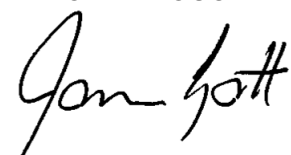

We have audited the Remuneration Report included in pages 14 to 32 of the directors' report for the year ended 31 December 2015. The directors of the company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

## *Opinion*

In our opinion the Remuneration Report of Pepper Group Limited for the year ended 31 December 2015, complies with section 300A of the *Corporations Act 2001*.

## Notes to the consolidated financial statements For the year ended 31 December 2015

---

### Note 1 – About this report

The information presented in note 1 is considered relevant to an understanding of the financial statements.

#### General information

These consolidated financial statements are for the consolidated group (the Group), consisting of Pepper Group Limited (the Company) and its controlled entities for the year ended 31 December 2015. These financial statements were approved and authorised for issue by the Board of Directors on 26 February 2016.

The Group embarked on an initial public offering ("IPO") and listed on the Australian Securities Exchange ("ASX") on 31 July 2015, and from that date forward the ordinary shares of the Company were publicly traded. The ASX ticker code is PEP. The Company is incorporated and domiciled in Australia and is a company limited by shares.

The Company is a for-profit entity for the purpose of preparing financial statements.

#### Basis of preparation

For the year ended 31 December 2014 the Group's consolidated financial statements were general purpose financial statements prepared in accordance with Australian Accounting Standards – Reduced Disclosure Requirements as issued by the Australian Accounting Standards Board (AASB).

For the year ended 31 December 2015 the Group prepared (full) general purpose financial statements in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board and the Corporations Act 2001. In addition to the recognition, classification and measurement principles previously complied with, these also comply with the disclosure and presentation principles.

In accordance with AASB 1 'First time adoption of Australian Accounting Standards' the Group has adopted all relevant AASB standards for the year ended 31 December 2015. As the Group previously issued AASB compliant general purpose consolidated financial statements (for the year ended 31 December 2009), resuming application results in full application of Australian Accounting Standards (AAS). No recognition, classification or measurement adjustments have been noted as a result of resuming the application of AAS.

#### *Historical cost convention*

The financial statements have been prepared on the basis of historical cost, except for the following exceptions:

- derivative financial instruments – measured at fair value.
- investment securities – measured at fair value.
- other investments – some balances are measured at fair value as disclosed in the relevant note.

#### *Compliance with IFRS*

For the year ended 31 December 2015 the consolidated financial statements of the Group also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

#### *Rounding*

The amounts contained in this financial report are presented in Australian dollars (the Group's functional currency) and rounded to the nearest thousand dollars unless otherwise stated, under the option available under ASIC Class Order 98/100.

#### *Basis of consolidation*

The consolidated financial statements incorporate the financial statements of the Company and all entities controlled by the Company. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

## Notes to the consolidated financial statements For the year ended 31 December 2015

---

### Note 1 – About this report (continued)

#### *Basis of consolidation (continued)*

The Company reassesses whether or not it controls an investee if facts and circumstances indicate there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders.
- potential voting rights held by the Company, other vote holders or other parties.
- rights arising from other contractual arrangements.
- any additional facts and circumstances that indicate the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated income statement and statement of other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Each component of comprehensive income is attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

All intragroup assets and liabilities, equity, income, expenses, changes in ownership interests and cash flows relating to transactions between members of the Group are eliminated in full on consolidation. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

#### *Deconsolidation of subsidiaries*

During the year ended 31 December 2015, the Group recorded the deconsolidation of two subsidiaries: Pepper High Income Fund and Pepper Investment Grade Credit Fund, and the consolidation of two entities: PEPL Holdings Pty Ltd and the Pegaso Consumer Finance limited recourse entity. None of these subsidiaries are considered material and have not been disclosed as a disposal or acquisition of a subsidiary.

### **Foreign currency translation**

#### *Functional and presentation currency*

Items included in the financial statements of each of the Group's entities are measured in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each group entity are presented in Australian dollars (\$), which is the functional currency of the Company and the presentation currency for the consolidated financial statements.

#### *Transactions and balances*

Foreign currency transactions are translated into the functional currency at the rates of exchange prevailing at the dates of the transactions. Exchange differences on monetary items are recognised in the income statement in the period in which they arise except for exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), or exchange differences on transactions entered into in order to hedge certain foreign currency risks.

## Notes to the consolidated financial statements For the year ended 31 December 2015

---

### Note 1 – About this report (continued)

#### Foreign currency translation (continued)

##### *Transactions and balances (continued)*

At the end of each reporting period, balances are translated as follows:

- monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date.
- non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was measured.
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

##### *Group companies*

The results and balance sheet of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the Group's presentation currency as follows:

- assets and liabilities are translated into Australian dollars using exchange rates prevailing at the end of the reporting period.
- income and expenses are translated at the average exchange rates for the period, unless exchange rates fluctuated significantly during that period, in which case the exchange rates at the dates of the transactions are used.
- exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity (attributed to non-controlling interests as appropriate).

Goodwill and fair value adjustments, on identifiable assets and liabilities acquired, arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences arising are recognised in other comprehensive income and accumulated in equity.

#### Financial instrument accounting policies

##### *Classification*

Financial assets and financial liabilities are classified into the following specified categories:

- cash and cash equivalents.
- financial assets and financial liabilities at fair value through profit or loss (FVTPL).
- held-to-maturity investments.
- available-for-sale financial assets.
- loans and receivables.
- financial liabilities at amortised cost.

The classification depends on the purpose for which the related items were acquired. Management determines the classification of its investments at initial recognition and, in the case of assets classified as held-to-maturity, re-evaluates this designation at the end of each reporting period.

Issued financial instruments or their components are classified as liabilities if the contractual arrangement results in the Group having a present obligation to either deliver cash or another financial asset, or a variable number of equity shares, to the holder of the instrument, if this is not the case, the instrument is generally an equity instrument and the proceeds included in equity, net of transaction costs.

### Note 1 – About this report (continued)

#### Financial instrument accounting policies (continued)

##### *Recognition*

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset.

