Sept 2016 Quarterly Report

HIGHLIGHTS

- **Continuing to work on proving up its gas resource in the Windorah Trough**
- **Company's Tamarama-1 well is continuing to show gas flow and recovering fluid.**
- **RLE is well funded with \$6.7 million of cash at bank together with a \$1.49 million receivable for R & D tax incentive refund as at 30 Sept 2016**

Real Energy Corporation Limited (ASX: RLE and Real Energy) is pleased to provide an update to shareholders for the quarter ended 30 September 2016. During the quarter, the Company continued to progress exploration work at its major projects in the Cooper Basin.

Exploration

During the quarter, the Company has successfully concluded recompletion operations at the Tamarama-1 well. The well has been flowing gas and recovering fluid. The well was shut in on 27 September 2016 as we believed we had recovered the majority of the frac fluid.

After the end of the quarter, the well has been put on flow test, however the flow test was postponed as the well has continued to produce gas and water slugs.

Field analysis of the recovered water samples indicates the fluids are still frac fluids with high salinity characteristics. We continue to flow the well with the objective to clean up the well of frac fluids prior to undertaking the gas flow test. The Company will report the flow test results to the market as soon as they become available.
