ASX ANNOUNCEMENT

NAB 2017 Third Quarter Pillar 3 Report

National Australia Bank Limited (NAB) today released its Third Quarter Pillar 3 Report, as required under the Australian Prudential Regulation Authority Prudential Standard APS 330: Public Disclosure.

The Pillar 3 Report should be read in conjunction with the NAB 2017 Third Quarter Trading Update. The report is attached to this announcement and available at:

http://www.nab.com.au/about-us/shareholder-centre/regulatory-disclosures

PILLAR 3 REPORT 2017

National Australia Bank

Incorporating the requirements of APS 330

Third Quarter Update as at 30 June 2017

National Australia Bank Limited ABN 12 004 044 937

Table of Contents

Section 1

Introduction

National Australia Bank Limited (ABN 12 004 044 937) (NAB) applies the Basel framework as a cornerstone of the NAB Group's risk management framework and capital strategy, and recognises that it is critical for achieving the NAB Group's strategic agenda.

In Australia, the Australian Prudential Regulation Authority (APRA) has regulatory responsibility for the implementation of the Basel Accord through the release of prudential standards.

This Pillar 3 Report is designed to provide the NAB Group's stakeholders with detailed information about the approach the NAB Group takes to manage risk and to determine capital adequacy, having regard to the operating environment. The report also addresses the requirements of APRA's *Prudential Standard APS 330: Public Disclosure (APS 330)*.

All figures in this report are in Australian dollars (AUD) unless otherwise noted. Disclosures in this report are based on the APRA Basel III standards that have applied since 1 January 2013, except for market risk Risk Weighted Assets (RWA) that are calculated on a Basel 2.5 basis for each period presented.

Capital Ratio Summary

The NAB Group's Common Equity Tier 1 (CET1) capital ratio of 9.7% at 30 June 2017 is consistent with the NAB Group's objective of maintaining a strong capital position.

	As at	
	30 Jun 17	31 Mar 17
Capital ratios (Level 2)	%	%
Common Equity Tier 1	9.7	10.1
Tier 1	12.0	12.5
Total	14.2	14.7

The NAB Group remains responsive to economic conditions and continues to maintain strong balance sheet settings. These settings enable the NAB Group to operate effectively through difficult market conditions and ensure that it is well positioned for future regulatory change and balance sheet growth.

1.1 The NAB Group's Capital Adequacy Methodologies

The majority of the NAB Group's businesses operate in Australia and New Zealand, with branches located in Asia, the United Kingdom and the United States. The following table sets out the NAB Group's approach to the Basel Accord, as applied across the NAB Group as at 30 June 2017.

The NAB Group's Basel Methodologies[1,2,3,4]

Methodology Approach	Credit Risk	Operational Risk	Non-Traded Market Risk	Traded Market Risk
National Australia Bank Limited and Bank of New Zealand	Advanced IRB	AMA	IRRBB	Standardised and IMA

(1) IRB: Internal Ratings Based approach
(2) AMA: Advanced Measurement Approach
(3) IRRBB: Interest Rate Risk in the Banking Book
(4) IMA: Internal Models Approach

Bank of New Zealand (BNZ), the NAB Group's main operating subsidiary in New Zealand, is regulated by the Reserve Bank of New Zealand (RBNZ). Credit risk exposures consolidated in the NAB Group position are calculated under RBNZ requirements.

1.2 APS 330 Disclosure Governance

The NAB Group's Disclosure and External Communications Policy defines Board and management accountabilities for *APS 330* disclosure, including processes and practices to ensure the integrity and timeliness of prudential disclosures and compliance with NAB Group policies.

Section 2

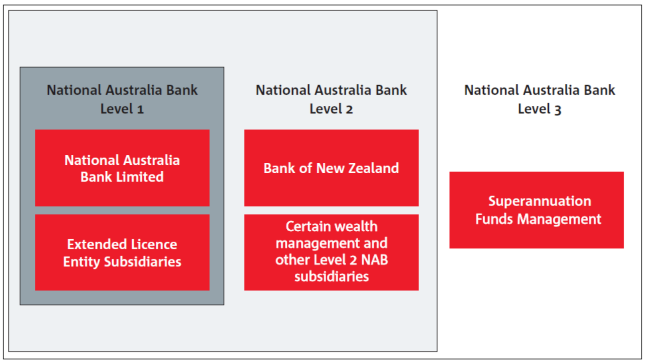
Scope of Application

APRA measures the NAB Group's capital adequacy by assessing financial strength at three levels:

- Level 1: comprises NAB and its subsidiary entities approved by APRA as part of the Extended Licensed Entity (ELE)
- Level 2: comprises NAB and the entities it controls, subject to certain exceptions set out below
- Level 3: comprises the conglomerate NAB Group.