##### *Measurement – Initial*

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

##### *Measurement – Subsequent*

Subsequent to initial recognition the Group measures its financial instruments as follows:

- Cash and cash equivalents, loans and receivables, held-to-maturity investments, and financial liabilities at amortised cost (deposits and borrowings) are subsequently carried at amortised cost using the effective interest method.
- Financial assets and financial liabilities classified as such are measured at fair value with changes in fair value being recognised in the income statement.
- Available-for-sale financial assets are measured at fair value with changes in fair value being recognised in other comprehensive income.

##### *Impairment*

At each balance sheet date, the Group assesses whether there is objective evidence that any financial asset or group of financial assets has been impaired as a result of one or more events occurring since they were initially recognised (a “loss event”) and whether that loss event (or events) has (have) an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and collectively for financial assets that are not individually significant. Objective evidence may include significant financial difficulties of an obligor, adverse changes in the payment status of borrowers or local economic conditions that correlate with defaults on a group of financial assets. If there is objective evidence that financial assets are impaired, an impairment expense is recognised for the difference between the carrying amount of the asset and the present value of estimated future recoverable cash flows, taking into account any guarantees.

Where there is no objective evidence that an impairment loss has been incurred on a financial instrument considered individually, be it significant or not, the Group includes that financial asset in a group of financial assets having similar characteristics in terms of credit risk and tests the whole group for impairment. The amount of impairment on a group of homogeneous assets is determined on the basis of historical loss data, where relevant, for assets with credit risk characteristics similar to those in the portfolio. Impairment losses are recognised in the income statement and reflected in an allowance account against the relevant assets.

If an event occurring after the impairment was recognised causes the amount of impairment loss to decrease then the decrease in impairment loss is reversed through the income statement. Impairment losses on available for sale investment securities are recognised by reclassifying the losses accumulated in the available for sale fair value reserve in equity to the income statement.

### Note 1 – About this report (continued)

#### Financial instrument accounting policies (continued)

##### Derecognition

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the income statement.

On derecognition of a financial asset other than in its entirety the Group allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in the income statement. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

When financial instruments classified as available-for-sale are sold, the accumulated fair value adjustments recognised in other comprehensive income are reclassified to the income statement as gains and losses.

### Note 2 – Application of new and revised accounting standards

#### New and amended standards adopted by the Group

In the opinion of management there are no standards or amendments mandatorily applicable for the current reporting period which have had any impact on the current period or any prior period, or are likely to affect future periods.

#### New standards and interpretations not yet adopted

Certain new accounting standards and interpretations have been published that are not mandatory for the 31 December 2015 reporting period and have not been early adopted by the Group. The Group's assessment of the impact of these new standards and interpretations is set out below.

##### *AASB 9 Financial instruments: effective for annual reporting periods beginning on or after 1 January 2018*

AASB 9 replaces the existing guidance in AASB 139 *Financial Instruments: Recognition and Measurement*. AASB 9 includes revised guidance on the classification and measurement of financial instruments, including a new expected credit loss model for calculating impairment on financial assets, and the new general hedge accounting requirements. It also carries forward the guidance on recognition and de-recognition of financial instruments from AASB 139.

The Group is currently assessing the potential impact on its consolidated financial statements resulting from the application of AASB 9, which has not yet been determined. Given the nature of the Group's operations, this standard is expected to have a pervasive impact on the Group's financial statements.

## Notes to the consolidated financial statements For the year ended 31 December 2015

---

### Note 2 – Application of new and revised accounting standards (continued)

#### New standards and interpretations not yet adopted (continued)

*AASB 15 Revenue from contracts with customers: effective for annual reporting periods beginning on or after 1 January 2018.*

AASB 15 replaces the existing revenue recognition guidance in AASB 18: *Revenue* and AASB 111: *Construction Contracts*. AASB 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. The Group is in the process of assessing the full impact of the application of AASB 15. The financial impact on the financial statements has not yet been determined.

There have been no other new or amended accounting standards during the reporting period ended 31 December 2015 that have had or may have a significant impact on the financial results of the Group.

*IFRS 16 Leases: effective for annual reporting periods beginning on or after 1 January 2019.*

IFRS 16 introduces a new lease accounting model for lessees that requires lessees to recognise all leases on balance sheet, except for short-term leases and low value assets and amortisation of lease assets and interest on lease liabilities in the income statement. The AASB is expected to issue the Australian Accounting Standard incorporating the new Standard without modification, as soon as practicable. Once the new Standard is issued in Australia, it will be mandatorily effective for reporting periods beginning on or after 1 January 2019. The Group is in the process of assessing the impact of the application of IFRS 16. The financial impact on the financial statements has not yet been determined.

### Note 3 - Critical accounting estimates and judgements

The preparation of financial statements requires the use of judgment, estimates and assumptions. Should different assumptions or estimates be applied, the resulting values may change, impacting the net assets and income of the Group. These estimates and assumptions are reviewed on an ongoing basis. The nature of significant estimates and judgements made are noted below.

#### Determination of impairment losses on loans and advances

The Group assesses at each balance date whether there is any objective evidence of impairment. In determining whether objective evidence exists, and whether an impairment loss should be recorded in the income statement, the Group makes judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a loan before the decrease can be identified within an individual loan. Such evidence may include payment defaults, increased historic loss rates and trends in the relevant industry or market. The carrying value of loans and advances, as well as further information on the impairment provisions, is set out in note 10. Additionally for further information on how the Group manages its credit risk please see note 30.

#### Goodwill and other intangible assets

Determining whether goodwill or other indefinite life intangible assets are impaired requires an estimation of the value in use of the cash generating units to which goodwill has been allocated. The value in use calculation requires management to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, an impairment loss may arise. In addition, determining the estimated useful lives of definite life intangible assets requires the use of judgement. For further information please see note 14.

#### Revenue recognition and effective interest rate method

The measurement at amortised cost using the effective interest rate requires calculations based on reliably estimated cash flows through the expected life of a financial instrument incorporating behavioural model of prepayments. Determining the cash flows and the expected life of a financial instrument implies behavioural modelling. Any fees accounted for using the effective interest rate method are assessed by management who apply judgement to ensure recognition in the most appropriate period. For further information please see note 5.

**Notes to the consolidated financial statements**  
**For the year ended 31 December 2015**

**Note 4 – Earnings per share**

*Methodology*

Basic earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the period. Diluted earnings per share is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, which include the share options granted to employees.

