

29th April 2016

MARCH 2016 QUARTERLY ACTIVITIES REPORT

Agua Resources Limited (ASX: **AGR**) (“Agua” or “Company”) is pleased to report on its activities for the March 2016 Quarter:

Operational Highlights:

- **Positive results from Três Estradas infill drill program expected to increase the current Indicated Resource (currently a JORC compliant 70.1 Mt comprised of 15.2 Mt Indicated & 54.9 Mt Inferred) for inclusion in the optimized PEA. Final calculations are expected shortly.**
- **Maiden JORC compliant resource now being prepared for Joca Tavares for inclusion within the optimized PEA.**
- **Utah based Millcreek Mining Group commissioned to lead optimisation studies for inclusion in the BFS**
- **Optimisation work will include a more detailed assessment of logistics options, and resource, metallurgy, infrastructure and by-product scenarios**
- **Updated PEA expected to be released Q2 2016**
- **Project development works advancing to schedule – column flotation test work ongoing and EIA conducted by Golder & Associates on track for submission next quarter**
- **Discussions held with regional authorities regarding fast-tracked environmental permitting, infrastructure access, and potential tax incentives**
- **Initial exploration program commenced at Terra Santa claims adjacent to Três Estradas deposit**

Corporate Highlights:

- **Paul Pint appointed as Director and Executive Chairman**
- **Company has a strong cash balance and is well funded to execute on its plans for the year**

During the March Quarter, Agua continued to focus on advancing the development of its Rio Grande phosphate assets located in the state of Rio Grande do Sul in Southern Brazil (Figure 1). In particular, advances during the quarter included positive results from an infill drilling program at Três Estradas, initial results from drilling at Joca Tavares, initial exploration at the new Terra Santa claims and a PEA optimization study by Millcreek Mining Group on the Três Estradas deposit.

Figure 1: Rio Grande Tenement Map – Refer to Tenement Register for License Details

Três Estradas Deposit

During the March quarter, Aguiá released positive results from an infill drilling program conducted in the previous quarter (Figure 2). The infill drilling program at Três Estradas was completed with 18 holes drilled. The purpose of the program is to convert Inferred resource to Indicated resource from the current level of 70.1 Mt (comprised of 15.2 Mt Indicated & 54.9 Mt Inferred) grading 4.20% P₂O₅. Assay results from 18 holes have been returned showing encouraging results including:

- TED-15-061 returned 69.0m @ 4.93% P₂O₅ (from surface), incl. 13.42m @ 10.41% P₂O₅ (from surface);
- TED-15-067 returned 61.30m @ 5.82% P₂O₅ (from 16.0m) including 16.0m @ 10.39% P₂O₅ (from 17.0m);
- TED-15-070 returned 51.90m @ 6.83% P₂O₅ (from 1.85m), 10.65m @ 3.55% P₂O₅ (from 59.6m) and 4.41m @ 3.34% P₂O₅ (from 74.45m).

Figure 2: Infill Drilling program at Três Estradas

The infill drilling program at Três Estradas allowed for the collection of ~500 kg of samples that have been shipped to Eriez Flotation Division in Pennsylvania for column flotation test work. The purpose of the test work is to optimise treatment of fines in the metallurgical process which is expected to have a positive impact on the quality of the end product and improve the recoveries. The completion of this optimisation work is targeted for Q2 2016.

During the March Quarter, Agua commissioned Millcreek Mining Group to undertake an optimisation study of the previously announced Preliminary Economic Assessment (“PEA”) at Três Estradas. This report is expected to be finalized in Q2 2016.

With critical information now available since the original PEA was released in August 2015, which reported a pre-tax IRR of 25%, NPV₅ of US\$273 million and 3.2-year payback timeframe, Millcreek is considering how the following factors could further enhance the PEA:

- Inclusion of a +600,000 tonnes per year calcite plant at the Três Estradas mining site which would enhance the cash flow of the project and minimise the volume of waste produced;
- Review of the results of JORC compliant Mineral Resource currently being conducted at Joca Tavares located just 40 km away from the Três Estradas mining site to determine whether it is beneficial to include the higher grade Joca Tavares oxide in the plans for the Três Estradas plant;
- Optimised metallurgical recoveries resulting from column floatation tests which are currently taking place at Eriez Flotation Division in Pennsylvania;

- Consideration of alternative and more cost effective logistics solutions utilising existing local infrastructure beyond road transport considered in the PEA to deliver product to market;
- Trade-off study of a phosrock only operation which would simplify the mine development timeline and reduce CAPEX requirements materially;
- Consideration of direct mine gate sales for a phosrock production scenario with a truck loading facility and rail siding at the mine site for customers to use;
- Long term currency implications given the continued fall of the Brazilian Real;
- Further optimisation of the mine plan.

During the March Quarter, Golder & Associates continued to work on baseline studies in preparation for the Environmental Impact Assessment (EIA) targeted for submission to “FEPAM”, the Rio Grande State Environmental Agency in Q2 2016. Golder is currently conducting a fauna and flora survey and working on materially reducing the volume of waste rock or waste produced.