This report applies to the Level 2 consolidated group (the Level 2 Group).

NAB Group Consolidation for Regulatory Purposes



The controlled entities in the Level 2 Group include BNZ and other financial entities (e.g. broking, wealth advisory and leasing companies).

Superannuation, funds management and certain other activities are excluded from the calculation of RWA and the related controlled entities are deconsolidated from the Level 2 Group for the purposes of calculating capital adequacy.

From 1 April 2017, National Wealth Management Holdings Limited (NWMH) has been included as part of the Level 2 Group.

As a result, transitional arrangements previously granted by APRA for debt issued directly by NWMH are no longer required.

In addition, certain securitisation special purpose vehicles (SPVs) to which assets have been transferred in accordance with APRA's requirements as set out in *APS 120: Securitisation* have been deconsolidated from the Level 2 Group for the purposes of this disclosure. For regulatory purposes, credit risk is removed from the sold assets and there is no requirement to hold capital against them.

Section 3

Capital

Capital Adequacy [APS 330 Attachment C, Table 3a - 3f]

The following table provides the Basel Accord RWA and capital ratios for the Level 2 Group.

	As at	
	30 Jun 17	31 Mar 17
	RWA	RWA
	$m	$m
Credit risk [(1)]		
IRB approach		
Corporate (including SME) [(2)]	117,372	118,133
Sovereign	1,434	1,632
Bank	10,605	10,789
Residential mortgage [(3)]	100,586	91,883
Qualifying revolving retail	4,135	3,785
Retail SME	6,005	6,021
Other retail	3,648	3,731
Total IRB approach	**243,785**	**235,974**
Specialised lending (SL)	**58,205**	**56,977**
Standardised approach		
Australian and foreign governments	-	-
Bank	-	-
Residential mortgage	2,493	2,557
Corporate	4,372	4,307
Other	600	531
Total standardised approach	**7,465**	**7,395**
Other		
Securitisation	3,645	3,325
Credit Value Adjustment	9,475	9,815
Central counterparty default fund contribution guarantee	884	800
Other [(4)]	3,738	3,567
Total other	**17,742**	**17,507**
Total credit risk	**327,197**	**317,853**
Market risk	7,074	7,001
Operational risk	37,899	37,500
Interest rate risk in the banking book	11,775	12,133
Total risk-weighted assets	**383,945**	**374,487**

(1) *RWA which are calculated in accordance with APRA's requirements under the Basel Accord are required to incorporate a scaling factor of 1.06 to assets that are not subject to specific risk weights.*

(2) *Corporate (including SME) consists of corporations, partnerships or proprietorships not elsewhere classified and includes non-banking entities held by banks.*

(3) *Uplift in residential mortgage RWA is primarily driven by an IRB model change.*

(4) *'Other' includes non-lending asset exposures.*

Section 4

Credit Risk Exposures

Total and Average Credit Risk Exposures [APS 330 Attachment C, Table 4a]

This table provides the credit risk exposure subject to the Standardised and Advanced IRB approaches. The Level 2 Group has no credit risk exposures subject to the Foundational IRB Approach.

Gross credit risk exposure refers to the potential exposure as a result of a counterparty default prior to the application of credit risk mitigation. It is defined as the outstanding amount on drawn commitments plus a credit conversion factor on undrawn commitments on a given facility. For derivatives, exposure is defined as the mark-to-market plus a potential value of future movements. This table includes total Exposure at Default (EaD) net of eligible financial collateral (EFC). The average credit risk exposure is the sum of the gross credit risk exposure at the beginning of the reporting period plus the gross credit risk exposure at the end of the reporting period, divided by two.

For the Advanced IRB approach, EaD is reported gross of specific provisions and partial write-offs. For the Standardised approach, EaD is reported net of any specific provision. Exposures exclude non-lending assets, securitisation and Credit Value Adjustment (CVA).

