

29 July 2016

QUARTERLY ACTIVITIES REPORT
For the period ended 30 June 2016

- Regalpoint Resources Limited (**Company** or **ASX:RGU**) currently holds projects in Queensland and Northern Territory, which are prospective for uranium and gold.
- Completed a fully underwritten \$2m renounceable rights issue in April.
- Continued to evaluate new business opportunities, including an MOU for a potential strategic alliance with Impact Investment Partners. The was terminated by mutual consent
- Announced the execution of a binding terms sheet to acquire AssetOwl Pty Ltd, subject to certain conditions including shareholder and regulatory approvals – refer ASX release on 29 July 2016

During the quarter the Company continued to maintain its portfolio of core uranium and gold projects in Australia and actively seek new business opportunities with the potential to create near-term value for shareholders.

The Company completed a \$2 million renounceable rights issue on 18 April 2016 which was fully underwritten by Patersons Securities Limited.

The Company announced on 2 June 2016 that it was unable finalise definitive agreements with Impact Investment Partners and the Strategic Alliance MOU executed in March (refer ASX announcement on 14 March 2016) was terminated by mutual agreement.

The Company announced today that it had executed a binding terms sheet to acquire AssetOwl Pty Ltd (**AssetOwl**) - refer ASX release dated 29 July 2016.

PROPOSED ASSETOWL ACQUISITION

AssetOwl is an innovative technology company which has developed an enterprise asset visibility and change platform for retail site management and analysis, with application to other industries, which can provide material efficiency and cost savings to the utilisation and management of retail sites. The cloud-based solution provides an internal visualisation system which combines geographic information systems and virtual reality technologies to enable retailers to visualise, question, analyse and interpret data at each site and collectively across all properties within a network.

The proposed transaction will result in a significant change to the nature of the Company's activities. The Company currently focuses on mineral exploration, and if the proposed transaction proceeds, it will acquire a software application development business.

Accordingly, following consultation with ASX, the Company anticipates that ASX will require the Company to obtain shareholder approval to complete the Proposed Transaction and to re-comply with the ASX admission requirements in Chapters 1 and 2 of the ASX Listing Rules. This will involve a capital raising to satisfy the minimum NTA requirements. The Company proposes to undertake a \$4.5 million raising with Patersons Securities Limited engaged as lead manager and proposed underwriter to the issue.

The Company requested voluntary suspension of its securities on 14 July 2016. It anticipates that its securities will remain suspended from quotation until the Potential Transaction completes (or is terminated) which is currently anticipated to be in late October 2016.

Refer to the ASX release today for a detailed overview of AssetOwl and the proposed transaction.

RGU MINERALS PROJECTS – PAROO RANGE (QLD) AND RUM JUNGLE (NT)

Figure 1: Location of the Regalpoint Resources projects

PAROO RANGE, QUEENSLAND (EPM16923, 16980, 25464, 25465, 25503; RGU 100%) - URANIUM

The Company's 100 % owned Paroo Range Project covers a total of c.363 km² of granted exploration licences in the well-endowed and highly prospective Mount Isa region. Paroo Range is located only 25 km northeast of Mount Isa and is immediately adjacent to Paladin Energy's projects. Paladin Energy recently reported that metallurgical test-work at their Valhalla uranium deposit shows that alkaline leaching has acceptable recoveries of 80 to 90 % at high temperature and pressure with normal reagent consumption. Radiometric sorting shows further encouraging results (Paladin Energy, Annual Report 2015).

RGU is targeting similar uranium resources in their Paroo Range project. The Company's discovery of the high-quality Skevi Prospect demonstrates that previous exploration has not been completely effective. Other high-quality targets remain untested within the project area.

No fieldwork was carried out on the Paroo Range Project during the quarter. Step-out drilling is planned at the Skevi Prospect to further constrain the extent of the mineralised envelope, especially to the north towards and around the Thesaurus Prospect, where surface samples returned up to 542 ppm U₃O₈. Basic field mapping and sampling are required elsewhere in the project area.

RUM JUNGLE, NORTHERN TERRITORY (EL26094; RGU 100%) – GOLD, URANIUM

The Company's Rum Jungle Project is located about 55 km south of Darwin in the Batchelor area where there are numerous uranium, gold and base metal prospects and abandoned mines. The project comprises one granted Exploration Licence (EL26094) of approximately 28 km².

RGU has completed drilling, sampling and geophysical surveys within EL26094, and has confirmed that the Highlander gold prospect is a high quality target in an under-explored region. Gold is hosted in pyrite-arsenopyrite-rich quartz veins. The best drill result was 6 m at 3.91 g/t gold (including 1 metres at 13.1 g/t gold; HLRC036).

No fieldwork was carried out on the Rum Jungle Project during the quarter and future drilling will target the northern extensions of the Highlander gold trend. A renewal application was lodged for the tenement and the Mine Management Program for the coming year submitted.

Current Tenement Schedule – 30 June 2016

Tenement	Project	Location	Status	Area (blocks)	Expiry	Actions
EL26094	Rum Jungle	NT	Granted	11	5-May-16	Renewal submitted

Competent Persons Statement

The information in this report that relates to Exploration Results and Mineral Resources of the Company has been reviewed by Malcolm Castle, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Castle has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration and to the activity, which they are undertaking to qualify as an Expert and Competent Person as defined under the VALMIN Code and in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Castle consents to the inclusion in this report of the matters based on the information in the form and context in which they appear.

The Exploration Results referenced herein for the Paroo Range Project were reported to the ASX on:

- *2 November 2011 'Significant New Mineralised Zone – Paroo Range (RGU:100%)';*
- *17 July 2012 'Encouraging drill results from Paroo Range' under the 2004 JORC Code; and*
- *31 January 2014 'Quarterly activities report for the period ended 31 December 2013'*

There have been no material changes since these results were reported.