During the year a share split occurred, which resulted in the issuance of shares without a corresponding change in the resources of the Group. This means that in accordance with AASB 133 the Group have presented the earnings per share calculation as if the shares on issue after the share split were on issue for the full period for each period presented (retrospectively adjusting the 2014 calculation presented).

**Notes to the consolidated financial statements**  
**For the year ended 31 December 2015**

**Note 5 – Revenue and expenses**

**Revenue recognition**

*General*

Revenue arises in the course of ordinary activities of the Group and is measured at the fair value of the consideration received or receivable. It is recognised when it is probable that future economic benefits will flow to the entity and these benefits can be measured reliably.

*Effective interest rate accounting*

Loans are measured on an amortised cost basis in the balance sheet. This requires that, for all loan assets, revenue is recognised over the estimated (not contractual) life of the loan, taking into account all income and expenditure directly attributable to the loan, in the same way that all these factors would be taken into account in determining an investment return for a product. The rate at which revenue is recognised is referred to as the effective interest rate and is equivalent to the rate that effectively discounts estimated future cash flows throughout the estimated life to the net carrying value of the loan. The revenue stream includes interest revenue, mortgage risk fees received at loan settlement, loan premium revenue and early termination interest adjustments payable upon early redemption of a loan. Acquisition costs such as upfront broker commissions paid are also spread across the expected life of the loan. Similarly, introductory interest rate discounts are spread over the expected life of the loan rather than the discount period.

*Servicer fees*

Fees earned in the Group's role as servicer, including trust manager, performance and servicer fees are recognised as the services are provided and in line with amounts due and payable as set out in the relevant trust manager and performance fee deeds and servicer fee letters pertaining to each trust.

*Other fee income*

Advisory fees primarily represent income earned by the Pepper Property Group. The material components of other fee revenue are application fees, post settlement fees and performance fees.

Fee income is recognised and invoiced in the period in which it is earned.

*Employee benefits*

Employee benefits expenses are recorded for benefits to employees in respect of wages and salaries, bonuses, share based payments, annual leave and long service leave and are recognised in respect of employees' services up to the end of the reporting period. See note 20 for further information on recognition and measurement of employee benefits.

*Borrowing costs*

Borrowing costs include interest on deposits, coupon payments to notes issued and other interest paid on non-securitised funding facilities are recognised under the effective interest rate method. See further detail under revenue section of this note.

*Loan loss expenses*

Loan loss expenses include specific and collective provisions for loan impairment and other direct loan write offs recorded during the year.

**For the year ended 31 December 2015**

**Note 6 – Segmental reporting**

The accounting policies of the reportable segments are the same as the Group's accounting policies described throughout this financial report. All assets and liabilities are allocated to reportable segments including goodwill which is allocated to reportable segments as described in note 14.

The Group's executive management team examines the Group's performance both from a product and geographic perspective and has identified the following operating and reportable segments:

- The ANZ Division includes the revenues and direct expenses associated with the loan origination, servicing and other operations conducted by Pepper in Australia and New Zealand. This comprises residential prime and non-conforming mortgage lending, auto and equipment finance lending, servicing of Pepper-controlled limited-recourse funding vehicles and third-party funding vehicles, property advisory services and investment management services for third party funds. The ANZ Division also recognises income generated under a services agreement with Prime Credit under which Pepper provides certain strategic and treasury-related advisory services, and also oversight of certain operational functions and transitional arrangements.
- The International Division includes the revenues and direct expenses associated with lending and servicing operations conducted by Pepper outside Australia and New Zealand. Pepper presently derives revenue and profits in Ireland, the United Kingdom, Spain, South Korea, Hong Kong and China. The products and services offered currently include residential mortgage loans, point-of-sale finance and personal loans, SME lending in Korea, and the servicing and management of Pepper-controlled and third-party funding vehicles. Equity accounted profits from Pepper's 12% equity interest in Prime Credit are reported as a share of associate profit or loss within the International Division.

In addition to those segments identified above the executive management team have identified the Corporate Division for inclusion in this disclosure. Although not meeting the strict definition of an operating segment, by virtue of the fact it does not earn revenues, management believe that the division is essential to understanding how the business is run.

- The Corporate Division represents group executives' (central executive and the principal investments team) costs and group support functions not specifically aligned to business operations in the ANZ Division or International Division (e.g. Finance, Treasury, Risk, HR, Legal and IT). Interest costs associated with Pepper's corporate debt facilities are also presented as part of the Corporate Division together with operating foreign exchange gains or losses.

## Notes to the consolidated financial statements

### For the year ended 31 December 2015

---

#### Note 7 – Taxation

Income tax expense comprises current and deferred tax. Tax is recognised in the income statement, except when it relates to items that are recognised in other comprehensive income or directly in equity, in which case it is recognised in the relevant section. Tax effects arising from the initial recognition of a business combination is included in the accounting for that business combination.

##### *Australian tax consolidated group*

The Company and its wholly-owned Australian entities have formed a consolidated group for Australian income tax purposes. All entities within the tax consolidated group have entered into a tax sharing and funding agreement. The agreement is intended to limit joint and several liabilities for the applicable taxes.

The members of the tax consolidated group have agreed to pay to the Company an amount equal to the income tax that would otherwise be payable if the member was separately liable to pay income tax. Such amounts are reflected in amounts receivable from or payable to other entities in the tax consolidated group.

##### *Current tax*

Current tax payable is based on taxable profit for the year and is calculated at the income tax rates applicable to group entities that have been enacted or substantively enacted in each jurisdiction at balance date.

##### *Deferred tax*

Deferred tax is accounted for using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases. Deferred tax assets and liabilities are not recognised in respect of the following temporary differences:

- those arising from the initial recognition of goodwill.
- those arising from the initial recognition of other assets and liabilities (other than in a business combination) that affects neither the taxable income nor the accounting profit.
- those related to investments in subsidiaries to the extent that it is probable that they will not reverse in the foreseeable future.

Deferred tax assets are recognised where it is probable that future taxable profits will be available against which the asset can be utilised.

Deferred tax is determined using the tax rates that are expected to apply in the period in which the liability will be settled or realised, based on income tax rates (and tax laws) that have been enacted or substantively enacted at balance date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and the Group intends to settle them on a net basis.

**(e) Unrecognised deferred tax assets**

There are unused tax losses in the Group, for which no deferred tax asset has been recognised as the measurement of any recognisable deferred tax asset is still highly uncertain and not reliably measureable.

