Sydney Airport is delighted to release its second annual Sustainability Report today, which has been prepared in line with the Global Reporting Initiative's (GRI) G4 guidelines.

The Sustainability Report focuses on the key sustainability issues which are most significant for Sydney Airport, covering six themes:

- Being a good neighbour;
- Enhancing the customer experience;
- Safety, security and operational efficiency;
- Looking after our people;
- Responsible business practices; and
- Planning for the future.

Limited assurance was provided on certain 2015 sustainability data as well as compliance with the GRI's "core" reporting requirements.

"We recognise that sustainable growth is vital to our long term success and we're pleased with our 2015 performance and the progress we're making to address our most material issues," Sydney Airport Managing Director and Chief Executive Officer Kerrie Mather said.

"This report underlines our commitment to operating sustainably while improving efficiency and enhancing the customer experience."
