## Notes to Consolidated Interim Financial Statements 31 March 2016

(Unaudited - expressed in Australian Dollars)

#### 1 NATURE AND CONTINUANCE OF OPERATIONS

West African Resources Ltd. ("the Company" or "West African") is a public company, incorporated in Australia and operating in Australia. The Company was incorporated on 1 September 2006 as a proprietary company and converted to a public company on 16 November 2007. The company listed on the ASX on 11 June 2010. West African is a mineral exploration company focused on building shareholder value through the identification, acquisition, exploration and development of mineral projects. The Group's current portfolio includes mineral rights in a gold project in Burkina Faso.

The underlying value and recoverability of the resource assets are dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain necessary financing to complete exploration and development, and the future profitable production and/or disposition thereof.

The Company completed a technical and financial assessment of an oxide heap leach starter project on its Mankarga 5 ('M5') Gold Project, Burkina Faso in February 2015. This assessment constituted a Pre-Feasibility Study (incorporating updated mineral resource, mining schedule, column test work and cost inputs). Following recent diamond and RC drilling at Mankarga 1 ('M1') and 3 ('M3'), which has delivered high grade gold mineralization, the Company is now in the process of completing a Carbon in Leach ('CIL') feasibility study for the Tanlouka Gold Project, which will investigate the combination of high grade gold mineralisation from M1 with the predominantly oxide mineralisation from M5. The study will leverage off the work completed during 2014-15 for the heap leach project.

These condensed consolidated interim financial statements ("Interim Financial Statements") have been prepared on the basis that the Company will continue as a going-concern, which assumes that the Company will be able to realise its assets and discharge its liabilities in the normal course of business. The Company finances its operations through the issue of ordinary shares and has utilized a loan facility. The Company has no source of operating revenue and continued operations are dependent on the Company's ability to raise further funding through equity or debt issues, sales of assets or through participation in profitable future operations. These Interim Financial Statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue its business.

#### 2 BASIS OF PRESENTATION

### (a) Statement of Compliance

These Interim Financial Statements have been prepared in accordance with *International Financial Reporting Standard 34, "Interim Financial Reporting"* ("IAS 34"). They do not include all the information and notes required in the annual financial statements, and should be read in conjunction with the Company's annual consolidated financial statements for the year ended 30 June 2015 ("2015 Annual Financial Statements"), which have been prepared in accordance with International Financial Reporting Standards ("IFRS"). Results for the period ended 31 March 2016 are not necessarily indicative of the results for the full fiscal year ending 30 June 2016.

These Interim Financial Statements have been prepared using accounting policies consistent to those used in the 2015 Annual Financial Statements, and were authorised for publication by the Company's board of directors on 29 September 2015.

## (b) Going concern

Notwithstanding the fact that the Company has a net liability position of \$5,752,313 (30 June 2015: net liability \$3,351,885), the directors are of the opinion that the Company is a going concern for the following reasons.

- The Group has successfully completed capital raisings during the year as disclosed in Note 7 and has the ability to continue doing so on a timely basis, pursuant to the Corporations Act 2001, as is budgeted to occur in the twelve month period from the date of this financial report. In April 2016, the Company raised \$3,725,000 through the issue of ordinary shares with commitments, subject to shareholder approval, for a further \$8,775,000 through the issue of ordinary shares at the end of May 2016;
- The Group has a working capital deficit of \$5,846,914 (30 June 2015: working capital surplus \$2,959,586) which has arisen due to the USD 5 million loan being reclassified from a non-current liability to a current liability effective 30 September 2015. A key term of the loan agreement is the bullet repayment on the earlier of 30 September 2016 and the date on which WAF receives proceeds from a project financing or capital raising. The Company is progressing discussions with the lender to extend the maturity date of this facility and obtain additional funding for the early acquisition of assets, prior to obtaining project funding followed by full scale development of the project; and

ABN 70 121 539 375 (An Exploration Stage Company)

## Notes to Consolidated Interim Financial Statements 31 March 2016

(Unaudited - expressed in Australian Dollars)

• The Company and Group have the ability, if required, to undertake mergers, acquisitions or restructuring activity or to wholly or in part, dispose of interests in mineral exploration and development assets.

#### (c) Principles of Consolidation

The consolidated financial statements comprise the financial statements of West African Resources Limited and its subsidiaries ("the Group"). The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

Adjustments are made to bring into line any dissimilar accounting policies that may exist. All intercompany balances and transactions, including unrealised profits arising from intra-group transactions, have been eliminated in full. Unrealised losses are eliminated unless costs cannot be recovered. Subsidiaries are consolidated from the date on which control is transferred to the Group and cease to be consolidated from the date on which control is transferred out of the Group. Where there is loss of control of a subsidiary, the consolidated financial statements include the results for the part of the reporting period during which West African Resources Limited has control.

