## **Appointment of GHD to complete an Environmental Impact Statement for Ammaroo Phosphate Project**

Rum Jungle Resources Ltd (RUM) is pleased to announce the appointment of GHD Pty Ltd ("GHD") as lead consultant in the development and submission of an Environmental Impact Statement (EIS) for the Ammaroo Phosphate Project. The EIS process will be coordinated out of GHD's Darwin Office and will be progressed in parallel with the Bankable Feasibility Study. It is expected that the EIS process will take approximately 12-15 months to complete.

GHD operates in the global markets of water, energy and resources, environment, property and buildings, and transportation.

*RUM Managing Director Chris Tziolis stated "that GHD brings the necessary combination of local capability, relationships and recent experience in pursuing environmental approvals for NT based minerals projects. The EIS and attaining a licence to operate from Government is a critical component in attracting the investment necessary to develop the global scale Ammaroo Phosphate project".*

Committed to creating lasting community benefit, GHD's connected global network of 8,500 people delivers engineering, environmental, construction and architectural services to public and private sector clients across five continents – Asia, Australia, Europe, North and South America – and the Pacific region.

Having operated continuously in the Northern Territory for 60 years, GHD possesses an extensive working knowledge of the local environment, and a thorough understanding of the Northern Territory's regulatory frameworks and requirements through its long term presence, relationships and minerals industry involvement.

The terms of reference for the Ammaroo Phosphate Project EIS were issued by the Northern Territory Environmental Protection Authority (NT EPA) on 19 December 2014 and can be viewed at [www.ntepa.nt.gov.au](http://www.ntepa.nt.gov.au)
