有机较大婴儿配方奶粉二阶段

对大约6个月大的宝宝来说, 单纯的母乳或婴儿配方奶粉喂养已无法满足其营养储备和需求, 但是这些仍将是宝宝营养摄入的主要来源。

值得注意的是, 这个年龄段的宝宝需要更多的铁和锌的摄入。引入固体食物是很重要的第一步, 可以确保宝宝获得所需的铁、维生素和矿物质, 从而健康茁壮地成长。

- Direct retailing in China, increasing Bellamy's brand penetration
- Focused on further growing our multi-channel distribution – online and offline – with infant formula as the spearhead
- Leverage Top 10 presence for infant formula on Tmall
- With the China consumer buying more and more online, we aim to capture a growing portion of the e-commerce market directly through multiple platforms such as Tmall, JD, VIP, and BabyTree
- Selling direct to China resellers (rather than indirectly via Australian retail sales)

China: Regulatory changes strengthen long term growth opportunities

- Bellamy's has planned for the anticipated regulatory changes over the last 2 years
- Underlying motivation for the changes are to protect Chinese consumers - strong, safe brands like Bellamy's will benefit:

Manufacturing: limit of 3 brands / 3 products per brand will reduce the number of brands from >2,000 to <250

- Bellamy's volumes, scale and depth of penetration mean we are a priority top 3 customer with our manufacturers and canners

Chinese labelling: for importing of food products through cross border and FT2 channels

- Bellamy's already doing this for offline distribution and now producing more Chinese product ahead of May 2017

Advertising: cannot make claims of benefits to children from product

- Bellamy's is not doing this and will be able to claim the product is "organic" as this is factual and certified

SE Asia provides further growth opportunities

- Our volume share in Singapore continues to rise. In channels where we have achieved full penetration, eg pharmacy, our share has reached 4.7%. We have recently increased our distribution points in the supermarket & hypermarket channels, which will see our share gain continue
- In June 2016, Bellamy's entered into a strategic distribution partnership to support continued growth across Singapore and also growth in Hong Kong
 - Enables us to leverage distribution platforms on a broader scale
- In Vietnam, we are working towards improving our footprint through adopting a direct to market model
 - Provide greater control over distribution of our products

Investing in business to optimise long-term returns

- During FY17 we expect to invest an additional \$15-20m across product, people, marketing and promotional activities
- In particular with greater volume, we will invest significantly in marketing in China to attract new customers and increase the lifetime value of existing customers in that market
- This investment will position the business for sustainable earnings growth in FY18 and beyond, by growing our customer base and increasing our penetration in key markets

Key priorities for FY17

Continue to build distribution in China to deliver both online and offline access to consumers

Strong marketing activation campaigns to build platform for future growth through brand awareness

Continue to develop the organic dairy industry in Australia that will support local content for the long-term growth of Bellamy's

Leverage our agile and flexible founders' mentality to meet regulatory changes in China

Explore our new market opportunities and build the capabilities to respond

Build the Bellamy's team and continue our core strengths - agility, innovation, entrepreneurship
