#### FY2016 review

For the full year ended 30 June 2016 the Company's investment portfolio increased by 2.6%¹ after all fees and expenses and after adjusting for the dilutive impact of options exercised during the year. Over this same period the MSCI All Country World Index fell 0.4%² in Australian dollar terms.

Portfolio Manager Miles Staude said: "FY2016 presented a testing environment for the Company's investment portfolio, with most global equity markets registering falls over the period. Despite this backdrop the investment portfolio performed well, with our discount capture strategy generating 5.1% of gross excess returns over the year.

As well as seeking to generate excess market returns, one of the key objectives of the strategy is to run a portfolio which has meaningfully less market risk than one invested solely in a portfolio of international shares. A useful real world demonstration of how this approach protected shareholders during FY2016 is to compare how the GVF investment portfolio fared during the worst periods of market stress that occurred throughout the year. The three largest monthly falls for the MSCI All Country World Index in Australian dollar terms during FY2016 were 4.3%, and 3.2%. During the same corresponding months, the falls in the GVF investment portfolio were 1.1%, 3.0%, and 1.0%."

#### **Dividends**

During the year the Company declared and paid fully-franked dividends of 5.0 cents per share. 2.0 cents per share of this related to the FY2015 final dividend payment, which was paid on 6 November 2015. The remaining 3.0 cents per share related to the fully-franked FY2016 interim dividend, which was paid on 6 May 2016.

Since year-end the Company has declared a final fully-franked dividend for FY2016 of 3.0 cents per share to be paid on Friday 4 November 2016. The record date for entitlement to the FY2016 final dividend is Friday 7 October 2016.

#### Dividend reinvestment plan

The Company's dividend reinvestment plan (DRP) will be in effect for the final FY2016 fully franked dividend payment of 3.0 cents per share.

The DRP has been designed so that participants will always receive the lowest reinvestment price possible, without their reinvestment diluting the post-tax Net Tangible Asset value per share (NTA) of those shareholders who choose not to participate in the plan. When the Company's share price is greater than or equal to its NTA, dividends are paid as newly issued shares in the Company. The Company's closing share price of \$1.085 on 25 August 2016 was above its current NTA. If this situation remains on 6 October 2016 participating shareholders will be issued new shares at the greater of, a 2.5% discount to the volume weighted average share price over the three trading days from the ex-date, or the 6 October NTA value of the Company. If the share price for GVF is less than the Company's NTA at this time, cash available for distribution as dividends on shares subject to the DRP will be used to acquire the Company's shares on-market in accordance with the terms set out in the plan.

Shareholders who would like to participate in the DRP can enrol at <a href="www.investorserve.com.au">www.investorserve.com.au</a>, alternatively please contact the Company's share registrar, Boardroom, on 1300 737 760. The enrolment deadline for the FY2016 final dividend is 5.00 pm (AEST) Monday 10 October 2016. Details of the DRP are available on the Company's website at:

# (c) Dividend reinvestment plan

In association with the interim Dividend, the Company announced the commencement of a new dividend reinvestment plan ("DRP" or "plan"). The plan allows shareholders to acquire additional shares in the Company. Shareholders have the option of either enrolling all their shares in the plan or nominating a specific number of shares that will be subject to reinvestment.

The plan has been designed so that DRP participants will always receive the lowest reinvestment price possible, without their reinvestment diluting the Net Tangible Asset value per share (NTA) of those shareholders who choose not to participate in the plan.

There are no costs to participate in the plan and shareholders can discontinue their participation in the plan at any time.

The Company's ability to continue to pay franked dividends is dependent upon the receipt of franked dividends from investments and the payment of tax.

#### 5 Cash and cash equivalents

The Company makes use of swap contracts with its Prime Broker to invest some of its investment portfolio and such contracts result in much of the notional investment value, being the value at risk, remaining on the Company's balance sheet as cash.

#### 6 Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are all held for trading and include the following:

| Australian and overseas listed equity securities  Derivative financial instruments | 68,569,243<br>2.472.854 | 50,917,108<br>825,026 |

During the year, 36,993,419 options that were on issue were exercised at \$1.00 per share. The remaining unexercised options expired on 17 March 2016.

Under the terms of the Dividend Reinvestment Plan ("DRP" or "plan") announced on 14 March 2016, 266,818 ordinary shares were acquired on-market for DRP participants at \$1.0122 per share. These shares were applied to the holdings of the DRP participants as at the dividend payment date, 6 May 2016, and confirmed in the dividend statements dispatched by the Company's share registrar.

On 6 May 2016, 10 shares were issued at a price of \$1.0122 per share to satisfy the rounding of shares allocated to participants in the DRP in respect of the purchase of shares under the terms of the DRP applicable to the dividend paid on 6 May 2016.

The plan allows shareholders to acquire additional shares in the Company. Shareholders have the option of either enrolling all their shares in the plan or nominating a specific number of shares that will be subject to reinvestment.

The plan has been designed so that DRP participants will always receive the lowest reinvestment price possible, without their reinvestment diluting the Net Tangible Asset value per share (NTA) of those shareholders who choose not to participate in the plan.

There are no costs to participate in the plan and shareholders can discontinue their participation in the plan at any time.
