

Wins Prestigious Lighting Industry Award

13 September 2016, Melbourne: Traffic Technologies Limited (TTI or the Company) is pleased to announce that it has won the Best Design Award at the Australian Smart Lighting Summit for 2016 for its LED street light.

The Australian Smart Lighting Summit is the leading lighting event in the region focusing on street, urban, outdoor and public lighting. As the region's premier platform to discuss upcoming project opportunities, new technologies, energy efficient strategies and regulations impacting the lighting sector, the 2016 Australian Smart Lighting Summit attracted a significant number of lighting industry professionals committed to the deployment of innovative and intelligent lighting solutions.

Commenting on the award, Managing Director Con Liosatos said: "It is with great pleasure that we have accepted this award. With over 20 years' experience in LED technology the Company has devoted significant resources and time to developing a suite of state-of-the-art, smart LED street lights. This investment has enabled the Company to secure approvals in a number of States for its LED street lights. In addition it has won contracts to supply LED street lights to State road authorities and power companies, including the upgrade of the Monash and Calder Freeways in Melbourne."

"LED street lighting represents a significant growth opportunity for the Company as well as offering significant savings in terms of power and maintenance costs to State road authorities, local councils and power authorities."
