Quarterly Activities Report: Appendix 4C – June 2016

Attached is the June 2016 Quarterly Report for Entities Admitted on the Basis of Commitments (Appendix 4C) for Intec Ltd (ASX Code: INL; Intec or the Company).

Science Developments Pty Ltd

Intec owns a 50% interest in Science Developments Pty Ltd (SciDev) and holds an option to increase its ownership to 100% based on an agreed formula related to the profitability of SciDev. The option to increase Intec's ownership to 100% expires on 31 August 2016. Discussions with the owners of the other 50% of SciDev are currently in progress in relation to an extension of the option period for Intec to acquire the remaining 50% of SciDev.

SciDev achieved growth in both sales and profit during the quarter. The quarter saw the re-commencement of product sales to a dairy processing facility on the South Island of New Zealand. As advised previously, sales to this site will principally occur in the winter and spring months and are undertaken via SciDev's distributor, Apex Environmental Ltd.

The commercial trial of the Optiflox® system, including the controlled dosing of SciDev coagulant, continued at Peabody Energy's Wilpinjong coal mine. As the agreed trial period will soon be completed, SciDev and Peabody Energy are currently in discussions regarding a two-year contract for the continued supply of both the Optiflox® system and associated coagulant product at Wilpinjong.

During the commercial trial at Wilpinjong various modifications and adjustments have been made to the installed Optiflox® system. This has led to a revised design for a Mark II Optiflox® system. This re-design has now been completed and results in a material reduction in both complexity and installation footprint. Consequent upon agreement regarding certain commercial matters, SciDev is likely to soon place an order for a number of Optiflox® systems.

Also during the quarter a successful trial of SciDev chemicals was completed at another Peabody Energy coal mine in NSW. A proposal for the supply of an Optiflox® system and associated chemical product to this site will be submitted shortly. Further trials of SciDev chemicals are also scheduled to take place at Peabody Energy coal mines in both NSW and Queensland during the current quarter.

During the current quarter, SciDev is also scheduled to undertake a trial at a major dairy processing facility in Victoria.

Corporate

Intec continues to investigate other acquisition opportunities, principally those either complementary or supplementary to SciDev. Intec also continues to investigate a number of options for realising value from its wholly-owned Zeehan Slag dump.

The attached Appendix 4C, including the consolidated statement of cash flows, represents a consolidation of the cash flows of Intec, its wholly-owned subsidiaries and SciDev. The consolidated cash balance at 30 June 2016 was \$0.479 million.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
2. The definitions in, and provisions of, *AASB 1026: Statement of Cash Flows* apply to this report except for the paragraphs of the Standard set out below.
 - 6.2 - reconciliation of cash flows arising from operating activities to operating profit or loss
 - 9.2 - itemised disclosure relating to acquisitions
 - 9.4 - itemised disclosure relating to disposals
 - 12.1(a) - policy for classification of cash items
 - 12.3 - disclosure of restrictions on use of cash
 - 13.1 - comparative information
3. **Accounting Standards.** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