**Notes to the consolidated financial statements**  
**For the year ended 31 December 2015**

**Note 8 – Investment securities**

Investment securities comprise short term securities held at various times by the South Korean Mutual Savings Bank as part of its liquidity management program. These may, and will, fluctuate in size depending on the needs of the bank at any given point in time.

*Available-for-sale (AFS) financial assets*

The Group has investments in unlisted securities that are not traded in an active market but that are classified as AFS financial assets and stated at fair value. Gains and losses arising from changes in fair value are recognised in other comprehensive income and accumulated in the AFS reserve, with the exception of impairment losses, interest calculated using the effective interest method, and foreign exchange gains and losses on monetary assets, which are recognised in the income statement. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the AFS reserve is reclassified to the income statement.

The fair value of AFS monetary assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. The foreign exchange gains and losses that are recognised in the income statement are determined based on the amortised cost of the monetary asset.

*Held-to-maturity investments*

Bills of exchange and debentures with fixed or determinable payments and fixed maturity dates that the Group has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are measured at amortised cost using the effective interest method less any impairment.

In addition to those outlined above, the Group's general accounting policies applicable to financial instruments are outlined in note 1.

## Notes to the consolidated financial statements For the year ended 31 December 2015

### Note 9 – Receivables

#### *Trade receivables*

Trade receivables are amounts comprised primarily of servicing receivables earned in the ordinary course of business across the Group.

#### *Other debtors*

This balance comprises various other sundry balances which management do not consider being core to the Group's business.

#### *Trail commission assets*

Trail commissions receivable that are payable to third parties. See note 18 for trail commission liabilities

	As at 31 December 2015 \$'000	As at 31 December 2014 \$'000
Trail commission deed receivables	4,221	7,465
Trade receivables <sup>1</sup>	56,456	40,975
Other debtors <sup>2</sup>	10,010	115,560
<b>Total receivables</b>	<b>70,687</b>	<b>164,000</b>

### Note 10 – Loans and advances

Loans and advances are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are carried at amortised cost using the effective interest rate method. They arise when the Group provides money directly to a debtor with no intention of selling the contract.

Debt securities acquired which are categorised as loans and receivables are initially recognised at fair value plus transaction costs. Subsequently, they are carried at amortised cost and interest income is recognised in the income statement using the effective interest rate method.

#### *Deferred transaction costs*

Transaction costs representing set up costs specific to the trusts are capitalised on the balance sheet as part of loans and advances. These costs are amortised to the income statement in line with the reduction in the underlying mortgage portfolio as part of the effective interest rate on the mortgage receivables.

#### Notes

1 – Balance includes \$1.9m of lease receivables, for which an impairment provision of \$1.7m has been provided during the year. \$21m of the trade receivable 2014 comparative balance has been reclassified (primarily from other debtors) to more accurately reflect the nature of the balance.

2 – Other debtors as at 31 December 2014 included a \$101m receivable due to a loan portfolio sale recorded. \$21m of the other debtors 2014 comparative balance has been reclassified to trade receivables to more accurately reflect the nature of the balance.

In addition to the above, as mentioned in note 9, an additional impairment provision of \$1.7m has been provided during the year ended 31 December 2015 relating to leases receivables (31 December 2014: \$nil).

Please refer to risk management disclosures relating to credit risk in note 30 for further information on the management of and exposure to credit risk.

Notes

1 – The 2014 comparative balances have been reclassified to reflect the split between the collective and specific provision.

2 – Balances primarily relate to loan portfolio sales in South Korea.

**Notes to the consolidated financial statements**  
**For the year ended 31 December 2015**

**Note 11 – Other investments**

*Investments classified as loans and receivables*

This balance is primarily comprised of a number of debt portfolio investments held by the Group. These are accounted for using amortised cost accounting. See note 5 for further information on amortised cost accounting.

*Financial assets at fair value through profit or loss (FVTPL)*

Financial assets are classified at FVTPL when the financial asset is either held for trading or it is designated as at FVTPL. In 2014 the Group consolidated two Pepper managed investment funds which carried a number of investments at FVTPL. During 2015, the two investment funds were deconsolidated.

Notes

1 – Other investments primarily include equity investments and interests in managed funds.

2 – \$3.4m of the 31 December 2014 comparative balance for prepayments has been reclassified to 'property related security deposits' to more accurately reflect the nature of the balance.

## Notes to the consolidated financial statements

### For the year ended 31 December 2015

---

#### Note 13 – Investment in associates

##### *General*

Associates are all entities over which the Group has significant influence but not control or joint control. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

##### *Equity method*

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in the income statement, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognised as a reduction in the carrying amount of the investment.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. On acquisition of an investment in an associate, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in the income statement in the period in which the investment is acquired.

The carrying amount of equity-accounted investments is tested for impairment in accordance with the policy described in note 14.

##### *Prime Credit Holdings Limited*

On 6 May 2015, the Group acquired a 12% interest in Prime Credit Holdings Limited, a consumer finance business in Hong Kong and China from Standard Chartered Bank for a consideration of \$65.9m US dollars. This investment has been classified as an investment in an associate due to the Group's significant involvement in the financial and operating policy decisions, including Board representation of Prime Credit Holdings Limited.

The Prime Credit Group's reporting currency is Hong Kong dollars and Pepper's investment in Prime Credit Holdings Limited is held in Hong Kong dollars and translated into the Group's reporting currency (AUD) at each reporting date. The summarised financial information presented below in accordance with AASB 12 is the AUD equivalent amounts.

**Note 14 – Intangible assets & Goodwill**

*Nature of intangible assets*

The intangible assets of the Group are best described as follows:

- *Goodwill* – recognised as the cost over and above the identifiable net assets on acquisition of Pepper Property Group and the Oakwood servicing business in the UK.
- *Mortgage servicing rights* - The mortgage servicing rights relate to servicing contracts held by the servicing business acquired in the UK.
- *South Korean banking registration* – The registration gives the South Korea Savings Bank the right to operate as a mutual savings bank in South Korea for an indefinite period of time. This was recognised on acquisition of the bank.
- *Licence fees & software* – Capitalised information technology costs.