### (d) Cash and cash equivalents

Cash comprises cash at bank and in hand. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

For the purposes of the Cash Flow Statement, cash and cash equivalents consist of cash and cash equivalents as defined above.

#### (e) Income Tax

The income tax expense or benefit for the year is based on the profit or loss for the year adjusted for any non assessable or disallowed items. It is calculated using tax rates that have been enacted or are substantially enacted as at balance date.

Deferred tax is provided on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxation profit or loss.

Deferred income tax assets are recognised to the extent that it is probable that the future tax profits will be available against which deductible temporary differences will be utilised. The amount of the benefits brought to account or which may be realised in the future is based on the assumption that no adverse change will occur in the income taxation legislation and the anticipation that the economic unit will derive sufficient future assessable income to enable the benefits to be realised and comply with the conditions of deductibility imposed by law.

#### (f) Other taxes

Revenues, expenses and assets are recognised net of the amount of GST except:

- when the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables, which are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the Cash Flow Statement on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

## Notes to Consolidated Interim Financial Statements 31 March 2016

(Unaudited - expressed in Australian Dollars)

#### (g) Exploration, Evaluation and Development Expenditure

Mineral exploration and evaluation costs are expensed as incurred. Acquisition costs will normally be expensed but will be assessed on a case by case basis and if appropriate may be capitalised. These acquisition costs are only carried forward to the extent that they are expected to be recouped through the successful development or sale of the tenement. Accumulated acquisition costs in relation to an abandoned tenement are written off in full against profit in the year in which the decision to abandon the tenement is made.

Where a decision has been made to proceed with development in respect of a particular area of interest, all future costs are recorded as a development asset.

#### (h) Plant and Equipment

Each class of property, plant and equipment is carried at cost or fair value, less where applicable, any accumulated depreciation and impairment losses. The carrying amount of the plant and equipment is reviewed annually by the Directors to ensure it is not in excess of the recoverable amount of these assets. The recoverable amount is assessed on the basis of the expected net cash flows that will be received from the assets employed and their subsequent disposal. The expected net cash flows have been discounted to their present value in determining recoverable amounts.

#### Depreciation

The depreciable amount of all fixed assets including buildings and capitalised leased assets, but excluding freehold land, is depreciated on a straight line basis over their useful lives to the Company commencing from the time the asset is held ready for use. The asset's residual value and useful lives are reviewed and adjusted if appropriate, at each balance date.

An asset's carrying value is written down immediately to its recoverable amount if the asset's carrying value is greater than the estimated recoverable amount. Gains and losses on disposal are determined by comparing proceeds with the carrying amount. These gains and losses are included in the statement of profit or loss and other comprehensive income.

### (i) Trade and other accounts payable

Trade and other accounts payable represent the principal amounts outstanding at balance date, plus, where applicable, any accrued interest.

#### (j) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

The fair value of the liability portion of a convertible note is determined using a market interest rate for an equivalent non-convertible note. This amount is recorded as a liability on an amortised cost basis until extinguished on conversion or maturity of the note. The remainder of the proceeds is allocated to the conversion option. This is recognised and included in shareholders' equity, net of income tax effects.

Borrowings are removed from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other income or finance costs.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

ABN 70 121 539 375 (An Exploration Stage Company)

## Notes to Consolidated Interim Financial Statements 31 March 2016

(Unaudited - expressed in Australian Dollars)

#### (k) Recoverable Amount of Non Current Assets

The carrying amounts of non-current assets are reviewed annually by Directors to ensure they are not in excess of the recoverable amounts from those assets. The recoverable amount is assessed on the basis of the expected net cash flows, which will be received from the assets employed and subsequent disposal. The expected net cash flows have been or will be discounted to present values in determining recoverable amounts.

#### (I) Operating Revenue

Revenue represents interest received and reimbursements of exploration expenditures.

#### (m) Issued Capital

Ordinary Shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds. Incremental costs directly attributable to the issue of new shares or options, or for the acquisition of a business, are included in the cost of the acquisition as part of the purchase consideration.

#### (n) Employee benefits

Provision is made for employee benefits accumulated as a result of employees rendering services up to the reporting date. These benefits include wages and salaries, annual leave, and long service leave.

Liabilities arising in respect of wages and salaries, annual leave and any other employee benefits expected to be settled within twelve months of the reporting date are measured at their nominal amounts based on remuneration rates which are expected to be paid when the liability is settled. All other employee benefit liabilities are measured at the present value of the estimated future cash outflow to be made in respect of services provided by employees up to the reporting date. In determining the present value of future cash outflows, the market yield as at the reporting date on national government bonds, which have terms to maturity approximating the terms of the related liability, are used.