Joca Tavares Deposit

The Company’s Joca Tavares project is also a carbonatite hosted deposit located 40 kilometres east-south-east from the Três Estradas project.

A drilling program at Joca Tavares (Figure 3) was completed with 40 holes drilled and assay results from 33 holes returned (seven holes intersected no significant mineralisation). As expected, these new assay results confirm the presence of high-grade mineralisation at surface, including some thicker intercepts with average grades similar to other mineralised carbonatites.

- JTD-15-012 returned 67.60m @ 4.44% P₂O₅ (from surface);
- JTD-15-016 returned 15.45m @ 4.33% P₂O₅ (from surface);
- JTD-15-017 returned 17.20m @ 7.15% P₂O₅ (from surface);
- JTD-15-018 returned 12.83m @ 4.88% P₂O₅ (from surface);
- JTD-15-019 returned 7.57m @ 11.25% P₂O₅ (from surface);
- JTD-15-021 returned 4.70m @ 9.61% P₂O₅ (from surface);
- JTD-15-023 returned 5.82m @ 7.22% P₂O₅ (from surface);
- JTD-15-028 returned 18.57m @ 4.53% P₂O₅(from surface)
- JTD-15-029 returned 17.42m @ 4.39% P₂O₅(from surface)
- JTD-15-030 returned 7.86m @ 5.62% P₂O₅ (from surface);
- JTD-15-035 returned 9m @ 5.33% P₂O₅ (from surface);
- JTD-15-036 returned 6.50m @ 6.26% P₂O₅ (from surface).

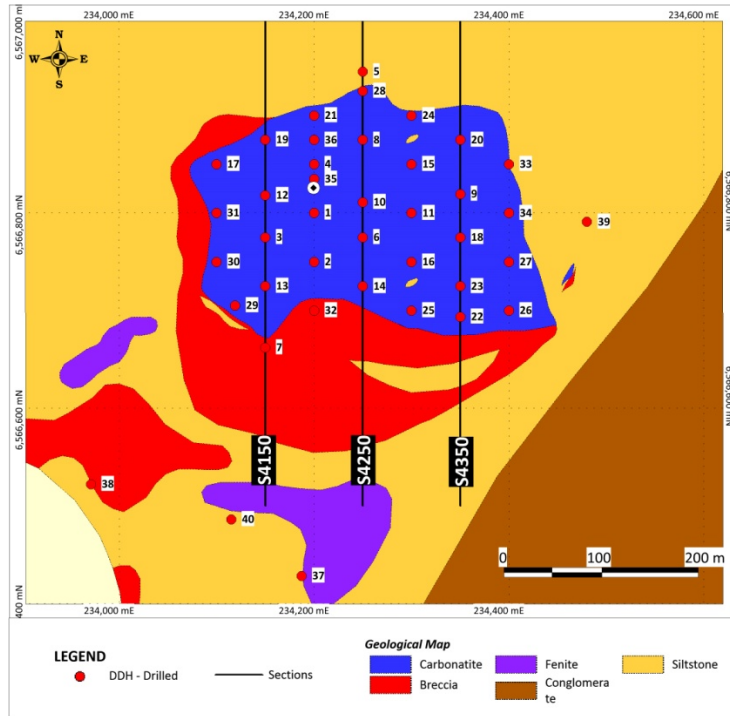

Figure 3: Drilling program at the Joca Tavares Carbonatite

Drilling at the Joca Tavares carbonatite outlines additional oxide and fresh mineralisation to supplement the Três Estradas mining plan. Agua has appointed Millcreek Mining Group to prepare a JORC compliant Mineral Resource for the deposits at Joca Tavares with completion targeted during Q2 2016.

Initial Exploration of New Terra Santa Claims at Rio Grande

On November 26th 2015, Agua entered into an Option Agreement with Mineração Terra Santa S.A., for exploration permits located in Lavras do Sul, in the State of Rio Grande do Sul, Brazil. The agreement gives the Company the option to purchase 100% of 3 (three) Mineral claims, with a view to conducting mineral exploration work over the next 36 months.

In March 2016, Agua commenced a preliminary exploration program along the Terra Santa claims which are immediately adjacent to the Três Estradas deposit. The exploration program will include soil sampling along a 200 x 25m sampling grid, which will cover an airborne radiometric anomaly analogous to those at Três Estradas and where grab rock samples previously returned up to 11.57% P₂O₅. Contingent upon results of this sampling, Agua may infill the geochemical grid with 100m-spaced lines and proceed with ground geophysics and drilling.

Lucena Phosphate Project

The Lucena Phosphate Project, comprised of 48 tenements and applications for 345,5km², contains an initial JORC compliant Inferred Mineral Resource of 55Mt grading 6.42% P₂O₅ in the state of Paraíba in north eastern Brazil. A feature of the Lucena tenement is outcropping limestone, which is a potential commercialisation opportunity given the presence of a number of cement plants in the region. There was no activity during the March Quarter.