	As at 30 Jun 17					3 months ended 30 Jun 17
	On-balance sheet exposure	Non-market related off-balance sheet	Market related off-balance sheet	Total exposure gross of EFC	Total exposure net of EFC	Average total exposure gross of EFC

Section 5

Credit Provision and Losses

Credit Risk Provisions [APS 330 Attachment C, Table 4b - c]

The following tables set out information on credit risk provision by Basel Accord asset class, excluding non-lending assets and securitisation exposures. Definitions of impairment and past due facilities are based on *APS 220: Credit Quality*. This standard also provides guidance for provisioning, estimated future credit losses and the General Reserve for Credit Losses (GRCL).

	As at 30 Jun 17			3 months ended 30 Jun 17

General reserve for credit losses			**2,381**		

(1) *Impaired facilities includes $nil of restructured loans (March 2017: $nil).*
Corporate (incl SME) impaired facilities includes $492 million (NZ $517 million) of NZ Banking dairy exposures currently assessed as no loss based on security held. (March 2017: $726 million (NZ$795 million)). Collective provisions are held against these loans.
Impaired facilities includes $73 million of gross impaired loans at fair value (March 2017: $119 million).

(2) *Specific provisions for prudential purposes include all provisions for impairment assessed on an individual basis in accordance with IFRS excluding securitisation. For regulatory reporting collective provisions on defaulted or otherwise non-performing assets, regardless of expected loss, such as those for 90+ days past due retail and in default with no loss non-retail exposures, are treated as regulatory specifics and total $432 million (March 2017: $435 million). This value is in addition to the $752 million of specific provisions (March 2017: $748 million) shown above. Specific provisions includes $3 million (March 2017: $1 million) of specific provisions on gross impaired loans at fair value.*

(3) *Net write-offs includes net write-offs of fair value loans.*

Section 6

Securitisation

Third Party Securitisation Exposures [APS 330 Attachment C, Table 5b]

The following two tables provide information about assets that the Level 2 Group manages as securitisations (predominantly for third party clients) where the exposures are risk weighted under APS 120. These tables do not provide information on Level 2 Group assets that have been sold to securitisations whether or not the assets are risk weighted under APS 120. The table below breaks down the securitisation exposures by type of facility as defined in the Glossary.

	As at 30 Jun 17			As at 31 Mar 17		
	On-balance sheet	Off-balance sheet	Total	On-balance sheet	Off-balance sheet	Total
Securitisation exposure type	$m	$m	$m	$m	$m	$m
Liquidity facilities	18	1,792	1,810	15	1,791	1,806
Warehouse facilities	8,767	2,080	10,847	8,741	1,923	10,664
Credit enhancements	-	19	19	-	18	18