## Notes to the consolidated financial statements

### For the year ended 31 December 2015

---

#### Note 14 – Intangible assets & Goodwill (continued)

##### Accounting policies

###### *Amortisation and useful lives*

The Group amortises intangible assets using the straight-line method over the following periods:

- Software costs and licence fees – 2-3 years.
- Mortgage servicing rights – 10 years.
- South Korean Mutual Banking Registration – indefinite life (not amortised).
- Goodwill – indefinite life (not amortised).

###### *Goodwill*

Goodwill arising on an acquisition of a business is carried at cost as established at the date of the acquisition of the business less accumulated impairment losses, if any.

Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

###### *Mortgage servicing rights & South Korean banking registration*

Both of these intangible assets have been acquired through business combinations and were initially recognised at their fair value on the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, the servicing rights, which have a finite life, are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful life. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

The South Korean mutual banking registration (KMBR) is considered to have an indefinite useful life as it is expected to contribute future economic benefits to the Group indefinitely through the right to operate as a savings bank established under the mutual savings bank act of the Republic of Korea. The KMBR, being an indefinite life intangible, is carried at cost less accumulated impairment losses. The KMBR is allocated to a cash-generating unit for impairment testing purposes. Before recognition of impairment losses, the carrying amount of the KMBR was allocated to the South Korean cash-generating unit and collectively compared to the value in use of the South Korean cash generating unit.

**Notes to the consolidated financial statements**  
**For the year ended 31 December 2015**

**Note 14 – Intangible assets & Goodwill (continued)**

**Testing for impairment**

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units).

*Indefinite life intangible assets*

<b>Cash Generating Unit (CGU)</b>	<b>Pepper Korea</b>	<b>Pepper Property Group</b>	<b>United Kingdom – servicing</b>

<b>Valuation assumptions used:</b>			
- Forecast period	3 years	3 years	3 years
- Average revenue growth rate	50.58%	10.61%	10.39%
- Long term growth rate (beyond year 3)	0.60%	2.00%	0.40%
- Discount rate applied	11.10%	11.40%	10.30%

*Approach followed to determine the value of assumptions used*

<b>Assumption</b>	<b>Approach in determining value</b>
Forecast period	The forecast period is the period over which management consider forecasting most reliable (and is consistent with the Group's approach to forecasting).
Average revenue growth rates	This is based on management's expectation of the cash generating unit's development in the market over the 3 year period when considering past performance.
Terminal growth rate	Industry average long term growth rate, consistent with external sources of data and economic forecasts.
Discount rate	Reflect specific risks relating to the relevant segments and the countries in which they operate.

The Group performed sensitivity analysis and stress testing of the above assumptions for all cash generating units. As a result of the testing performed, Directors believe, as at 31 December 2015, any reasonable possible change in the key assumptions on which recoverable amount is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of the cash-generating unit.

#### Note 17 – Borrowings

All borrowings are initially recognised at fair value of the consideration received less directly attributable transaction costs. After initial recognition, interest bearing borrowings are measured at amortised cost using the effective interest method. For further detail on the amortised cost basis of accounting see note 5 revenue and expenses.

	Year ended 31 December 2015 \$'000	Year ended 31 December 2014 \$'000
Securitised funding facility	2,577,597	2,288,292

Corporate debt facility	38,001	98,085
<b>Total borrowings</b>	<b>5,201,525</b>	<b>4,182,050</b>

Securitised funding facilities are secured only on the assets of each of the individual securitisation trusts. Warehouse facilities are fully secured by the loans and advances and other cash collateral residing in the warehouse trusts, the current value of which is less than the value of the mortgage assets. Corporate debt facilities are secured over certain assets of the Group.

#### *Non-recourse facilities*

During the year ended 31 December 2015, \$1.2bn of new securitised funding facilities were obtained (31 December 2014: \$1.19bn) and \$116m of existing securitised funding facilities was repaid in full (31 December 2014:\$109m).

#### *Corporate facilities*

As at 31 December 2015 the Group had an undrawn balance of \$92m on its corporate debt facility (31 December 2014: \$16m).

#### Note 18 – Other liabilities

#### *Settlement balances*

Settlement balances arising from the timing of funds collected by the Group yet to be passed onto customers. These balances are predominantly held within the Group's servicing and the South Korean banking businesses.

#### *Other*

This balance is made up of a large number of individually immaterial amounts. Among the drivers of this balance are accruals built up within Pepper's servicing businesses which will be subsequently passed on to customers.

#### Note 19 – Leases where the Group is the Lessee

##### *Accounting policy*

Leases are classified as finance leases whenever the terms of the lease substantially transfer all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

##### *Operating leases*

Operating leases primarily relate to the lease of buildings with lease terms generally being of between 2 and 10 years. Most operating lease contracts over 2 years contain clauses for annual yearly market rental reviews. The Group does not have an option to purchase the leased properties at the expiry of the lease periods.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred. In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

##### *Future minimum lease payments under non-cancellable operating leases*

**Note 20 – Provisions**

*Accounting policy*

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

*Bonuses & other employee benefits*

Employee benefit liabilities are recognised for benefits accruing to employees in respect of wages and salaries, bonuses, annual leave and long service leave and are recognised in respect of employees' services up to the end of the reporting period. The measurement of such employee benefit liabilities is as follows:

- Short-term employee benefits (those expected to be settled within 12 months after the end of the reporting period) are measured at their nominal values using the remuneration rate expected to apply at the time of settlement.
- Long term employee benefits are measured as the present value of the estimated future cash outflows to be made by the Group in respect of services provided by employees up to reporting date.

During the first half of 2015, the Company issued seven thousand new A class shares and fourteen thousand new ordinary shares, and redeemed twenty one thousand G class redeemable convertible preference shares.

On 31 July 2015, the Group embarked on an initial public offering ("IPO") and listed on the Australian Securities Exchange ("ASX"). On the date of the IPO, all outstanding A and B class shares, together with existing ordinary shares, were converted into new ASX listed ordinary shares in Pepper Group Limited on a 500 for 1 basis, resulting in 17m new ordinary shares exchanged for the A class shares and 2.5m exchanged for the B class shares.

In addition to the share conversion outlined above, the Group issued 53.2m new ordinary shares at an offer price of \$2.60 per share, raising an additional \$138.4m of capital. The net impact of the issuance was \$129.6m after transaction costs of \$8.8m post tax (\$12.6m less deferred tax of 3.8m) were deducted.

