Urbanise sales backlog update

As announced to the ASX on 29 February 2016, Urbanise.com Limited (ASX: UBN) experienced a sales backlog for the period ending 31 December 2015.

This backlog was primarily due to the delayed delivery and installation of Urbanise's next generation smart devices to signed customers.

Urbanise has worked closely with its supply chain partners to improve lead times and increase production capacity to better fulfil customer orders. The Company has also refined its quality control processes to improve consistency in manufacturing processes. The result is a significant increase in manufacturing capacity.

Urbanise is pleased to advise that it has successfully completed testing on the next generation of Urbanise smart sensors which are currently being delivered and activated for customers.
