NSX ANNOUNCEMENT

Date: 27 September 2018

VGX launches new product – MG BioFormula™ No.3 (Cankers)

Virgin Greens X Sdn Bhd, a wholly-owned subsidiary of VGX Limited, has successfully created the MG BioFormula™ platform to facilitate generation of various multi-strain microbial inoculants for treating plant diseases by triggering plant's immune system.

MG BioFormula™ No.3 (Cankers) is the first product launch based on the MG BioFormula™ platform and is designed to treat tree canker diseases. Plants have the ability to recognize the microbial activities induced by multi-strain microbial inoculants such as **MG BioFormula™ No.3 (Cankers)** and trigger an immune response. This phenomenon is called systemic acquired resistance or SAR. SAR helps plants resist diseases or recover from diseases such as cankers once infected.

This new product platform is in addition to the existing range of products which is designed to increase and maintain the populations of beneficial microbes in the designated habitat for plant maintenance purposes.