During the year, the Company also issued 10.163m shares under its various employee share schemes and gift offer. Further information on shares under option is included in note 27.

Note

1 – In July 2015 a share split occurred which resulted in the conversion of 235,434 shares into 117,717,000 new ordinary shares without a change in resources.

<b>Equity / Reserve</b>	<b>Nature</b>
Employee benefits reserve	The employee benefits reserve has arisen as a result of equity settled share based payments accounted for under AASB 2. Further information about share based payments to employees is set out in note 27.
Common control reserve	The common control reserve arose as a result of a transaction between entities with common control.
Treasury shares	Treasury shares represent shares held on trust for employee share schemes and are deducted from shareholders' equity.
Currency translation reserve	The currency translation reserve represents the cumulative gains and losses on the retranslation of the Group's net investment in foreign operations, net of the effects of hedging.
Cash flow hedge reserve	The cash flow hedge reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of hedging instruments entered into for cash flow hedges. The cumulative gain or loss arising on changes in fair value of the hedging instruments that are recognised and accumulated in the cash flow hedge reserve will be reclassified to the income statement only when the hedged transaction affects the profit or loss.

Note

1 – The 2015 currency translation reserve balance includes \$0.5m of other comprehensive income from an associate (31 December 2014: \$nil).

**Note 23 – Material subsidiaries**

Details of the Group's material subsidiaries at the end of the reporting period are set out below. Unless otherwise stated, they have share capital consisting solely of ordinary shares that are held directly by the Group, and the proportion of ownership interests held equals the voting rights held by the Group. The country of incorporation is also their principal place of business.

Pepper Savings Bank Co. Limited	Financial services - lending	Korea	100%	100%

There are no non-wholly owned subsidiaries of the Group that have non-controlling interests that are material to the Group.

**Note 24 – Structured entities**

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity and the relevant activities are directed by means of contractual arrangements. The Group considers all special purpose entities in which it has interests to be structured entities.

*Consolidated structured entities*

Pepper's funding strategy is primarily based on its use of long term limited-recourse loan funding structures. Typically, loans are initially funded via wholesale bank debt facilities and then periodically refinanced through the issuance of term securitisations in debt capital markets. As a result of this, and as a result of Pepper controlling them, most of these entities are consolidated.

Securitisations involve transferring assets into a vehicle that sells beneficial interests to investors through the issue of debt and equity notes with varying levels of subordination. The notes are collateralised by the assets transferred to these vehicles and pay a return based on the returns of those assets, with residual returns paid to the most subordinated investor.

**Notes to the consolidated financial statements**  
**For the year ended 31 December 2015**

**Note 24 – Structured entities (continued)**

*Non-consolidated structured entities*

The Group's interests in non-consolidated structured entities can be categorised as follows:

- Investments in non-Pepper special purpose vehicles (SPVs). Each of the SPVs Pepper has an investment in, is designed to invest in and manage consumer, commercial or residential loan portfolios. The SPVs' finance themselves by issuing note securities which entitle the holder to a specified stream of cash flows from the loan portfolios.
- Receivables earned in the course of servicing non-Pepper SPVs.

The nature and extent of the Group's interests, as well as the Group's maximum exposure to loss, can be summarised as follows:

	Commerial	Residential	Consumer	Total
	\$'000	\$'000	\$'000	\$'000
<b>At 31 December 2015</b>				
<b>Balance Sheet</b>

<b>Maximum exposure to loss</b>	<b>25,189</b>	<b>376</b>	<b>336</b>	<b>25,901</b>

The Group's maximum exposure to loss is limited to the carrying value of any investments in or receivables from the structured entities, as listed above. There are no additional off balance sheet arrangements with non-consolidated structured entities which would expose the Group to potential loss.

During the year the Group earned interest from its investments, and servicing revenue from servicing contracts with a number of structured entities. Refer to note 5 for further information on revenues earned.

Notes

- 1 – Investments in non-consolidated SPVs are reported in the Group's other investments balance, refer to Note 11.  
2 – Receivables from non-consolidated SPVs are reported in the Group's trade receivables balance, refer to Note 9.

Detailed remuneration disclosures are provided in the remuneration report on pages 14 to 32.

*Transactions with other related parties*

Loans to Directors are explained in note 27 to the financial statements. These loans are interest free and have been made in relation to shares held in a Group entity which were exchanged for shares in the Company in connection with the Group's restructure prior to listing on the ASX, acquisition of shares under a legacy employee incentive scheme and the acquisition of shares under the company LTI Plan.

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below.

During the year, group entities entered into the following transactions with related parties that are not members of the Group:

	<b>Year ended</b> <b>31 December</b> <b>2015</b> <b>\$'000</b>	Year ended 31 December 2014 \$'000

**Note 26 – Notes to the statement of cash flows**

*Accounting policy*

Cash and cash equivalents comprise cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to a known amount of cash, which are subject to an insignificant risk of changes in value and have a maturity of three months or less at the date of acquisition.

Cash at the consolidated level includes the cash balances held in trusts that are controlled entities. The cash balance that is held in trusts can only be used in accordance with the provisions of their respective transaction documents.

Cash at the end of the year as shown in the cash flow statement is reconciled to the related items in the balance sheet as follows:

#### Note 27 – Share based payments

##### *General*

The Group provides benefits to employees of the Group through share-based incentives. Employees are paid for their services or incentivised for their performance in part through shares or rights over shares.

##### *Equity-settled share-based payments*

During the year a number of equity settled share based payment plans have been in place. These transactions involve the Group receiving services and compensating the relevant parties via the provision of equity instruments of the Group.

##### *Measurement*

As part of the process of accounting for share based payments the Group is required to measure the fair value of the options granted because it is not possible to reliably measure the fair value of the employee services rendered. The Group has used the Black Scholes valuation technique to estimate the fair value of the equity instruments issued to employees.

##### *Recognition*

The fair value determined at the grant date is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in the income statement such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the share based payment reserve.

