CHAIRMAN'S ADDRESS TO THE 2018 ANNUAL GENERAL MEETING

Dear shareholders,

It gives me great pleasure to present to all our shareholders our 2017 annual report. For the better part of 2017, we have focused our resources on developing new and innovative products to provide a good foundation for the future profit growth of the Company.

I am pleased to report our upgraded MAGIC X6L Android Smartphone is now in commercial production. The product will have our own proprietary community software application to enable us to capture a substantial market share from all the direct sales companies.

The product is engineered to compete with similar mid-range products offered by branded competitors. It is competitively priced with at least a 30% price advantage over branded products in the same class.

This year we will be working very closely with reliable asset management companies to secure at least US\$8million in equity funding we need to finance our business growth. We have recently upgraded our website and made public future growth products and services. With this proper foundation in place, we will achieve our sales and profit targets for 2018.

In closing, I am pleased to announce that we will unveil our next world's first innovative mobile device to the global market. This product will secure us international brand recognition. It will anchor the future growth and profitability of the company.

Sincerely,

A handwritten signature in black ink, appearing to read 'Cheng Pheng Loi', written over a light blue horizontal line.

Cheng Pheng Loi
Chairman
