

Stokes awarded Simonds Stadium and Melbourne Airport audio visual contracts

16 August 2016, Melbourne: Stokes Limited (ASX:SKS), via its Stokes Technologies division, has been awarded the contracts to supply and install the audio visual packages for Geelong's Simonds Stadium upgrade and Melbourne Airport's T2 terminal upgrade.

Simonds Stadium includes all facets of advanced audio visual systems including the public address system, MATV, broadcast cabling and match day TV. The Melbourne Airport T2 Terminal upgrade includes the supply and installation of a large scale high end ribbon video wall.

The contracts have a combined value of \$3 million and will be implemented over coming months.

These contracts add to a long line of successful tenders the company has been awarded over recent months and brings the company's total work in hand to approximately \$10 million compared to \$500,000 at the same time last year.

The business continues its rapid organic growth as it looks for complementary acquisitions to reach its medium term revenue target of \$50 million per annum.