*Description of schemes*

<b>Scheme</b>	<b>Description</b>	<b>Status</b>
Long-term incentive (LTI) Scheme	<p>The Company has established a LTI Scheme to assist in the motivation, retention and reward of senior management and to align the interests of executives and senior management with the interests of shareholders.</p> <p>The LTI Scheme permits the grant of awards comprising of:</p> <ul style="list-style-type: none"> <li>- Performance Rights; or</li> <li>- Either Options or Loan Shares.</li> </ul> <p>Performance Rights are an entitlement to receive a Share for no consideration upon satisfaction of applicable vesting conditions.</p> <p>Options are an entitlement to acquire a Share upon satisfaction of applicable vesting conditions and payment of an applicable exercise price.</p> <p>Participants will be provided with a loan from the Company for the sole purpose of subscribing for Loan Shares to be held on trust for them subject to satisfaction of applicable vesting conditions and subject to repayment of the loan and with recourse limited to the Loan Shares.</p>	Open
General Legacy Schemes	Under legacy schemes in existence between 2011 and 2015, participants purchased a beneficial interest in shares held on trust. These schemes are closed, have fully vested, and have been fully expensed.	Closed - shares fully vested.
Global Legacy Scheme	Under a separate legacy scheme established in 2015 (the Global Legacy Scheme), participants (or their nominees) have been granted global legacy shares and global legacy units, each issued for nil consideration. These schemes are closed, have fully vested, and been fully expensed but participants are still subject to limited restrictions.	Closed - subject to limited restrictions.
Non-Executive Director Options	On 1 July 2015, each of the Non-Executive Directors received, for nil consideration, a grant of 75,000 options as part of the Director's remuneration package. Each option entitles the Director to acquire one Share at the price of \$2.60. The options will vest in three equal tranches on the 12, 24 and 36 month anniversaries of the grant. The options are not subject to any performance or service conditions.	Open
Employee Gift Offer	During the year, as part of the IPO, shares were offered to certain employees under the Employee Gift Offer for nil consideration in parcels of up to \$1,000 in value. The total value of shares gifted was \$716,245.	Closed - shares fully vested.

##### *Terms & Conditions for material schemes*

<b>Scheme</b>	<b>Terms &amp; Conditions</b>
<b>LTI Scheme</b>	<p>The key management personnel and other senior management are eligible to participate in the LTI scheme. For the year ended 31 December 2015 the awards were delivered using a combination of Performance Rights and a loan to acquire Loan Shares.</p> <p>The 2015 LTI awards are divided into three equal tranches. The relevant performance periods are as follows:</p> <ul style="list-style-type: none"><li>- Tranche 1: 1 January 2016 to 31 December 2016</li><li>- Tranche 2: 1 January 2017 to 31 December 2017</li><li>- Tranche 3: 1 January 2018 to 31 December 2018</li></ul> <p>Each LTI award will vest based on the performance of the Group in each of the three consecutive financial years (with the first tranche vesting in 2017 in the case of the 2015 and 2016 LTI awards and in 2018 in the case of the 2017 LTI Award). Each participant must be employed by the Group on the relevant vesting date.</p> <p>With the exception of the first tranche of each of the 2015 and 2016 LTI awards, the vesting conditions for the LTI awards will be apportioned:</p> <ul style="list-style-type: none"><li>- 50%, to an adjusted net profit after tax (NPAT) growth performance condition, and</li><li>- 50%, to a return on equity (ROE) performance condition.</li></ul> <p>For the NPAT performance condition of the 2015 LTI awards, vesting will occur on achievement of a 25% increase, or greater, in NPAT for 2016 relative to 2015.</p>
<b>General legacy schemes</b>	<p>The Group has previously established a number of employee incentive schemes (each a Legacy Scheme) for employees of the Group in Australia and the United Kingdom.</p> <p>While the shares are held in trust, participants are entitled to any income on those Shares but will not be entitled to vote those shares. The Incentive Scheme Trustee is entitled to vote the shares held by it on trust.</p>
<b>Global legacy scheme</b>	<p>The benefits issued under the Global Legacy Scheme are subject to voluntary escrow arrangements preventing participants from disposing of their shares for an applicable period.</p> <p>Once the shares are released from escrow, participants will be entitled to direct the Incentive Scheme Trustee to deal with the shares on their behalf (with the exception of certain shares issued under the 2015 General Legacy Scheme which remain subject to forfeiture conditions, which if not satisfied result in forfeiture).</p>
<b>Employee loans</b>	<p>The Group has provided limited-recourse loans to its executives and senior employees enabling them to exercise previously issued options. In accordance with AASB 2 the Group treated these as share options and treasury shares. The exercise date of the options is the date or dates the loans are repaid.</p>

*Valuation*

The weighted average fair value of the share options granted during the financial year is 43 cents (31 December 2014: \$98.66). Options were priced using the Black Scholes option valuation model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioural considerations.

*Quantitative data*

Cross currency interest rate swaps	Level 2	Discounted cash flow. Forward exchange rates, contract forward rates, appropriate discount rates.	23,080	59,805

In the year to 31 December 2015 there has been no change in the fair value hierarchy or the valuation techniques applied to interest rate or foreign exchange derivatives.

For further information on the use of derivatives please see the financial risk management note below.

**Notes to the consolidated financial statements**  
**For the year ended 31 December 2015**

**Note 29 – Financial assets and financial liabilities (continued)**

*Fair value of assets and liabilities not measured at fair value*

The Group has considered all financial assets and liabilities not carried at fair value to determine whether the carrying value is an accurate reflection of fair value. For financial assets and liabilities whose carrying value does not accurately reflect the fair value, the Group performed a discounted cash flow valuation to determine fair value at the balance date.

The table below shows a comparison of the carrying amounts, as reported on the balance sheet, and the fair values (level 3) of those financial assets and liabilities that are measured at amortised cost where the carrying value recorded in the balance sheet does not approximate to fair value.

	As at 31 December 2015		As at 31 December 2014

**Note 30 – Financial risk management (continued)**

**Risk management program**

The Board has overall responsibility for the establishment and oversight of the risk management framework. The Board has established an Audit & Risk Committee which is responsible for overseeing a number of risk areas across the Group, including: the Company's relationship with internal and external auditors; the preparation of the financial statements and reports; the process of identification and management of risks (including financial controls and systems). The Audit & Risk Committee reports to the Board on its activities.

The Group's activities expose it to a variety of financial risks: credit risk, market risk (including interest rate risk and foreign currency risk) and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group.

**Derivatives & hedge accounting**

Derivatives are used for hedging financial risks as part of the Group's approach to risk management. They are not used for speculative purposes.

