THIRD DELIVERY OF PHASE TWO WET PLANT ARRIVES ON SITE

HIGHLIGHTS

- Third stage delivery of equipment has cleared port and has begun arriving on site.
 - Delivery will occur in stages according to the Company's desired schedule.
 - Phase Two wet beneficiation plant on schedule for Q3 2016 commissioning and Q4 2016 positive cash flow.
-

NSL Consolidated Limited (Company, ASX: **NSL, NSLO**), is pleased to provide an update on its Phase Two wet beneficiation plant program. As announced on 21 March 2016, the Company entered into a ground-breaking equipment supply agreement with Shandong Huate Magnet Technology Co. Ltd or Huate Magnetism (**Huate**), one of China's premier global beneficiation plant suppliers (refer <http://www.chinahuate.com/>).

Significant steps forward continue, with the third stage delivery now having cleared customs and arriving on site for unloading. The delivery schedule to site is going according to the Company's desired timelines.

Equipment arriving on site

Managing Director, Mr Goode commented:

"Visible progress for stakeholders on the wet beneficiation plant is really starting to accelerate as the project will soon move to the erection stage in the coming weeks. The team in India are doing a fantastic job, with the project on schedule to be commissioning this quarter and cash flow positive in Q4 this year. It is a very exciting time for the Company and its Shareholders."

Huate Wet Plant Agreement Details

Huate is a specialised beneficiation plant supplier, and is unique in China in that it has capability in plant design, fabrication, construction, commissioning and supporting operations of entire large scale beneficiation plants. Huate also has global experience in iron ore beneficiation, including in Australia.

The agreement with Huate further supports the confidence in the Company's Indian iron ore projects and the larger scale Indian iron ore industry, an industry in Huate desires to gain a position.

As highlighted in previous announcement the commercial terms as follows:

Capital cost: US\$1,054,000

Payment 1	Payment 2	Payment 3	Payment 4	Payment 5	Payment 6	Payment 7

Mar 16	Apr 16	May 16	Jun 16	Sept 16	Dec 16	Feb 17

Phase Two is a wet beneficiation process, allowing NSL to produce a high grade premium price iron ore product grading between 58-62% Fe at around 200,000 tonnes p.a.

The Company has already successfully negotiated offtake agreements for Phase Two's high grade iron ore product with the US\$9 billion Indian global conglomerate, JSW Steel, also that country's leading private sector steel producer; and BMM Ispat, a leading pellet, power and steel producer.

NSL, the only Australian or foreign company to own and operate in India's massive iron ore market, has an established dry processing plant operation for iron ore product at Kurnool and is serviced by two of its local mines nearby, Kuja and Mangal. These mines will also provide the feedstock for the Phase Two wet beneficiation plant.
