 - Phase Two wet beneficiation plant on schedule for September 2016 commissioning and Q4 2016 positive cash flow.
-

NSL Consolidated Limited (Company, ASX: **NSL, NSLO**), is pleased to provide an update on its Phase Two wet beneficiation plant program. As announced on 21 March 2016, the Company entered into a ground-breaking equipment supply agreement with Shandong Huate Magnet Technology Co. Ltd or Huate Magnetism (**Huate**), one of China's premier global beneficiation plant suppliers (refer <http://www.chinahuate.com/>).

Significant steps forward continue, with the final delivery of equipment arriving on site from port according to the Company's desired schedule. The final equipment to despatch from port were the two large scale classifiers of approx. 15mx4m each.

Classifier equipment arriving on site

Managing Director, Mr Goode commented:

"The arrival on site of the final pieces of equipment from China is a major milestone in our project. The successful purchase, fabrication, shipping, port/customs clearance and land transport of the wet beneficiation equipment from China to site on time and on budget is a testament to the team and the support garnered by Huate. With every passing day the team in India are becoming more and more energised to deliver on the project schedule to be commissioning in September and cash flow positive in Q4 this year. It is a very exciting time for all parties involved."

Huate Wet Plant Agreement Details

Huate is a specialised beneficiation plant supplier, and is unique in China in that it has capability in plant design, fabrication, construction, commissioning and supporting operations of entire large scale beneficiation plants. Huate also has global experience in iron ore beneficiation, including in Australia.

The agreement with Huate further supports the confidence in the Company's Indian iron ore projects and the larger scale Indian iron ore industry, an industry in Huate desires to gain a position.

As highlighted in previous announcement the commercial terms as follows:

Capital cost: US\$1,054,000

Payment 1	Payment 2	Payment 3	Payment 4	Payment 5	Payment 6	Payment 7

Mar 16	Apr 16	May 16	Jun 16	Sept 16	Dec 16	Feb 17

Phase Two is a wet beneficiation process, allowing NSL to produce a high grade premium price iron ore product grading between 58-62% Fe at around 200,000 tonnes p.a.

The Company has already successfully negotiated offtake agreements for Phase Two's high grade iron ore product with the US\$9 billion Indian global conglomerate, JSW Steel, also that country's leading private sector steel producer; and BMM Ispat, a leading pellet, power and steel producer.

NSL, the only Australian or foreign company to own and operate in India's massive iron ore market, has an established dry processing plant operation for iron ore product at Kurnool and is serviced by two of its local mines nearby, Kuja and Mangal. These mines will also provide the feedstock for the Phase Two wet beneficiation plant.
