About Black Rock Mining

Black Rock Mining Limited is an Australian based company listed on the Australian Securities Exchange. The Company has graphite tenure in the Mahenge region, Tanzania, a country which hosts world-class graphite mineralisation. Drilling of the Epanko north prospect was completed in August 2015 and infill drilling of two new graphite discoveries, the Ulanzi and Cascade prospects, is nearing completion. The Company has announced a Mahenge JORC compliant resource of 131mt @ 7.9% TGC for 10.4m tonnes of contained Graphite and then plans to commercialise the project.

The company is building a skill and knowledge base to become an explorer, developer and diversified holder of resources. Shareholder value will be added by:

- *identifying and securing projects with economic potential*
- *focussing on tenure that can be commercialised by converting into JORC compliant resources; and*
- *taking these resources into production*

Our focus is on establishing a JORC resource from three advanced prospects at Mahenge, Ulanzi, Epanko north and Cascade, whilst further adding resource upside through exploration at Kituti.