Mata da Corda Phosphate Project

The Mata da Corda tenements are subject to an Option Agreement between Agua and Vicenza Mineração e Participações S.A. ("Vicenza") which expires on December 6th, 2016. There was no activity during the quarter.

Corporate Activities Update

On January 12, 2016, Agua announced that Mr. Paul Pint had joined its Board of Directors and replaced Justin Reid as the Executive Chairman. Justin Reid continues to hold the position of Agua's Managing Director and direct the operations of the Company on a day to day basis. Fernando Tallarico, Agua's

Technical Director, stepped down from his position on the Board of Directors, allowing him to focus all of his efforts on the technical advancement of our Rio Grande assets.

Mr. Pint, CPA, CA, is a capital markets professional with over 20 years of experience. Mr. Pint began his capital markets career on the institutional equity team at a large Canadian financial institution. Over his career, he has held a number of senior positions at various financial institutions and boutique investment banks in Canada. Mr. Pint is a Chartered Professional Accountant and holds a Bachelor of Commerce degree from the University of Toronto.

Mr. Pint intends to take a very active role in the leadership of Aguia, contributing to the Company's overall strategic direction, enhancing and expanding relationships with institutional investors in Europe, North America and Australia and identifying opportunities for ongoing growth.

Plans for the June Quarter

Aguia expects to release new results during the June quarter based on the findings of Millcreek's PEA Optimisation study, the updated beneficiation testing results, completion of the EIA baseline studies and the maiden JORC Resource for Joca Tavares. These activities are expected to add considerable value to the company between now and the end of the calendar year.

About Aguia:

Aguia is a fertiliser company focused on the exploration and development of phosphate and potash projects in Brazil to supply the Brazilian agriculture sector. Brazil is Latin America's biggest economy and is heavily reliant on imports of up to 50 per cent of its phosphate and 90 per cent of its potash needs. Aguia is well positioned to capitalise on the growing demand for phosphorus and potash based fertilisers in the expanding agriculture sector in Brazil and controls three large projects, located close to existing infrastructure. The Company is committed to its existing projects whilst continuing to pursue other opportunities within the fertiliser sector.

JORC Code Competent Person Statements

The Três Estradas Phosphate Project has a current JORC compliant inferred and indicated mineral resource of 70.1 Mt grading 4.20% P₂O₅. This includes indicated resources of 15.2 Mt @ 5.02% P₂O₅ and inferred resources of 54.862 Mt @ 3.98% P₂O₅.

The Lucena Phosphate Project has a current JORC compliant inferred mineral resource of 55.1Mt grading 6.42% P₂O₅

Information in this report is extracted from the following reports, which are available for viewing on the Company's website:

- *March 17, 2016: Aguia Commences Exploration on Terra Santa Claims Adjacent to Tres Estradas*
- *February 15, 2016: Aguia to Optimise Tres Estradas PEA Ahead of BFS*
- *January 27, 2016: Drilling Program at Tres Estradas and Joca Tavares Delivers Positive Results*
- *January 13, 2016: Aguia Announces Appointment of New Board Member and Executive Chairman*
- *December 10, 2015: Aguia Signs Option to Expand Phosphate Land Position in Southern Brazil*

- *December 8, 2015: Change in Substantial Holding*
- *November 25, 2015: Results of Annual General Meeting*
- *November 18, 2015: Initial Drilling Results*
- *September 22, 2015: Commencement of Drilling – Joca Tavares and Cerro Preto*
- *August 26, 2015: Successful A\$9.5 million Private Placement*
- *August 19, 2015: Positive Preliminary Economic Assessment*
- *27 July 2015: Aguia Extends Strike-Length of Cerro Preto Phosphate Discovery by 2.5 km and updates on Recent Exploration Activity at Fourth Phosphate Target in Rio Grande do Sul - Porteira*
- *2 July 2015: Sulliden Mining Capital Increases Holding in Aguia to 18.02%*

- *11 May 2015: Aguia Reports 80% Phosphate Recovery from Oxidized Carbonatite and 65% from Fresh Carbonatite at Flagship Três Estradas Phosphate Project*
- *April, 27, 2015: Aguia Significantly Increases Três Estradas Phosphate Resource by 130% to 70.1 Million Tonnes*

The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements listed above and, in the case of estimates of Mineral Resources or Ore Reserves that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Cautionary Statement: Preliminary Economic Assessment / Scoping Study

The preliminary economic assessment discussed herein is partly based on Inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the preliminary economic assessment based on these mineral resources will be realized. The results of the economic analyses discussed herein represent forward-looking information as defined under Australian securities law. The results depend on inputs that are subject to a number of known and unknown risks, uncertainties, and other factors that may cause actual results to differ materially from those presented here. The accuracy of the results is in the range of the industry-wide commonly accepted scoping study level of accuracy.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or

+ See chapter 19 for defined terms.

Appendix 5B
Mining exploration entity and oil and gas exploration entity quarterly report

lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