#### (o) Critical accounting estimates and judgments

The Directors evaluate estimates and judgements incorporated into the financial report based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the Group.

#### (p) Share Based Payments

The Group provides benefits to employees (including Directors) of the Group in the form of share-based payment transactions, whereby employees render services in exchange for shares or rights over shares ("equity-settled transactions"). The cost of these equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted. The fair value is determined by an internal valuation using Black-Scholes or Binomial option pricing models.

The cost of equity-settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award ("vesting date"). The cumulative expense recognised for equity-settled transactions at each reporting date until vesting date reflects (i) the extent to which the vesting period has expired and (ii) the number of awards that, in the opinion of the directors of the Group, will ultimately vest. This opinion is formed based on the best available information at balance date. No adjustment is made for the likelihood of market performance conditions being met as the effect of these conditions is included in the determination of fair value at grant date.

No expense is recognised for awards that do not ultimately vest, except for awards where vesting is conditional upon a market condition. Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. However, if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the cancelled and new award are treated as if they were a modification of the original award.

ABN 70 121 539 375 (An Exploration Stage Company)

## Notes to Consolidated Interim Financial Statements 31 March 2016

(Unaudited - expressed in Australian Dollars)

#### (q) Foreign currency translation

Both the functional and presentation currency of West African Resources Limited and its Australian subsidiary is Australian dollars. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded in the functional currency by applying the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the balance date.

All exchange differences in the consolidated financial report are taken to profit or loss with the exception of differences on foreign currency borrowings that provide a hedge against a net investment in a foreign entity. These are taken directly to equity until the disposal of the net investment, at which time they are recognised in profit or loss.

Tax charges and credits attributable to exchange differences on those borrowings are also recognised in equity.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction.

Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

The functional currency of the foreign subsidiaries, Wura Resources Pty Ltd SARL, Swan Resources SARL, Hawthorn Resources SARL, West African Resources Exploration SARL, West African Resources Development SARL, West African Resources Ltd SARL and Tanlouka SARL is the Communaute Financiere Africaine Franc (CFA). The functional currency of the foreign subsidiary, Channel Resources Ltd is the Canadian Dollar (CAD). The functional currency of the foreign subsidiaries, Channel Resources (Cayman I) Ltd and Channel Resources (Cayman II) Ltd is the United States Dollar (USD).

As at the reporting date the assets and liabilities of these subsidiaries are translated into the presentation currency of West African Resources Limited at the rate of exchange ruling at the balance date and their income statements are translated at the average exchange rate for the period.

The exchange differences arising on the translation are taken directly to a separate component of equity, being recognised in the foreign currency reserve.

On disposal of a foreign entity, the deferred cumulative amount recognised in equity relating to that particular foreign operation is recognised in profit or loss.

#### (r) Financial assets

Financial assets in the scope of AASB 139 Financial Instruments: Recognition and Measurement are classified as either financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, or available-for-sale investments, as appropriate. When financial assets are recognised initially, they are measured at fair value, plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs. The Group determines the classification of its financial assets after initial recognition and, when allowed and appropriate, re-evaluates this designation at each financial year-end.

All regular way purchases and sales of financial assets are recognised on the trade date i.e. the date that the Group commits to purchase the asset. Regular way purchases or sales are purchases or sales of financial assets under contracts that require delivery of the assets within the period established generally by regulation or convention in the marketplace.

#### (i) Financial assets at fair value through profit or loss

Financial assets classified as held for trading are included in the category 'financial assets at fair value through profit or loss'. Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term. Derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on investments held for trading are recognised in profit or loss.

#### (ii) Held-to-maturity investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity are classified as held-to-maturity when the Group has the positive intention and ability to hold to maturity. Investments intended to

ABN 70 121 539 375

(An Exploration Stage Company)

## Notes to Consolidated Interim Financial Statements 31 March 2016

(Unaudited - expressed in Australian Dollars)

be held for an undefined period are not included in this classification. Investments that are intended to be held-to-maturity, such as bonds, are subsequently measured at amortised cost. This cost is computed as the amount initially recognised minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initially recognised amount and the maturity amount. This calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums and discounts. For investments carried at amortised cost, gains and losses are recognised in profit or loss when the investments are derecognised or impaired, as well as through the amortisation process.

#### (iii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are carried at amortised cost using the effective interest method. Gains and losses are recognised in profit or loss when the loans and receivables are derecognised or impaired, as well as through the amortisation process.

#### (iv) Available-for-sale investments

Available-for-sale investments are those non-derivative financial assets that are designated as available-for-sale or are not classified as any of the three preceding categories. After initial recognition available-for sale investments are measured at fair value with gains or losses being recognised as a separate component of equity until the investment is derecognised or until the investment is determined to be impaired, at which time the cumulative gain or loss previously reported in equity is recognised in profit or loss.

