

QUARTERLY ACTIVITIES REPORT FOR THE QUARTER ENDED 30th September 2022

The Directors of K2 Energy Limited (NSX: KTE) (“K2”) provide the following report for the quarter ended 30th September 2022.

K2 Energy’s major activities during the quarter were its strategic investment in Atomera, Inc. (“Atomera”).

ATOMERA, INC.

K2 Energy provided critical funding to Atomera, Inc. during its R & D development phase while they developed patentable technology for the silicon chip industry with energy saving and performance attributes. This funding converted into a significant interest in a NASDAQ listed corporation, being Atomera, Inc.

Detailed below are extracts from the announcements made by Atomera in August 2022.

“Recent Company Highlights

- Atomera grew its customer pipeline leveraging improved capacity and fewer travel restrictions
- Promising interim test results were achieved from ongoing wafer runs
- Whitepaper published detailing breakthroughs in MST for leading-edge process technologies

Management Commentary

"The test results from recent wafer runs are confirmation that MST can deliver stronger benefits than anticipated in vital applications, and further, we were able to accurately model such improvements via MSTcad," said Scott Bibaud, President and CEO. "Face-to-face customer activity has accelerated with the reduction in COVID-related travel restrictions, enabling the company to add a customer to the pipeline, and to move existing engagements forward. We believe the industry capacity outlook and the new Chips and Science Act are tailwinds for Atomera as we collaborate with customers toward commercial adoption of MST."

"MST is a quantum-engineered material that enhances transistors to deliver significantly better performance in semiconductor devices, while shrinking die sizes and reducing costs. As it is a complementary material technology to other nano-scaling technologies in the semiconductor industry roadmap, it can be implemented on standard manufacturing tools without significant additional cost or modification to the current semiconductor fabrication process. When successfully integrated, MST can deliver up to a full node of power and performance improvement within the same geometry."

Further details are available at www.atomera.com.

Atomera’s share price as at 30 September 2022 was approximately USD10 per share, which valued K2 Energy’s shareholding in Atomera at approximately AUD8.1 million.

MST™ SOLAR

K2 Energy owns the exclusive worldwide rights to the MST™ Technology for all solar energy applications.

QUARTERLY CASHFLOW

Cash on hand at 30 September 2022 was \$107,551.

Cash outgoings for the quarter were \$38,379, including an amount of \$3,300 paid for the use of the Company's registered office premises.
