**Oneview Healthcare PLC announces proof of concept contracts with three healthcare systems in the Midwest of the United States**

**Establishing new North American Headquarters in Chicago in June 2016**

**Friday May 27th, 2016 Sydney, Australia** :  Oneview Healthcare (ASX:ONE) the Australian listed Irish healthcare company today announced the signing of three separate proof of concept (POC) contracts with high-profile health systems in the MidWest of the United States, all of which are subject to strict confidentiality guidelines.

These POC's encompass deployments in specific wards of three different hospitals (typically across 25-40 beds) calling for the integration of Oneview's innovative patient experience platform with each hospital's existing IT infrastructure and the achievement of certain key performance indicators over the course of the POC's which typically run for 90 days.

Successful POC's may or may not lead to future contracts with these respective providers.

The signing of the three POC's follows the announcement on Monday that Oneview had signed a multi-year contract with NYU Langone Medical Center ("NYU") to deploy Oneview's innovative software at NYU's 374 bed state-of-the-art facility in New York. NYU is one of the premier academic medical institutions in the U.S., operating five hospitals, clinics and medical centres across New York's five boroughs.

As a result of these significant developments Oneview is delighted to announce the establishment of a new North American headquarters in Chicago, IL.  The new headquarters will act as the business hub for Oneview's rapidly scaling U.S. platform.

Mark McCloskey, Founder and President of Oneview commented:  "These are extremely exciting developments for us as a company.  We are delighted to be continuing to partner with some of the most innovative healthcare organisations in the world and look forward to working with them to demonstrate the power of the Oneview platform.  Our centre of gravity continues to move towards the United States and the opening of our North American headquarters in Chicago demonstrates our commitment to these clients and our rapidly growing team of professionals in the United States".

Oneview continues to scale and execute the business plan after successfully listing on the Australian Stock Exchange in March 2016.  The IPO raised A$62.4 million for Oneview and currently has a fully diluted market capitalisation of approximately A$235 million as at 20th May 2016.

**About Oneview Healthcare**

Oneview Healthcare's innovative Patient Engagement and Clinical Workflow Solution seamlessly integrates a hospital's IT system onto one high performance technology platform. It provides point-of-care access to those systems across all end user devices, including bedside terminal, TV, tablet and smart phone.

Through its services and applications, which include treatment education for patients, entertainment and interactive patient care services, Oneview enables hospitals to optimise patient engagement, clinical outcomes and workflow efficiencies – revolutionizing the patient experience.

This capability enables hospitals achieve quantifiable improvements across key performance areas resulting in; improved HCAHPS ratings, reduced re-admissions, meaningful use achievement, improved clinical outcomes and greater patient satisfaction.

The Oneview Healthcare Solution is now recognised globally as being one of the most innovative patient engagement products in the healthcare market. Testimony to this is the company's partnerships with industry leaders worldwide including Microsoft and Lenovo and its growing list of customers in the USA, Australia and the Middle East.

Oneview commenced operations in 2008 and has offices in Dublin, Pittsburgh, Atlanta, Dubai, Sydney and Melbourne. Oneview Healthcare is headquartered in Dublin, the location for all its R&D and software development.