Section 7

Glossary

Term	Description
ABCP	Asset-Backed Commercial Paper being a form of commercial paper that is collateralised by other financial assets. It is a short-term debt instrument created by an issuing party (typically a bank or other financial institution).
Additional regulatory provisions	That portion of collective provisions covering facilities where any assessment of probability of default or loss would give rise to a reasonable expectation that the facilities in question will need in the short term to be subject to a write-down or write-off, or assessment for impairment on an individual facility basis.
ADI	Authorised Deposit-taking Institution.
Advanced IRB approach (IRB)	The Advanced Internal Ratings Based (IRB) approach refers to the processes employed by the NAB Group to estimate credit risk. This is achieved through the use of internally developed models to assess potential credit losses using the outputs from the PD, LGD and EaD models.
AMA	Advanced Measurement Approach (AMA) is the risk estimation process used for the NAB Group's operational risk. It combines internally developed risk estimation processes with an integrated risk management process, embedded within the business with loss event management.
APRA	Australian Prudential Regulation Authority.
APS	Prudential Standards issued by APRA applicable to ADIs.
Basel Accord	The Basel regulatory framework (which includes Basel II, Basel 2.5 and Basel III) is the global benchmark for assessing banks' capital adequacy. The guidelines are aimed at promoting a more resilient banking system through the development of capital adequacy standards that are more accurately aligned with the individual risk profile of institutions, by offering greater flexibility for supervisors to recognise and encourage the use of more sophisticated risk management techniques.
Board	Board of Directors of NAB.
Capital adequacy	Capital adequacy is the outcome of identifying and quantifying the major risks the NAB Group is exposed to, and the capital that the NAB Group determines as an appropriate level to hold for these risks, as well as its strategic and operational objectives, including its target credit rating.
Central Counterparty (CCP)	A clearing house which interposes itself, directly or indirectly, between counterparties to contracts traded in one or more financial markets, becoming the buyer to every seller and the seller to every buyer.
Common Equity Tier 1 (CET1) Capital	Common Equity Tier 1 (CET1) Capital is recognised as the highest quality component of capital. It is subordinated to all other elements of funding, absorbs losses as and when they occur, has full flexibility of dividend payments and has no maturity date. It is predominately comprised of common shares; retained earnings; undistributed current year earnings; as well as other elements as defined under APS111 - Capital Adequacy: Measurement of Capital.
Corporate (including SME)	Corporate (including SME) consists of corporations, partnerships or proprietorships not elsewhere classified and includes non-banking entities held by banks.
Credit derivative transactions	In relation to securitisation exposures, credit derivative transactions are those in which the credit risk of a pool of assets is transferred to the NAB Group, usually through the use of credit default swaps.
Credit enhancements	Credit enhancements are arrangements in which the NAB Group holds a securitisation exposure that is able to absorb losses in the pool, providing credit protection to investors or other parties to the securitisation. A first loss credit enhancement is available to absorb losses in the first instance. A second loss credit enhancement is available to absorb losses after first loss credit enhancements have been exhausted.
Credit Value Adjustment (CVA)	A capital charge to reflect potential mark-to-market losses due to counterparty migration risk on bilateral OTC derivative contracts.
Derivative transactions	In relation to securitisation exposures, derivative transactions include interest rate and currency derivatives provided to securitisation SPVs, but do not include credit derivative transactions.
EaD	Exposure at Default (EaD) is an estimate of the total committed credit exposure expected to be drawn at the time of default for a customer or facility that the NAB Group would incur in the event of a default. It is used in the calculation of RWA.
ELE	The Extended Licensed Entity (ELE) comprises the ADI itself and any APRA approved subsidiary entities assessed as effectively part of a single 'stand-alone' entity, as defined in *Prudential Standard APS 222 Associations with Related Entities.*
Eligible financial collateral	Eligible financial collateral, under the standardised approach, will be the amount of cash collateral, netting and eligible bonds and equities. Eligible financial collateral, under the IRB approach is limited to the collateral items detailed in *Attachment H* of *APS 112.* Recognition of eligible financial collateral is subject to the minimum conditions detailed in that same Attachment.
Fair value	The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at measurement date.
Foundation IRB (FIRB)	Foundation Internal Ratings Based (FIRB) approach refers to an alternative approach to advanced IRB defined under the Basel Accord where a Group develops its own PD models and seeks approval from its regulator to use these in the calculation of regulatory capital, and the regulator provides a supervisory estimate for LGD and EaD.
General Reserve for Credit Losses (GRCL)	The general reserve for credit losses (GRCL) is an estimate of the reasonable and prudent expected credit losses over the remaining life of the portfolio and on non-defaulted assets. The reserve is a compliance requirement under APS 220 - Credit Quality. The GRCL is calculated as a collective provision for doubtful debts, excluding securitisation and provision on default no-loss assets. The difference between the GRCL and accounting collective provision is covered with an additional top-up, created through a transfer from retained earnings to a reserve, to reflect losses expected as a result of future events that are not recognised in the NAB Group's collective provision for accounting purposes.
GRCL calculation methodology	The GRCL is calculated as a collective provision for doubtful debts, excluding securitisation and provision on default no-loss assets. The difference between the GRCL and accounting collective provision is covered with an additional top-up, created through a transfer from retained earnings to reflect losses expected as a result of future events that are not recognised in the NAB Group's collective provision for accounting purposes. All collective provisions on defaulted or otherwise non-performing assets, regardless of expected loss, are reported as additional regulatory specific provisions.
IFRS	International Financial Reporting Standards.
IMA	Internal Model Approach (IMA) describes the approach used in the assessment of traded market risk. The NAB Group uses, under approval from APRA, the IMA to calculate general market risk for all transactions in the trading book other than those covered by the Standard Method.

