Production and Exploration Report

Quarter Ended 30 June 2016

Donald Mineral Sands Pty Ltd (DMS) and Sovereign Gold NL (SG) (both 100% controlled by Astron Corporation Limited)

DMS owns EL5255, EL5472, MIN5532, RL2002 (formerly EL4433), RL2003 (formerly EL4432) and RL2006 which was granted in March 2016 (formerly EL5353 and RLA2006), SG owns EL5186, which together comprise the Donald Mineral Sands Project (Donald Project). EL5354 (owned by SG) expired in June 2016 and was not renewed.

Donald Project

PRODUCTION

During the quarter the Donald Project did not conduct any production activities.

DEVELOPMENT

During the quarter, the development of the Donald continued with the following being undertaken:

Feasibility study

DMS has completed the technical aspects of the optimisation of the feasibility study as previously announced and work continues on the capital aspects of the optimisation. Initial indications are that improvements from the updated technical aspects and the use of Chinese equipment will be positive. An updated feasibility study is anticipated to be completed and announced within the next 3 months.

Water

As previously announced, to support the local environment, as DMS had a quantity of carryover water surplus to requirements DMS traded 5 gigalitres (5,000 megalitres) of water to the Victorian Environmental Water Holder to help protect habitat, water quality and animals in Wimmera and Glenelg waterways and the western rivers. DMS was able to contribute to this important environmental cause (at well below DMS's cost) having considered possible impacts of foreseeable future water allocations and DMS's future project commencement needs.

Exploration

As announced on 7 April 2016, a Mineral Resource update for the Donald Mineral Sands Project based on the recent drilling program.

**Work Plan**

The work plan is progressing towards submission, anticipated to be in the 4th quarter of 2016.