The fair value of investments that are actively traded in organised financial markets is determined by reference to quoted market bid prices at the close of business on the balance date. For investments with no active market, fair value is determined using valuation techniques. Such techniques include using recent arm's length market transactions; reference to the current market value of another instrument that is substantially the same; discounted cash flow analysis and option pricing models.

### (s) Intangible assets

Intangible assets acquired separately or in a business combination are initially measured at cost. The cost of an intangible asset acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Internally generated intangible assets, excluding capitalised development costs, are not capitalised and expenditure is charged against profits in the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life is reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, which is a change in accounting estimate. The amortisation expense on intangible assets with finite lives is recognised in profit or loss in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cashgenerating unit level. Such intangibles are not amortised. The useful life of an intangible asset with an indefinite life is reviewed each reporting period to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is accounted for as a change in an accounting estimate and is thus accounted for on a prospective basis

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss when the asset is derecognised.

#### (t) Acquisitions outside of the scope of AASB 3 Business Combinations

Where the Group has acquired control of another entity which principally holds exploration assets, or assets in predevelopment, and that entity has no reserves, the substance of the transaction is reviewed. If the sole purpose of the transaction is to increase the resource base of the Group, and the vehicle containing the assets was of no consequence to the underlying substance of the transaction, the transaction is viewed to be outside of the scope of AASB 3 Business Combinations.

ABN 70 121 539 375 (An Exploration Stage Company)

## Notes to Consolidated Interim Financial Statements 31 March 2016

(Unaudited - expressed in Australian Dollars)

The acquisitions of Channel Resources Limited are outside of the scope of AASB 3 Business Combinations as they did not meet the definition of "business" according to that standard. The acquisition of the net assets of these companies, excluding the cash and the financial assets, meets the definition of, and has been accounted for as, a share-based payment transaction for the acquisition of assets.

#### 2 SEGMENT REPORTING

The Group has applied AASB 8 Operating Segments from 1 July 2009. AASB 8 requires a "management approach" under which segment information is presented on the same basis as that used for internal reporting purposes.

Operating segments are now reported in a manner that is consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker has been identified as the Board of West African Resources Ltd.

The Group operates only in one business and geographical segment being predominantly in the area of mineral exploration in the Boulsa Gold Project in Burkina Faso, Africa. The Group considers its business operations in mineral exploration to be its primary reporting function.

#### (i) Information on Facility

8.35% secured loan of US\$5,000,000 with the Metals & Energy Capital Division of Macquarie Bank Limited. The Facility is secured against all assets of West African Resources and its wholly-owned subsidiary, Channel Resources Limited. Drawdown of the Facility was subject to a number of conditions, including the issue of 40,545,224 unlisted options, exercisable at A\$0.14 on or before 30 September 2017. A key term of the loan agreement is the bullet repayment on the earlier of 30 September 2016 and the date on which WAF receives proceeds from a project financing or capital raising. Hence, the loan was reclassified to a current liability as at 30 September 2015. Any funds received by West African Resources through the conversion of the options will be applied against the outstanding facility amount, reducing the outstanding debt owed to Macquarie.

The Convertible Loan Agreement contains other customary features, including customary representations and warranties, undertakings and events of default for facilities of this nature.

ABN 70 121 539 375 (An Exploration Stage Company)

#### 13 CONTINGENT LIABILITIES

At the date of this report, the authorities in Burkina Faso are lodging claims with various exploration companies operating in Burkina Faso for withholding taxes on payments of various non resident service providers and the regulation of the contracts of expatriate staff in accordance with taxation regulations in force. Whilst the Company believes it has complied with local regulations, some aspects of the regulations are open to interpretation. The Company has not received any formal claim and in the event of one being received, the effect, if any, that these claims will have, or which future claims will have on the consolidated entity's operations in Burkina Faso is not yet known.

#### 14 CONTINGENT ASSET

There are no contingent assets at 31 March 2016.

#### 15 SUBSEQUENT EVENTS AFTER THE REPORTING DATE

In April 2016, West African Resources Ltd completed a placement, which was to be completed in 2 tranches.

In tranche 1, 29,800,000 ordinary shares were issued at 12.5 cents on 26 April 2016, raising \$3.75 million. Tranche 2 is expected to be completed in late May 2016, with the issue of 70,200,000 ordinary shares at 12.5 cents, raising a further \$8,75m. The issue under tranche 2 is subject to shareholder approval, which is being sought at a general meeting to be held on 27 May 2016.

Other than this, there has not arisen in the interval between the end of the March 2016 quarter end and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the Directors of the Company, to affect significantly the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future periods.
