## **ASX ANNOUNCEMENT**

### **AUTOSTART BURETTE LISTED THROUGH QLD HEALTH TENDER**

Analytica (ASX:ALT) is pleased to announce that the AutoStart® infusion system product has been listed on the Queensland Health purchasing schedule. The product was listed by Medical Australia Ltd (ASX: MLA) the Australian sponsor of the device under their Tuta FirstFlow® brand name.

Inclusion in the schedule is a pre-requisite for all public Queensland health facilities to purchase medical devices and other health products. The listing will be reviewed in 2019.

Chairman Dr Michael Monsour said “This listing is another milestone achieved in the commercialisation of the AutoStart infusion system. It allows the product to be purchased by any Queensland Health hospital or health clinic and we aim to list in other states as tenders fall due. It’s a long process, but it demonstrates the credentials of the AutoStart system and validates the work we have been doing behind the scenes on this product. Hospitals will see the value of the AutoStart as a means of saving time and money and as a way of improving patient safety.”

“Our goal is to use evidence of the burette’s performance in the Queensland Health system in the tender process in other countries, and may encourage license deals from one of the larger infusion system manufacturers.”
