- Enhanced equity and capital markets profile with a combined pro-forma market capitalisation in excess of A\$700 million.
- Significant growth potential with existing and expanding production, diversified and superior growth profile, proven management and operating teams, strong balance sheet and greater international market profile.

In addition, other General Mining shareholders associated with Michael Fotios, the Chairman of General Mining, representing a further 10.56% of General Mining shares outstanding have made statements of intention to accept the Offer, in absence of a superior proposal.

Galaxy Resources Limited (ASX:GXY) (**Galaxy**) and General Mining Corporation Limited (ASX:GMM) (**General Mining**) have entered into a definitive Takeover Bid Implementation Agreement (**Implementation Agreement**) to merge the two companies. It is proposed that Galaxy will acquire all of the issued shares of General Mining that it does not already own in a share based transaction by way of an off-market takeover offer (**Offer**).

Under the Offer, General Mining shareholders will receive 1.65 new Galaxy shares for every 1 General Mining share held, which represents a 9.4% premium to the 10-day volume weighted average price (VWAP) and 13.5% premium to the 20-day VWAP to Wednesday 25 May 2016. Based on Galaxy's closing share price of A\$0.395 on the ASX on 25 May 2016 (being the last day General Mining and Galaxy shares traded before the announcement of the Offer), the Offer values General Mining at approximately A\$216 million (on a fully diluted basis) or A\$0.652 per share (on a fully diluted basis).

The Galaxy proposal is unanimously recommended by the directors of General Mining who have also agreed to accept Galaxy's Offer in respect of all shares they control, in each case in the absence of a superior offer.

Strategic Rationale for the Transaction

The merged entity creates a leading diversified, global lithium producer well positioned for continued project expansion and development and further opportunities.

- Merged Board and management team highly credentialed and experienced with strong connections in the key Asian and North American lithium markets.

Management and Governance

Martin Rowley, Chairman of Galaxy, will remain as Chairman of the Board of the combined group. Anthony Tse, Managing Director of Galaxy will remain as Managing Director of the combined group and Michael Fotios, Executive Chairman of General Mining, will be offered a position as a Director on the Board of the combined group.

It is anticipated that the new Galaxy Board will be further strengthened with the appointment of new directors to add international technical and financial experience and expertise.

Galaxy Chairman, Martin Rowley, said:

“We are extremely pleased that the joint venture arrangement we entered into with General Mining in 2015 has resulted in a merger proposal that makes sound strategic sense and, importantly, gives the shareholders of both Galaxy and General Mining the opportunity to participate in the upside of a merged lithium company of global significance.

“The arrangement struck between Galaxy and General Mining has enabled the re-commissioning of the Mt Cattlin mine, drawing on General Mining's financial and technical resources, with Mt Cattlin now poised to deliver first production of spodumene to contracted buyers in the third quarter of calendar 2016.

“We are confident that merging the companies will result in significant benefits to both sets of shareholders with the opportunity for a re-rating for the expanded shareholder base from the enhanced equity and capital markets profile.

General Mining Chairman, Michael Fotios, said:

"General Mining and Galaxy are an excellent and natural fit, given existing joint venture owned assets, complementary project development and operational expertise, as well as aligned, success driven cultures."

"Both companies have successful track records of creating substantial value for shareholders and, together, we will retain this focus. Our ability to capture future growth opportunities in the rapidly evolving lithium market will be significantly enhanced by this merger."

Transaction Details
