

12 April 2016

Resignation of Chairman

The Directors of Optiscan Imaging Limited advise that they have accepted the resignation of Chairman, Patrick O'Connor, effective immediately.

The board has for some weeks been actively engaged in a process of strategic review and fundraising, including identifying new management and board composition. The Board expects to be in a position to announce new board appointments as part of that process.

The board wishes to record its appreciation of the valuable contribution made by Mr O'Connor since his appointment in July 2015.

About Optiscan

Optiscan is a global leader in microscopic imaging technologies for medical markets. Optiscan's unique and patented technologies enable high-powered microscopes to be miniaturised and used inside the body. The technology enables microscopic imaging of up to 1000 times magnification to be achieved. Doctors can use the technology to instantly see cellular level details of tissue without the requirement to surgically remove tissue (biopsy).