During the period the Group held interest rate & cross currency interest rate derivatives for risk management purposes that meet the required documentation and hedge effectiveness criteria for cash flow hedge accounting.

The Group use cash flow hedges to hedge cash flow risk associated with: funding received in foreign currencies, and at variable interest rates.

Cash flow hedges are accounted for as follows:

- day 1 costs are priced into the derivative and capitalised and amortised over the life of the hedged item.
- the fair value gain or loss associated with the effective portion of the derivative is recognised initially in other comprehensive income, and then recycled to the income statement in the same periods the hedged item affects the income statement.
- Any ineffective portion of the gain or loss on the hedging instrument is recognised in the income statement immediately.

**Credit risk**

Credit risk arises from the financial assets outlined below, as well as credit exposures to customers, including outstanding receivables.

To manage credit risk, the Group has established strong risk management teams who bring together a wealth of knowledge and experience in loan origination, servicing and arrears management capabilities across the Group.

*Maximum exposure to credit risk*

The carrying amount of the Group's financial assets represents the maximum credit exposure. The Group's exposure to credit risk at the reporting date was:

	<b>31 December</b>	31 December
	<b>2015</b>	2014
	<b>\$'000</b>	\$'000

<b>Total potential exposure to credit risk</b>	<b>6,325,105</b>	4,720,994

As at 31 December 2015, over 82% of the Group's cash and cash equivalents are held with banks or financial institutions with a credit rating of AA- or better (31 December 2014: over 95%).

In addition to the balances in the table above, the Group had \$610m of undrawn customer facilities as at 31 December 2015 (31 December 2014: \$440m).

**Note 30 – Financial risk management (continued)**

**Credit risk (continued)**

The majority of the Group's exposure to loans and advances is limited, as they are legally owned by the special purpose entities (trusts) with no recourse to the Group. Losses on mortgage loans are therefore limited to the Group's investments in notes in these trusts and the cash collateral retained in the trust. The trusts' structures are designed such that losses are covered by excess spread generated from the assets within the trusts before the investment in notes is impacted.

As distinct from the above, Pepper South Korea's loan originations are funded on-balance sheet primarily through retail customer deposits and loan portfolio sales. There is a limited market for securitisation and warehouse funding in South Korea unlike in Pepper's other core markets and the Group retains the associated credit risk with lending in South Korea.

**Liquidity and capital risk**

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due.

Pepper's funding platform currently comprises a mix of warehouse facilities, term securitisations, an unsecured debt facility (maturing in December 2017), balance sheet cash and, in the case of Pepper South Korea, customer deposits.

The majority of the Group's liabilities represent bonds issued by special purpose trusts through warehouse facilities and term securitisation transactions. Under such arrangements, bondholder recourse is limited to the assets of the relevant special purpose trust to which the liability relates and the repayment profile of the bonds is matched to the repayments collected from the loan assets. Given the limited recourse nature of these borrowings (\$4.577bn at 31 December 2015 and \$3.672bn at 31 December 2014), they have not been included in the table below.

The Group seeks to have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. The Group has cultivated valuable long term relationships with a range of domestic and global investment banks and professional mezzanine debt and fixed income investors.

Pepper South Korea is governed by the country's Mutual Savings Bank Act and is regulated by the Financial Supervisory Service and Financial Services Commission. The Group must hold a portion of highly liquid assets on their balance sheet to meet liquidity requirements in South Korea. The Group must also hold regulatory capital against its assets in South Korea. The Group is currently required to maintain a minimum South Korean regulatory Bank for International Settlements (BIS) capital ratio of 6%. As of 31 December 2015, the Group is compliant with the regulatory requirement.

**Market risk**

Market risk is the risk of an adverse impact on the Group's earnings resulting from changes in market factors, such as interest rates and foreign exchange rates.

*Interest rate risk – Cash flow and fair value*

Interest rate risk is the risk that the Group will experience deterioration in its financial position as interest rates change over time.

Interest rate exposure is created due to repricing and creating mismatches in interest rates between assets and liabilities (i.e. borrowing at floating interest rates and lending with fixed interest rates). Interest rate risk may be managed by entering into interest rate swaps subject to the Group's hedging and derivatives policies.

*Interest rate risk – Sensitivity analysis*

As outlined above, the majority of the Group's liabilities are issued through warehouse facilities and term securitisations in special purpose entities). Under such arrangements, the repayment profile of the bonds is matched to the repayments collected from the loan assets.

For illustrative purposes the Group has calculated the impact of a potential increase or decrease in borrowing costs in limited recourse entities for the year in the event of a +/- 10bps change in interest rates as shown in the table below:

	<b>31 December 2015</b>	31 December 2014
<b>10bps +/-</b>	<b>\$'000</b>	\$'000
Borrowing costs in special purpose entities	<b>3,337</b>	2,658

Any impact on funding costs in the special purpose entities as a result of changes to interest rates would be offset by a corresponding +/- impact on interest revenue proportionate to assets held.

The remainder of the Group's loan portfolio and liabilities are held in corporate entities (predominantly Pepper South Korea). The impact of a potential +/- 10bps change in interest rates on interest revenue and borrowing costs on balances held by corporate entities for the year is set out in the table below:

	<b>31 December 2015</b>	31 December 2014
<b>10bps +/-</b>	<b>\$'000</b>	\$'000
Corporate interest revenue	<b>661</b>	338
Corporate funding costs	<b>(596)</b>	(366)
<b>Total impact on corporate interest</b>	<b>65</b>	(28)

### Note 30 – Financial risk management (continued)

#### Market risk (continued)

##### Foreign exchange risk

The Group's financial reports are prepared in Australian dollars. The Group's revenues, expenses, cash flows, assets and liabilities in regions outside Australia are denominated in local currencies which include the United States Dollar, Pound Sterling, Euro, South Korean Won, Chinese Yuan and Hong Kong Dollar. The Group manages its foreign exchange risk by matching the currency of loan receivables and funding, and by monitoring the cash flow requirements of the business and regional operating subsidiaries on an ongoing basis.

The Group does not currently hedge its offshore earnings or the capital invested in the overseas operations, thereby accepting the foreign currency translation risk on invested capital and offshore earnings.

The figures in the table below indicate the potential increase or decrease in profit after tax for the year due to a +/- 10% variance in the exchange rates.

	<b>31 December</b>	31 December