Term	Description
Impaired facilities	Impaired facilities consist of: - Retail loans (excluding unsecured portfolio managed facilities) which are contractually past due 90 days with security insufficient to cover principal and arrears of interest revenue - Non-retail loans which are contractually past due and there is sufficient doubt about the ultimate collectability of principal and interest; and - Impaired off-balance sheet credit exposures where current circumstances indicate that losses may be incurred. - Unsecured portfolio managed facilities are also classified as impaired assets when they become 180 days past due (if not written off).
IRB approach	The internal ratings based (IRB) approach refers to the processes employed by the NAB Group to estimate credit risk. This is achieved through the use of internally developed models to assess the potential credit losses using the outputs from the probability of default, loss given default and exposure at default models.
IRRBB	Interest rate risk in the banking book.
Level 2 Group	The Level 2 Group, being NAB and the entities it controls subject to certain exceptions set out in *Section 2 Scope of Application* of this report.
Level 3 conglomerate Group	Contains APRA-regulated entities with material operations across more than one APRA-regulated industry and/or unregulated entities.
Leverage Ratio	The Leverage Ratio is a simple, transparent; non-risk based supplementary measure that use exposures to supplement the risk-weighted assets based capital requirements and is prepared in accordance with APRA's *Prudential Standard APS110: Capital Adequacy.*
LGD	Loss Given Default (LGD) is an estimate of the expected severity of loss for a credit exposure following a default event. Regulatory LGDs reflect a stressed economic condition at the time of default. It is used in the calculation of RWA.
Liquidity Coverage Ratio (LCR)	LCR is a new measure announced as part of the Basel III liquidity reforms that came into force on 1 January 2015. The ratio measures the amount of high quality liquid assets held that can be converted to cash easily and immediately in private markets, to total net cash flows required to meet the NAB Group's liquidity needs for a 30 day calendar liquidity stress scenario.
Liquidity facilities	Liquidity facilities are provided by the NAB Group to an SPV for the primary purpose of funding any timing mismatches between receipts of funds on underlying exposures and payments on securities issued by the SPV (asset liquidity facilities), or to cover the inability of the SPV to roll over ABCP (standby liquidity facilities).
NAB	National Australia Bank Limited ABN 12 004 044 937.
NAB Group	NAB and its controlled entities.
Net write-offs	Write-offs on loans at amortised cost and Fair Value loans net of recoveries.
Past due facilities ≥ 90 days	Past due facilities ≥ 90 days consist of well-secured assets that are more than 90 days past due and portfolio-managed facilities that are not well secured and between 90 and 180 days past due.
PD	Probability of Default (PD) is an estimate of the likelihood of a customer defaulting or not repaying their borrowings and other obligations to the NAB Group in the next 12 months.
Qualifying revolving retail exposures	For the purposes of regulatory reporting, credit cards are referred to as qualifying revolving retail.
Regulatory capital	Regulatory capital is the total capital held by the NAB Group as a buffer against potential losses arising from the business the NAB Group operates in. Unlike economic capital, it is calculated based on guidance and standards provided by the NAB Group's regulators, including APRA. It is designed to support stability in the banking system and protect depositors.
Risk-Weighted Assets (RWA)	A quantitative measure of the NAB Group's risk, required by the APRA risk-based capital adequacy framework, covering credit risk for on- and off-balance sheet exposures, market risk, operational risk and interest rate risk in the banking book.
Securities	Securities include the purchase of securitisation debt securities for either trading or banking book purposes.
Securitisation	Structured finance technique which involves pooling, packaging cash-flows and converting financial assets into securities that can be sold to investors.
SME	Small and medium sized enterprises.
Specific provisions	Specific provisions for prudential purposes include all provisions for impairment assessed on an individual basis in accordance with IFRS excluding securitisation.
Standardised approach	Standardised refers to an alternative approach to the assessment of risk (notably credit and operational) whereby the institution uses external rating agencies to assist in assessing credit risk and/or the application of specific values provided by regulators to determine RWA.
Tier 1 Capital	Tier 1 Capital comprises Common Equity Tier 1 (CET1) Capital and instruments issued by the NAB Group that meet the criteria for inclusion as Addition Tier 1 capital set out in APS111 - Capital Adequacy: Measurement of Capital
Tier 1 Capital ratio	Tier 1 Capital as defined by APRA divided by RWA.
Tier 2 Capital	Tier 2 Capital includes other components of capital that, to varying degrees, fall short of the quality of Tier 1 Capital but nonetheless contribute to the overall strength of an ADI and its capacity to absorb losses.
Tier 2 Capital ratio	Tier 2 Capital as defined by APRA divided by RWA.
Total Capital	Total capital is the sum of Tier 1 capital and Tier 2 capital, as defined by APRA.
Total Capital ratio	Total capital ratio is the sum of Tier 1 capital and Tier 2 capital, as defined by APRA, divided by risk-weighted assets.
Warehouse facilities	Warehouse facilities are lending facilities provided by the NAB Group to an SPV for the financing of exposures in a pool. These may be on a temporary basis pending the issue of securities or on an on-going basis.
Write-offs	Write-offs represent credit losses in accordance with accounting rules.
